Transcendence The Disinformation Encyclopedia Of Transhumanism And The Singularity:

Transcendence R. U. Sirius, Jay Cornell, 2015 Transhumanism is an international movement that advocates the use of science and technology to overcome the natural limitations experienced by humanity through such developments as the Singularity the creation of machine intelligences that exceed the capacities of our biological brains the ability to replicate individual minds and put them into solidstate bodies or virtual environments individual control over mental and emotional states for enhancing functionalities and or ecstasies Some of this is happening now Some of it is still in the minds of dreamers In nearly ninety AZ entries Transcendence provides a multilayered look at the accelerating advances in artificial intelligence cognitive science genomics information technology nanotechnology neuroscience space exploration synthetic biology robotics and virtual worlds that are making transhumanism a reality Entries range from Cloning and Cyborg Feminism to Designer Babies and Memory Editing Drugs In addition the book notes historical predecessors and personalities both in mythology and history ranging from Timothy Leary to Michael Jackson to Ray Kurzweil It also introduces the culture around Transhumanism covering all the geeky obsessions of the Transhumanist movement Virtual Immortality - God, Evolution, and the Singularity in Post- and Transhumanism Oliver Krüger, 2021-10-01 In recent years ideas of post and transhumanism have been popularized by novels TV series and Hollywood movies According to this radical perspective humankind and all biological life have become obsolete Traditional forms of life are inefficient at processing information and inept at crossing the high frontier outer space While humankind can expect to be replaced by their own artificial progeny posthumanists assume that they will become an immortal part of a transcendent superintelligence Krüger's award winning study examines the historical and philosophical context of these futuristic promises by Ray Kurzweil Nick Bostrom Frank Tipler and other posthumanist thinkers **Tales of the Turing Church: Hacking religion, enlightening science, awakening technology** Giulio Prisco, 2020-02-07 This book explores intersections of science and religion spirituality and technology engineering and science fiction mind and matter and outlines a new cosmic transhumanist religion Hacking religion enlightening science awakening technology *Religion and Human Enhancement* Tracy J. Trothen, Calvin Mercer, 2017-09-17 This collection vigorously addresses the religious implications of extreme human enhancement technology Topics covered include cutting edge themes such as moral enhancement common ground to both transhumanism and religion the meaning of death desire and transcendence and virtue ethics Radical enhancement programs advocated by transhumanists could arguably have a more profound impact than any other development in human history Reflecting a range of opinion about the desirability of extreme enhancement leading scholars in the field join with emerging scholars to foster enhanced conversation on these topics The Ethics of Superintelligent Design Paul Golata, 2018-03-07 Artificial intelligence AI permeates Google searches the personal assistants in our smartphones and is all over our newsfeeds Watson's machine learning has already started to revolutionize many important industries including oncology law finance and

entertainment The idea that man is about to increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence ASI It is within this context that there is a prevailing need for a discussion of its ethical implications As a Christian ethicist Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative ASI is a move toward the proper handling of information However how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses This important ethical conversation is being led by humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the wetware of human brains The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible the supernatural creation account a realistic view of the state of humanity and biblical ethics Black Transhuman Liberation Theology Philip Butler, 2019-12-12 Mediating Black religious studies spirituality studies and liberation theology Philip Butler explores what might happen if Black people in the United States merged technology and spirituality in their fight towards materializing liberating realities The discussions shaping what it means for humans to exist with technology and as part of technology are already underway transhumanism suggests that any use of technology to augment intellectual psychological or physical capability makes one transhuman In an attempt to encourage Black people in the United States to become technological progenitors as a spiritual act Butler asks whether anyone has ever been just human Butler then explores the implications of this question and its link to viewing the body as technology Re imagining incarnation as a relationship between vitality biochemistry and genetics the book also takes a critical scientific approach to understanding the biological embodiment of Black spiritual practices It shows how current and emerging technologies might align with the generative biological states of Black spiritualities in order to concretely disrupt and dismantle oppressive societal structures

Understanding Nonverbal Communication Marcel Danesi, 2021-09-09 The human body is a primary source of meaning making with the body conveying over two thirds of our messages But how can we understand these physical communicative cues How are they being expressed and exploited in new media and multimodal online and mobile interaction Offering an in depth guide to help you investigate and understand real and virtual nonverbal communication using semiotic theory this book assumes little previous knowledge of semiotics or linguistics With in depth comparative case studies each chapter deals with a traditional aspect of nonverbal communication such as facial expressions touch and gesture before extending the discussion to new media and cyberspace Explaining the issues step by step and supported by exercises directed further reading and a glossary of key terms Understanding Nonverbal Communication provides you with all the tools you need to understand how nonverbal communication unfolds in all kinds of contexts and the kinds of messages that it makes possible

Human Contradictions in Octavia E. Butler's Work Martin Japtok, Jerry Rafiki Jenkins, 2020-07-23 Human

Contradictions in Octavia Butler's Work continues the critical discussions of Butler's work by offering a variety of theoretical perspectives and approaches to Butler's text. This collection contains original essays that engage Butler's series *Seed to Harvest*, *Xenogenesis*, *Parables*, her stand-alone novels *Kindred* and *Fledgling*, and her short stories. The essays explore new facets of Butler's work and its relevance to philosophy, sociology, anthropology, psychology, cultural studies, ethnic studies, women's studies, religious studies, American studies, and U.S. history. The volume establishes new ways of reading this seminal figure in African American literature, science fiction, feminism, and popular culture.

[Exploring Religious Dimensions in AI and Humanity](#) Aristarchos-Vasileios Gkrekas, Nicholas Kokkinos, 2024-07-17

Exploring Religious Dimensions in AI and Humanity explores how the phenomenal advancements of artificial intelligence can reshape our spiritual journeys and influence established ethical frameworks. Very Reverend Dr. Aristarchos Gkrekas offers insights grounded in deep religious understanding. Nicholas Kokkinos provides insightful analyses of the ethical implications of emerging technologies and the potential for AI to serve as a dynamic repository of religious knowledge. Through years of collaboration, both authors sought a common approach to navigate the exponential growth of technology and its impact on humanity's enduring questions about consciousness, ethics, and spirituality. This book is an essential read for those intrigued by the evolving dialogue between technology and spirituality and is enriched by references to centuries-old texts. It promises to ignite curiosity and spark a deeper understanding of our digital age's spiritual dimensions and the ethical questions that arise from these phenomenal developments.

Identity, Institutions and Governance in an AI World Peter Bloom, 2020-01-10

The 21st century is on the verge of a possible total economic and political revolution. Technological advances in robotics, computing, and digital communications have the potential to completely transform how people live and work. Even more radically, humans will soon be interacting with artificial intelligence (AI) as a normal and essential part of their daily existence. What is needed now more than ever is to rethink social relations to meet the challenges of this soon-to-arrive smart world. This book proposes an original theory of trans-human relations for this coming future. Drawing on insights from organisational studies, critical theory, psychology, and futurism, it will chart for readers the coming changes to identity, institutions, and governance in a world populated by intelligent human and non-human actors alike. It will be characterised by a fresh emphasis on infusing programming with values of social justice, protecting the rights and views of all forms of consciousness, and creating the structures and practices necessary for encouraging a culture of mutual intelligent design. To do so means moving beyond our anthropocentric worldview of today and expanding our assumptions about the state of tomorrow's politics, institutions, laws, and even everyday existence. Critically, such a profound shift demands transcending humanist paradigms of a world created for and by humans and instead opening ourselves to a new reality where non-human intelligence and cyborgs are increasingly central.
