Trials and Tribulations of International Prosecution Henry F. Carey, Stacey M. Mitchell, 2013-02-14 There have been many political dilemmas that impose structural constraints on the effort to legalize judicialize and criminalize normatively deviant behavior in international politics The annual costs of these tribunals has peaked at approximately 400 million of which 140 million is allocated to the ICC the latter now having spent 1 billion in its first decade of existence What has been the track record of these international criminal courts with jurisdiction to try heads of states and leading official and military officers Has the domestic political will of states increased to prosecute their own leaders following the ICC's complimentary jurisdiction How have powerful states supported these courts and how have they undermined them In succeeding in punishing a number of

high profile cases the tribunals arguably constitute what Habermas called communicative action that expresses the aspirations and nascent norms of international society Beyond the confines of a specific of international cooperation these courts are increasingly becoming norm entrepreneurs defining the norms of coexistence among states such that internal atrocities are seen not only as international crimes but threats to the stability and order of international society These courts are also redefining the attributes of what states must practice to preserve their reputations a breach of which will prove increasingly costly The tribunals are increasingly incentivizing and mobilizing informational networks from NGOs IGOs and states to document and publicize violations of international criminal law thereby increasing exposure risks of perpetration To be sure the patchwork of compliance and norm communication is fraught with double standards hypocrisy selective enforcement and neoimperial delegitimation of the subaltern Still what has begun as institutions created in the absence of humanitarian action by the powerful may come to constitute normal state attributes similar to sovereignty whose violation will be seen as not only illegitimate but also meriting humanitarian action to correct and punish such behavior The question remains whether ongoing impunity of both the powerful and the powerless will undermine or limit this potential

issue and must therefore be precisely placed within the context of the international law order. In particular it addresses the question of the specificity of the act and its relation to existing categories of international crime exploring the relationship between ethnic cleansing and genocide but also extending to war crimes and crimes against humanity. The book goes on to show how the current understanding of ethnic cleansing singularly fails to provide an efficient instrument for identification and argues that the act in having its own distinctive characteristics conditions and exigencies ought to be granted its own classification as a specific independent crime. *Ethnic Cleansing: A Legal Qualification* will be of particular interest to students and scholars of International Law and Political Science.

Hybrid Tribunals Aaron Fichtelberg, 2015-06-09 This book examines hybrid tribunals created in Sierra Leone, Kosovo, Cambodia, East Timor and Lebanon in terms of their origins, the political and social forces that led to their creation, the legal regimes that they used, their various institutional structures and the challenges that they faced during their operations. Through this study, the author looks at both their successes and their shortcomings and presents recommendations for the formation of future hybrid tribunals. Hybrid tribunals are a form of international justice where the judicial responsibility is shared between the international community and the local state where they function. These tribunals represent an important bridge between traditional international courts like the International Criminal Court (ICC), the International Criminal Tribunal for the Former Yugoslavia (ICTY), the International Criminal Tribunal for Rwanda (ICTR) and various local justice systems. Because hybrid tribunals are developed in response to large scale atrocities, these courts are properly considered part of the international criminal justice system. This feature gives hybrid tribunals the accountability and legitimacy often lost in local justice systems; however, by including regional courtroom procedures and personnel, they are integrated into the local justice system in a way that allows a society to deal with its criminals on its own terms, at least in part. This unique volume combines historical and legal analyses of these hybrid tribunals, placing them within a larger historical, political and legal context. It will be of interest to researchers in Criminal Justice, International Studies, International Law and related fields.

Transitional Justice in Nepal Yvette Selim, 2018-06-27 The conflict in Nepal, 1996-2006, resulted in an estimated 15,000 deaths, 1,300 disappearances along with other serious human rights and humanitarian law violations. Demands for peace, democracy, accountability and development have abounded in the post-conflict context. Although the conflict catalysed major changes in the social and political landscape in Nepal, the transitional justice (TJ) process has remained deeply contentious and fragmented. This book provides an in-depth analysis of the transitional justice process in Nepal. Drawing on interviews with a diverse range of stakeholders including victims, ex-combatants, community members, human rights advocates, journalists and representatives from diplomatic missions, international organisations and the donor community, it reveals the differing viewpoints, knowledge, attitudes and preferences about TJ and other post-conflict issues in Nepal. The author develops an actor typology and an action spectrum which can be used in Nepal and other post-conflict contexts. The actor typology identifies four main groups of TJ actors: experts, brokers,

implementers and victims and highlights who is making claims and on behalf of whom The action spectrum based on contentious politics literature and resistance literature demonstrates the strategies actors use to shape the TJ process This book argues that the potential of TJ lies in these dynamics of contention It is by letting these dynamics play out that different conceptualisations of TJ can arise While doing so may lead to practical challenges and produce situations that are normatively undesirable for some actors particularly when certain political parties and national actors seem to hijack TJ remaining steadfast to the dominant TJ paradigm is also undesirable As the first book to provide a single case study on TJ in Nepal it makes theoretical and empirical contributions to TJ research in Nepal and the Asia Pacific more broadly the politics versus justice binary and the concept of victimhood among others It will be of interest to a wide range of scholars in the study of transitional justice peace and conflict studies human rights sociology political science criminology law anthropology and South Asian Studies as well as policy makers and NGOs
