War And Change In World Politics:

War and Change in World Politics Robert Gilpin, 1981 Professor Gilpin uses history sociology and economic theory to identify the forces causing change in the world order *War and Change in World Politics* Robert Gilpin, 1981-10-30 War and Change in World Politics introduces the reader to an important new theory of international political change Arguing that the fundamental nature of international relations has not changed over the millennia Professor Gilpin uses history sociology and economic theory to identify the forces causing change in the world order The discussion focuses on the differential growth of power in the international system and the result of this unevenness A shift in the balance of power economic or military weakens the foundations of the existing system because those gaining power see the increasing benefits and the decreasing cost of changing the system The result maintains Gilpin is that actors seek to alter the system through territorial political or economic expansion until the marginal costs of continuing change are greater than the marginal benefits When states develop the power to change the system according to their interests they will strive to do so either by increasing economic efficiency and maximizing mutual gain or by redistributing wealth and power in their own favour **Power,**

Order, and Change in World Politics G. John Ikenberry, 2014-08-21 Are there recurring historical dynamics and patterns that can help us understand today's power transitions and struggles over international order What can we learn from the past Are the cycles of rise and decline of power and international order set to continue Robert Gilpin's classic work War and Change in World Politics offers a sweeping and influential account of the rise and decline of leading states and the international orders they create Now some thirty years on this volume brings together an outstanding collection of scholars to reflect on Gilpin's grand themes of power and change in world politics The chapters engage with theoretical ideas that shape the way we think about great powers with the latest literature on the changing US position in the global system and with the challenges to the existing order that are being generated by China and other rising non Western states

International Relations Theory and the End of the Cold War Richard Ned Lebow, Thomas Risse-Kappen, 1995 This controversial set of essays evaluates and extends international relations theory in light of the revolutionary events of past years The contributors demonstrate how theoretical constructs did not anticipate Soviet foreign policies that led to the end of the Cold War **New Thinking In International Relations Theory** Michael W Doyle, G. John Ikenberry, 2018-06-26 This

book of ten original essays provides a showcase of currently diverse theoretical agendas in the field of international relations Contributors address the theoretical analysis that their perspective brings to the issue of change in global politics Written for readers with a general interest in and knowledge of world affairs New Thinking in International Relations Theory can also be assigned in international relations theory courses The volume begins with an essay on the classical tradition at the end of the Cold War Essays explore work outside the mainstream such as Jean Bethke Elshtain on feminist theory and James Der Derian on postmodern theory as well as those developing theoretical advances within traditional realms from James DeNardo's

formal modeling to the more descriptive analyses of Miles Kahler and Steve Weber Other essays include Matthew Evangelista on domestic structure Daniel Deudney on naturalist and geopolitical theory and Joseph Grieco on international structuralist theory

World Politics and the Evolution of War John J. Weltman, 1995 In this comprehensive study international relations scholar John Weltman explores the many roles of war in world politics With topics ranging from the development of strategic thought to the effects on war of political and technological change from the uses of force and threats of force to the uses of arms control from the prominence of war in history to its likely fate in the post Cold War world Weltman's analysis offers a detailed thoroughgoing and rigorous overview of the subject Throughout Weltman questions a number of widely held assumptions To the conventional argument that the number of players in the international system determines the incidence and character of war he responds with evidence that suggesting that the social material and intellectual context within which conflicts occur is far more influential Weltman also questions the prevailing wisdom that democracies are inherently peaceful and autocracies inherently warlike arguing instead that the propensity to wage war and the effects of war are largely the products of prevailing expectations whether or not war offers a means for the cheap easy and decisive accomplishment of a government's objectives And he criticizes the dominant view that conflict even violent conflict is psychologically abnormal Drawing upon the traditional distinction between wars of attrition and wars of annihilation Weltman sees the trend toward the former despite the anomalous Persian Gulf conflict as likely to continue While this trend does not suggest the end of warfare much less the end of history it does imply the localization of conflict and the minimization of the danger of global conflagration The new world order Weltman concludes will be far from peaceful but the conflicts that do arise will be slow burning and difficult to spread Outside intervention in these conflicts will be costly

The Brink of 2036: Why There Must Be a War in the Asia-Pacific Dr. Strobe Driver, 2024-01-05 War and conflict never occur in a vacuum as there are always signallers and events that indicate and then dictate the onset of an upheaval This has been true of relatively minor conflicts such as the Japan Russo War of 1904 1905 the Vietnam War 1963 1975 the Afghanistan War 2001 ongoing and the major total wars of World War One 1914 1918 and World War Two 1939 1945 There is a new and emerging war that is about to happen and its epicentre will be in the Asia Pacific and more specifically the historic contemporary and emerging issues associated with

China Taiwan tensions are a continuum and show no sign of abatement or downward moderation The signals are there and they consist of but are not limited to the historic baggage of China s ownership of Taiwan of this factor being rejected by consecutive governments of Taiwan China s increasing sclerotic irredentist demands and policies toward Taiwan the steadfastness of Taiwan s attempts at recognition as an independent cum sovereign entity other Asia Pacific and international actors attempting to intervene in the region and the uncertainties associated with who will help defend Taiwan All are signals Within them there is and remains a continuous rise in tensions of which and is held within the title of this book remains the tipping point of 2036 There are many reasons for this date to be used as a pivot point and they are explored in detail in the lead up to this date and whilst the outcome is due to current machinations not subsiding and will only continue to deteriorate the contention is and remains not whether a war will occur but when The magnitude of the war that will take place demands the inherent complexities be considered understood and explored in detail This book is a significant step in that direction

The ^AUnited States and the End of the Cold War John Lewis Gaddis, 1994-04-28 The Cold War ended with an exhilarating wave of events the toppling of the Berlin Wall the rise of the dissident poet Vaclav Havel the revolution in Romania Americans rejoiced at the dramatic conclusion of the long struggle But victories in wars hot or cold tend to unfocus the mind writes John Gaddis It can be a dangerous thing to have achieved one s objectives because one then has to decide what to do next In *The United States and the End of the Cold War* Gaddis provides a sharp focus on the long history of the Cold War shedding new light on its sudden ending as well as on what might come next In this provocative insightful book Gaddis offers a number of thoughtful essays on the history of international relations during the last half century His reassessments of important figures and themes from the Cold War are sometimes surprising For example he portrays John Foster Dulles and Ronald Reagan as far more flexible and perceptive statesmen than the missile toting caricatures depicted in editorial cartoons And he takes a second look at the importance of espionage and intelligence in Cold War history a field often left to buffs and spy novelists Most important he focuses on the central elements in superpower relations In an eloquent account of the American style of foreign policy in the twentieth century for instance he explores how Americans having learned the lesson of Adolf Hitler consistently equated the forms of foreign governments with their external behavior assuming that authoritarian states would be aggressive states He also analyzes the tectonics of Cold War history demonstrating how long term changes in international affairs and Soviet bloc countries built up pressures that led to the sudden earthquakes of 1989 And along the way Gaddis illuminates such topics as the role of morality in American foreign policy the relevance of nuclear weapons to the balance of power and the objectives of containment He even includes and criticizes an essay entitled *How the Cold War Might End* written before the dramatic events of recent years to demonstrate how quickly the tide of history can overwhelm contemporary analysis Gaddis concludes with a thoughtful consideration of the problems and forces at work in the post Cold War world Author of such works as *The Long Peace* and *Strategies of*

Containment John Lewis Gaddis is one of the leading authorities on postwar American foreign policy In these perceptive highly readable essays he provides a fresh assessment of the evolution of the Cold War and insight into the shape of things to come

International Relations Theory Mark V. Kauppi, Paul R. Viotti, 2019-08-27 Theory meets intellectual history in this new and expanded edition of International Relations Theory Long known for its concise presentation of the various images and interpretive understandings of how to approach the complexity of international politics this edition devotes a significant portion of the book to the intellectual precursors who have informed current perspectives on international relations The discussion moves well beyond the usual cannon of Thucydides Machiavelli and Hobbes by linking them and other writers to present day IR theory realism liberalism economic structuralism and English School images as well as constructivist feminist postmodern and critical theory lenses This unique approach enhances our abilities to think conceptually and critically not only about how our 21st century world of diverse state and non state actors works but also the implications of the changes we observe domestically and globally

Twilight of the Titans Paul K. MacDonald, Joseph M. Parent, 2018-04-15 In *Twilight of the Titans* Paul K MacDonald and Joseph M Parent examine great power transitions since 1870 to determine how declining powers choose to behave identifying the strong incentives to moderate their behavior when the hierarchy of great powers is shifting Challenging the conventional wisdom that such transitions push declining great powers to extreme measures this book argues that intimidation provocation and preventive war are not the only alternatives to the loss of relative power and prestige Using numerous case studies MacDonald and Parent show how declining states tend to behave the policy options they have how rising states respond to those in decline and what conditions reward particular strategic choices

Independent Ally Shannon Tow, 2017-03-20 Will regional powers in the Asia Pacific have to choose between China and the United States In *Independent Ally* Shannon Tow challenges this prevailing view She explores how one key regional power Australia has repeatedly developed a strong relationship with a rising power while simultaneously preserving its alliance with a dominant global power Far from being a dependent ally that simply follows the policies of its great and powerful friends Australia has consistently developed and pursued an independent foreign policy toward those great powers that have played an important role in shaping its destiny It has proactively negotiated the terms of its relationships with those powers in ways that have been mutually complementary and that have supported its strategic interests in regional order The extent to which Australia can do so in future relates directly to the findings and lessons this study provides Drawing on newly released archival material and interviews with prominent former policymakers this book examines how six different Australian Prime Ministers successfully navigated these great power relationships over the last century

International and Regional Security Benjamin Miller, 2016-11-10 This volume is a

collection of the best essays of Professor Benjamin Miller on the subjects of international and regional security The book analyses the interrelationships between international politics and regional and national security with a special focus on the sources of international conflict and collaboration and the causes of war and peace More specifically it explains the sources of intended and unintended great power conflict and collaboration The book also accounts for the sources of regional war and peace by developing the concept of the state to nation balance Thus the volume is able to explain the variations in the outcomes of great power interventions and the differences in the level and type of war and peace in different eras and various parts of the world For example the book s model can account for recent outcomes such as the effects of the 2003 American intervention in Iraq the post 2011 Arab Spring and the conflicts between Russia and Ukraine The book also provides a model for explaining the changes in American grand strategy with a special focus on accounting for the causes of the invasion of Iraq in 2003 Finally the book addresses the debate on the future of war and peace in the 21st century This book will be essential reading for students of international security regional security Middle Eastern politics foreign policy and IR

The Causes of War and the Spread of Peace Azar Gat, 2017-04-14 Azar Gat sets out to resolve one of the age old questions of human existence why people fight and can they stop Spanning warfare from prehistory to the 21st century the book shows that neither an irresistible drive nor a cultural invention deadly violence and warfare have figured prominently in our behavioural toolkit since the dawn of our species People have always alternated between cooperation peaceful competition and violence to attain evolution shaped human desires A marked shift in the balance between these options has occurred since the onset of the industrial age Rather than modern war becoming more costly it hasn t it is peace that has become more rewarding Scrutinizing existing theories concerning the decline of war such as the democratic peace and capitalist peace Gat shows that they in fact partake of a broader Modernization Peace that has been growing since 1815 By now war has disappeared within the world s most developed areas Finally Gat explains why the Modernization Peace has been disrupted in the past as during the two World Wars and how challenges to it may still arise They include claimants to alternative modernity such as China and Russia anti modernists and failed modernizers that may spawn terrorism potentially unconventional While the world has become more peaceful than ever before there is still much to worry about in terms of security and no place for complacency

Avoiding War, Making Peace Richard Ned Lebow, 2017-08-23 This book recapitulates and extends Ned Lebow s decades long research on conflict management and resolution It updates his critique of conventional and nuclear deterrence analysis of reassurance and the conditions in which international conflicts may be amenable to resolution or failing that a significant reduction in tensions This text offers a holistic approach to conflict management and resolution by exploring interactions among deterrence reassurance and diplomacy and how they might most effectively be staged and combined

War and the Transformation of Global Politics V. Jabri, 2007-01-31 Drawing on critical social and political thought the book explores the implications arguing that late modern wars often referred to as liberal may be interpreted as perpetuating forms of exclusion and domination that render war a tool of control now articulated in global terms Crisis and Change in Post-Cold War Global Politics Erica Resende, Dovilė Budrytė, Didem Buhari-Gulmez, 2018-05-02 This volume analyzes crises in International Relations IR in an innovative way Rather than conceptualizing a crisis as something unexpected that has to be managed the contributors argue that a crisis needs to be analyzed within a wider context of change when new discourses are formed communities are re built and new identities emerge Focusing on Ukraine the book explore various questions related to crisis and change including How are crises culturally and socially constructed How do issues of agency and structure come into play in Ukraine Which subjectivities were brought into existence by Ukraine crisis discourses Chapters explore the participation of women in Euromaidan identity shifts in the Crimean Tatar community and diaspora politics discourses related to corruption anti Soviet partisan warfare and the annexation of Crimea as well as long distance impacts of the crisis
