Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 *Paradise Planned* is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United States and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature *Paradise Planned* is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape

Vernacular Architecture Newsletter, 2006 *Visual Art and the Urban Evolution of the New South* Deborah C. Pollack, 2015-01-18 *Visual Art and the Urban Evolution of the New South* recounts the enormous influence of artists in the evolution of six southern cities Atlanta Charleston New Orleans Louisville Austin and Miami from 1865 to 1950 In the decades following the Civil War painters sculptors photographers and illustrators in these municipalities employed their talents to articulate concepts of the New South aestheticism and Gilded Age opulence and to construct a visual culture far beyond providing pretty pictures in public buildings and statues in city squares As Deborah C Pollack investigates New South proponents such as Henry W Grady of Atlanta and other regional leaders she identifies cultural strivers philanthropists women's organizations entrepreneurs writers architects politicians and dreamers who united with visual artists to champion the arts both as a means of cultural preservation and as mechanisms of civic progress Aestheticism made popular by Oscar Wilde's southern tours during the Gilded Age was another driving force in art creation and urban improvement Specific art works occasionally precipitated controversy and incited public anger yet for the most part artists of all kinds were recognized as providing inspirational

incentives for self improvement civic enhancement and tourism art appreciation and personal fulfillment through the love of beauty Each of the six New South cities entered the late nineteenth century with fractured artistic heritages Charleston and Atlanta had to recover from wartime devastation The infrastructures of New Orleans and Louisville were barely damaged by war but their social underpinnings were shattered by the end of slavery and postwar economic depression Austin was not vitalized until after the Civil War and Miami was a post Civil War creation Pollack surveys these New South cities with an eye to understanding how each locale shaped its artistic and aesthetic self perception across a spectrum of economic political gender and race issues She also discusses Lost Cause imagery present in all the studied municipalities While many art history volumes concerning the South focus on sultry landscapes outside the urban grid Visual Art and the Urban Evolution of the New South explores the art belonging to its cities whether exhibited in its museums expositions and galleries or reflective of its parks plazas marketplaces industrial areas gardens and universities It also identifies and celebrates the creative urban humanity who helped build the cultural and social framework for the modern southern city

Across the Open Field Laurie Olin, 2012-09-07 Twenty eight years ago I went to England for a three month visit and rest What I found changed my life So begins this memoir by one of America's best known landscape architects Laurie Olin Raised in a frontier town in Alaska trained in Seattle and New York Olin found himself dissatisfied with his job as an urban architect and accepted an invitation to England to take a respite from work What he found in abundance was the serendipity of a human environment built over time to respond to the land's own character and to the people who lived and worked there For Olin the English countryside was a palimpsest of the most eloquent and moving sort yet whose manifestation was of ordinary buildings meant to shelter their inhabitants and further their work With evocative language and exquisite line drawings the author takes us back to his introduction to the scenes of English country towns their ancient universities meandering waterways and dramatic cloudscapes racing in from the Atlantic He limns the geologic histories found within the rock the near forgotten histories of place names and the recent histories of train lines and auto routes Comparing the growth of building in the English countryside Olin draws some sobering conclusions about our modern lifestyle and its increasing separation from the landscape As much a plea for saving the modern American landscape as it is a passionate exploration of what makes the English landscape so characteristically English *Across the Open Field* is an affectionate ramble through real places of lasting worth

Choice, 2007 *Journal of the New England Garden History Society*, 2001

A Life Spent Changing Places Lawrence Halprin, 2011-07-01 Landscape architect urban planner teacher and social visionary over the course of a sixty year career Lawrence Halprin 1916 2009 reshaped the spaces we inhabit and our ways of moving through them The New York Times called him the tribal elder of American landscape architecture and the critic Ada Louise Huxtable credited him with creating what may be one of the most important urban spaces since the Renaissance His bold use of abstract imagery could evoke the landscape of the American West in a sequence of city squares and fountains while his plan

for repurposing an abandoned factory near San Francisco's Fisherman's Wharf showed how adaptive use of a historic structure could turn commercial development into urban theater. A man who deeply loved cities he left as one of his most important legacies: the five thousand acres of coastline hedgerows and meadows that became Sonoma County's environmentally sensitive and enormously influential Sea Ranch. Featuring more than ninety black and white and one hundred color reproductions of photographs, plans, and sketchbooks, *A Life Spent Changing Places* is Halprin's own account of how a young boy who listened to the fireside chats of FDR on the radio became the man who designed the memorial to that president in the nation's capital. It is a book about the invention and reinvention of an extraordinary man over the span of decades and how he helped to reframe the world around him. **The Magazine Antiques**, 1982-10
