Ways Of The World A Brief Global History With Sources Volume 2 Since 15:

Urban Growth in Ethiopia, 1887-1974 Getahun Benti, 2016-12-20 This book highlights the positive achievements that Imperial Ethiopia made in its journey towards urbanization into the modern era and undertakes a critical assessment of the economic political and social impediments that prevented the country from transitioning into a truly fully fledged modern urbanization It provides a comprehensive history of the growth of towns between 1887 and 1974 It is organized chronologically regionally and thematically divided into three distinct time periods during which Ethiopian towns saw progresses and exposures to limited modern urban features First during 1887 1936 the country saw the creation and growth of a national capital 1887 that coordinated the country s economic and political activities and facilitated the growth of other towns in the empire It introduced new towns the railway modern schools and health centers Rudimentary factories were established in Addis Ababa and Dire Dawa along with motor cars and modern roads which increased trade between cities The next era was the Italian occupation from 1936 1941 which shook the pre existing process of urban growth by introducing a modern European style urbanization system Ethiopian cities saw a qualitatively different way of urban growth in both form and content The Italians introduced modern economic and physical planning administration and internal organization People were introduced to modern life in urban areas exposed to modern wage labor system and thus moved to towns to take advantage of the opportunity The Italian occupation left behind many features of modern urbanization and this influenced population exposed to modern consumptive tastes was determined to retain what the Italians introduced Finally the post Italian period saw a new era of urban growth Due to economic and organizational problems resulting from destructions caused by the war the process of urban growth was slowed down in the early 1940s Although the government did not introduce a clear urban policy in the immediate aftermath of the Second World War towns continued to grow progressively from the early 1950s to 1974

Human Security and Epidemics in Africa Andreas Velthuisen, Caroline Varin, 2024-04-15 This book examines the impact of epidemics in Africa exploring some of the adaptation and crisis management strategies adopted to tackle COVID 19 Ebola and HIV AIDS The authors reflect on lessons learned from solving complex problems and difficult decisions made by leaders on pandemic management to shape the security environment and thus the well being of people living in Africa for years to come Drawing on cases from across the continent the book demonstrates that significantly during the COVID 19 pandemic African countries and communities frequently displayed regional solidarity creativity in decision making decisiveness in dealing with corruption and opportunism and resilience and discipline in implementation Adopting a human security framework the authors share their lived experiences and explore the impact of epidemics on public policy decision making foreign policy implementation global relations collaboration in the community dimension and ultimately the future of socio economic development in Africa This book will be a welcome addition for practitioners and researchers across the fields of security studies health management and African studies making an essential contribution to

The Code of Civilization Vyacheslav Nikonov, 2021-06-07 In his book Vyacheslav Nikonov shows the origins of the modern world and traces the chronologies and histories of peoples and countries. Nikonov discusses the main centers of influence and forces that shape the world in which we live. The world demonstrates a variety of development models shaped by the national, regional, historical, religious, and other aspects of each country. The center of gravity of world development is shifting from West to East, from North to South, from developed economies to developing ones. Thirty years ago, Western countries accounted for 80% of the world economy; now it is less than half. Asia, already home to most of humanity, will become a global leader in the coming decades. What does this mean? What will the world be like, and what place will Russia take in it? Will American hegemony continue? Will China become a superpower? Will Europe become a museum for tourists from other continents? History has resumed its course, and the world is rushing towards an unstoppable diversity. Published with the support of the Institute for Literary Translation, Russia.

Inter-imperiality Laura Doyle, 2020-11-02 In *Inter-imperiality*, Laura Doyle theorizes the co-emergence of empires, institutions, language, regimes, stratified economies, and literary cultures over the longue durée. Weaving together feminist, decolonial, and dialectical theory, she shows how inter-imperial competition has generated a systemic stratification of gendered, racialized labor, while literary and other arts have helped both to constitute and to challenge this world order. To study literature is therefore, Doyle argues, to attend to world historical processes of imaginative and material co-formation as they have unfolded through successive eras of vying empires. It is also to understand oral, performed, and written literatures as power-transforming resources for the present and future. To make this case, Doyle analyzes imperial economic processes across centuries and continents in tandem with inter-imperially entangled literatures from *A Thousand and One Nights* to recent Caribbean fiction. Her trenchant interdisciplinary method reveals the structural centrality of imaginative literature in the politics and possibilities of earthly life.

Globalism in the Middle Ages and the Early Modern Age Albrecht Classen, 2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca. 1800, the opposite can well be documented through careful comparative and transdisciplinary studies, as this volume demonstrates, offering a wide range of innovative perspectives on often neglected literary, philosophical, historical, or medical documents. Texts, images, ideas, knowledge, and objects migrated throughout the world already in the pre-modern world, even if the quantitative level compared to the modern world might have been different. In fact, by means of translations and trade, for instance, global connections were established and maintained over the centuries. Archetypal motifs developed in many literatures indicate how much pre-modern people actually shared. But we also discover hard-core facts of global economic exchange, import of exotic medicine, and on another level, intensive intellectual debates on religious issues. Literary evidence

serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable American Empire A. G. Hopkins,2018-02-20 A new history of the United States that turns American exceptionalism on its head American Empire is a panoramic work of scholarship that presents a bold new global perspective on the history of the United States Drawing on his expertise in economic history and the imperial histories of Britain and Europe A G Hopkins takes readers from the colonial era to today to show how far from diverging the United States and Western Europe followed similar trajectories throughout this long period and how America s dependency on Britain and Europe extended much later into the nineteenth century than previously understood In a sweeping narrative spanning three centuries Hopkins describes how the revolt of the mainland colonies was the product of a crisis that afflicted the imperial states of Europe generally and how the history of the American republic between 1783 and 1865 was a response not to the termination of British influence but to its continued expansion He traces how the creation of a U S industrial nation state after the Civil War paralleled developments in Western Europe fostered similar destabilizing influences and found an outlet in imperialism through the acquisition of an insular empire in the Caribbean and Pacific The period of colonial rule that followed reflected the history of the European empires in its ideological justifications economic relations and administrative principles After 1945 a profound shift in the character of globalization brought the age of the great territorial empires to an end American Empire goes beyond the myth of American exceptionalism to place the United States within the wider context of the global historical forces that shaped the Western empires and the world **Energy Research Abstracts** ,1992-10 The Metamorphosis of the Amazon Maximilian Fritz Feichtner,2023-12-21 Offers new perspectives on the history of oil extraction in the Ecuadorian Amazon through the experiences of oil workers Complete Catalog of Books and Periodicals National Academy Press (U.S.),1990
