Reid, 2012-04-16 This book examines the role of war in shaping the African state society and economy by tracing shifts in the culture and practice of war **The Real Politics of the Horn of Africa** Alex de Waal, 2015-10-19 The Real Politics of the Horn of Africa delves into the business of politics in the turbulent war torn countries of north east Africa It is a contemporary history of how politicians generals and insurgents bargain over money and power and use of war to achieve their goals Drawing on a thirty year career in Sudan Ethiopia Eritrea and Somalia including experience as a participant in high level peace talks Alex de Waal provides a unique and compelling account of how these countries leaders run their governments conduct their business fight their wars and occasionally make peace De Waal shows how leaders operate on a business model securing funds for their political budgets which they use to rent the provisional allegiances of army officers militia commanders tribal chiefs and party officials at the going rate This political marketplace is eroding the institutions of government and reversing statebuilding and it is fuelled in large part by oil exports aid funds and western military assistance for counter terrorism and peacekeeping The Real Politics of the Horn of Africa is a sharp and disturbing book with profound implications for international relations development and peacemaking in the Horn of Africa and beyond *Africa and the Indian Ocean World from Early Times to Circa 1900 , Politics and Violence in Eastern Africa* David M. Anderson, Øystein H. Rolandsen, 2017-10-02 Over the fifty years between 1940 and 1990 the countries of eastern Africa were embroiled in a range of debilitating and destructive conflicts starting with the wars of independence but then incorporating rebellion secession and local insurrection as the Cold War replaced

colonialism The articles gathered here illustrate how significant widespread and dramatic this violence was In these years violence was used as a principal instrument in the creation and consolidation of the authority of the state and it was also regularly and readily utilised by those who wished to challenge state authority through insurrection and secession Why was it that eastern Africa should have experienced such extensive and intensive violence in the fifty years before 1990 Was this resort to violence a consequence of imperial rule the legacy of oppressive colonial domination under a coercive and non representative state system Did essential contingencies such as the Cold War provoke and promote the use of violence Or was it a choice made by Africans themselves and their leaders a product of their own agency This book focuses on these turbulent decades exploring the principal conflicts in six key countries Kenya Uganda Sudan Ethiopia Somalia and Tanzania This book was published as a special issue of the Journal of Eastern African Studies

McDougal, 2017 Why do some rebel insurgencies target cities as economic prey whilst others are content to trade with them This volume examines how the trade networks underpinning the economic relationship between rural and urban areas differ in their impact on and response to the combat frontier The Challenge of Stability and Security in West Africa Alexandre Marc, Neelam Verjee, Stephen Mogaka, 2015-06-19 Since independence the West African sub region has been an arena for a number of large scale conflicts

and civil wars as well as simmering and low intensity uprisings. Contrary to perceptions, West Africa in its post independence history has experienced fewer conflict events and fatalities from conflict than the other sub regions on the continent. The turn of the millennium has witnessed the recession of large scale and conventional conflict and it has ushered in new and emerging threats. The specters of religious extremism, maritime piracy and narcotics trafficking threaten to undermine some of the progress achieved in recent years. *The Challenge of Stability and Security in West Africa* critically examines the key drivers of conflict and violence and the way in which they impact the countries of the sub region. In addition to emerging threats, these drivers include the challenges of youth inclusion, migration, sub regional imbalances and extractives as well as challenges related to the fragility of political institutions and managing the competition for power, reform of the security sector and weakness of institutions related to land management. The book explores how the sub region under the auspices of the regional organization ECOWAS has become a pioneer on the continent in terms of addressing regional challenges. *The Challenge of Stability and Security in West Africa* also identifies key lessons in the dynamics of resilience in the face of political violence and civil war drawn from Côte d'Ivoire, Liberia and Sierra Leone that can be useful for countries around the world in similar situations. It incorporates knowledge and findings from leading experts and provides insights from academics and development practitioners. Finally, the book identifies possible policy and programmatic responses and directions for policy dialogue at the national and international levels. [Africa since 1940](#) Frederick Cooper, 2019-07-04. A history of decolonisation and independence, this text helps students understand how Africa's global position has emerged since 1940.

The Fabric of Peace in Africa Pamela Aall, Chester A. Crocker, 2017-06-05. Africa has experienced dozens of conflicts over a variety of issues during the past two decades. Responding to these conflicts requires concerted action to manage the crises, the violence, the political discord and the humanitarian consequences of prolonged fighting. It is also necessary to address the long term social and economic impacts of conflict to rebuild communities, societies and states that have been torn apart. To accomplish this requires the involvement of institutions and groups rarely considered in formal official African conflict management activities: schools, universities, religious institutions, media, commercial enterprises, legal institutions, civil society groups, youth, women and migrants. These groups and organizations have an important role to play in building a sense of identity, fairness, shared norms and cohesion between state and society, all critical components of the fabric of peace and security in Africa. This volume brings together leading experts from Africa, Europe and North America to examine these critical social institutions and groups and consider how they can either improve or impede peaceful conflict resolution. The overarching questions that are explored by the authors are: What constitutes social cohesion and resilience in the face of conflict? What are the threats to cohesion and resilience? And how can the positive elements be fostered and by whom? The second of two volumes on African conflict management capacity by the editors *The Fabric of Peace in Africa*. Looking beyond the State opens new doors of understanding for students, scholars and practitioners focused on strengthening peace in Africa.

the first volume *Minding the Gap African Conflict Management in a Time of change* focused on the role of mediation and peacekeeping in managing violence and political crises

Violence in African Elections Mimmi Söderberg Kovacs, Jesper Bjarnesen, 2018-04-15

Multiparty elections have become the bellwether by which all democracies are judged and the spread of these systems across Africa has been widely hailed as a sign of the continent's progress towards stability and prosperity. But such elections bring their own challenges particularly the often intense internecine violence following disputed results. While the consequences of such violence can be profound undermining the legitimacy of the democratic process and in some cases plunging countries into civil war or renewed dictatorship little is known about the causes. By mapping analysing and comparing instances of election violence in different localities across Africa including Kenya Ivory Coast and Uganda this collection of detailed case studies sheds light on the underlying dynamics and sub national causes behind electoral conflicts revealing them to be the result of a complex interplay between democratisation and the older patronage based system of Big Man politics. Essential for scholars and policymakers across the social sciences and humanities interested in democratization peace keeping and peace studies *Violence in African Elections* provides important insights into why some communities prove more prone to electoral violence than others offering practical suggestions for preventing violence through improved electoral monitoring voter education and international assistance.
