El focusing en psicoterapia Eugene T. Gendlin, 1999-05-04 Este libro analiza el proceso terapéutico paso a paso y ofrece a los profesionales del sector formas específicas de generar movimiento efectivo especialmente en aquellos momentos en los que parece que no se está produciendo ningún cambio El autor se centra en la relación entre el cliente y el terapeuta y en los modos en que las respuestas de este último pueden estimular y promover la capacidad del primero para la experiencia directa A lo largo de la obra así se acaba considerando esa relación como un factor constante y analizándola según los grados de calidad con que se manifiesta en momentos concretos El doctor Gendlin nos muestra de esta manera como ciertas respuestas en este sentido pueden transformar algunas dificultades en momentos terapéuticos de crecimiento relacional Y el mayor logro de su libro es ofrecer a los lectores una comprensión profunda del proceso terapéutico así como un poderoso enfoque capaz de favorecer todo tipo de experiencias clínicas independientemente de la orientación a la que se adscriban El doctor Eugene T Gendlin es profesor de Psicología en la Universidad de Chicago Fundador y durante muchos años editor de la revista *Psychotherapy Theory Research and Practice* es también autor de numerosos libros y artículos y ha sido premiado por la American Psychological Association por el conjunto de su labor profesional

Psicología de Los Constructos Personales George Kelly, 2001-10 En 1955 George A Kelly presentó en su voluminosa obra *The Psychology of Personal Constructs* un proyecto de psicología alternativa de corte fenomenológico asentada sobre bases epistemológicas constructivistas Su teoría de los procesos humanos integra en un mismo lenguaje áreas tradicionalmente separadas como percepción memoria aprendizaje pensamiento lenguaje motivación emoción y personalidad Además propuso una metodología de evaluación y un enfoque terapéutico muy innovadores Sin embargo esta teoría no ha tenido una recepción apreciable hasta finales de los años setenta Desde entonces se va consolidando un movimiento internacional de científicos y profesionales de diversas áreas que van desarrollando este enfoque en sus múltiples aplicaciones Existen diversos factores que han favorecido esta consolidación Entre ellos cabe destacar la coincidencia de la postura kellyana con un movimiento del constructivista de carácter netamente interdisciplinar configurado por la Física cuántica la Cibernética y la Biología entre otras disciplinas que ha tenido un cierto impacto en la Psicología de la Personalidad Social y Cognitiva y que tiene un paralelismo importante en la obra constructivista de Piaget

Terapia narrativa basada en la atención

plena para la depresión Alberto Fernández Liria, 2013-12-02 Los seres humanos construimos sentido y significado a través de las historias que nos contamos a nosotros mismos o a otros sobre nuestra experiencia En la Terapia Narrativa Basada en

la Atención Plena entendemos el proceso terapéutico como una conversación entre terapeuta y paciente que facilita la evolución de los significados narrativos. Para el caso de la depresión, esos significados están contruidos en torno a la pérdida y la autodesvalorización. Terapeuta y paciente conversan desde la narrativa inicial del paciente sobre el argumento dominante de su historia. Y lo hacen desde diferentes perspectivas. Desde una perspectiva de primera persona trabajando con las emociones o las sensaciones corporales, la valoración biográfica o el autodiálogo interno. Desde una perspectiva de segunda persona cuando lo que trae el consultante es un duelo, una descalificación en las relaciones o algo que tiene que ver con la relación terapéutica. Y desde una perspectiva de tercera persona cuando lo que el paciente trae es una historia de sufrimiento anclada en las metanarrativas sociales o culturales dominantes que sostienen la desvalorización de la persona. La terapeuta ayuda a desarrollar ese trabajo con una actitud personal basada en la atención plena y entrena simultáneamente al consultante en esa misma actitud. De esa forma, la consultante puede ir contactando con su intención de traer la atención a la experiencia presente con aceptación libre de reacciones y de críticas de aquello que surja.
