Wars Of Ideas And The War Of Ideas:

Wars of Ideas and the War of Ideas Antulio Echevarria II, 2008-06-30 Despite widespread emphasis on the importance of winning the war of ideas in recent strategic literature we find few analytical studies of wars of ideas as such With that in mind this monograph offers a brief examination of four common types of wars of ideas and uses that as a basis for analyzing how the United States and its allies and strategic partners might proceed in the current war of ideas Scoping the Problem Simply put a war of ideas is a clash of visions concepts and images and especially the interpretation of them They are indeed genuine wars even though the physical violence might be minimal because they serve a political socio cultural or economic purpose and they involve hostile intentions or hostile acts Wars of ideas can assume many forms but they tend to fall into four general categories though these are not necessarily exhaustive a intellectual debates b ideological wars c wars over religious dogma and d advertising campaigns All of them are essentially about power and influence just as with wars over territory and material resources and their stakes can run very high indeed Intellectual Debates are disputes in which opposing sides advance their arguments support them with evidence and endeavor to refute the reasoning and conclusions of the other Examples include the ongoing debate between Pro Choice and Pro Life advocates and the recent dispute between the theories of intelligent design and evolution Ideological Wars are a clash of broad visions usually organized around a doctrine whether secular or non secular The most popular example of an ideological conflict is the Cold War which involved political economic and military competition between the United States and the Soviet Union and their respective allies Disputes over Religious Dogma are a form of intellectual debate but they center on conflicting interpretations of sacred tenets or texts the access to which can be and often is deliberately restricted or otherwise limited Examples include the Sunni Shiite split within Islam and Catholicism s East West schism Advertising Campaigns are contests between competing producers or vendors for market share The objective of such campaigns is to persuade audiences to take desired actions such as voting for a particular candidate visiting a certain place or buying a specific product A classic example is the Cola Wars between Coca Cola and Pepsi Cola Inconclusive outcomes are not unusual in wars of ideas Opposing sides seldom change their positions based on the introduction of new evidence or new ways of evaluating existing evidence Thus wars of ideas are rarely settled on the merits of the ideas themselves Instead they tend to drag on unless an event occurs that causes the belligerents to focus their attention elsewhere When conclusive outcomes do occur they tend to follow the physical elimination or marginalization of one side s key proponents In other cases a major event such as the collapse of the Soviet Union might occur that renders one side incapable of continuing the conflict or campaign Thus physical events whether designed or incidental are in some respects more important to the course and outcome of a war of ideas than the ideas themselves

Wars of Ideas and the War of Ideas ,2008 Despite widespread emphasis on the importance of winning the war of ideas in recent strategic literature one finds few analytical studies of wars of ideas as such With that in mind this

monograph offers a brief examination of four common types of wars of ideas and uses that as a basis for analyzing how the United States and its allies and strategic partners might proceed in the current war of ideas Simply put a war of ideas is a clash of visions concepts and images and especially the interpretation of them They are indeed genuine wars even though the physical violence might be minimal because they serve a political socio cultural or economic purpose and they involve hostile intentions or hostile acts Wars of ideas can assume many forms but they tend to fall into four general categories though these are not necessarily exhaustive 1 intellectual debates 2 ideological wars 3 wars over religious dogma and 4 advertising campaigns All of them are essentially about power and influence just as with wars over territory and material resources and their stakes can run very high indeed An analytical study of wars of ideas to the extent they are wars would enhance one's understanding of such conflicts and how they might be approached With that in mind this monograph which is necessarily limited in scope does two things First it offers a brief examination of what appear to be the four basic types of wars of ideas found in history Second it uses that examination as a start point for analyzing the principal approaches in the current war of ideas

Wars of Ideas and the War of Ideas Antulio J. Echevarria (II), Antulio Joseph Echevarria, 2008 The author discusses several types of wars of ideas in an effort to achieve a better understanding of what wars of ideas are That knowledge in turn can help inform strategy It is important to note for instance that because ideas are interpreted subjectively it is not likely that opposing parties will win each other over by means of an ideational campaign alone Hence physical events whether intended or incidental typically play determining roles in the ways wars of ideas unfold and how or whether they are ended Thus while the act of communicating strategically remains a vital part of any war of ideas we need to manage our expectations as far as what it can accomplish

War and Ideas John Mueller, 2013-09-13 This book collects the key essays together with updating notes and commentary of Professor John Mueller on war and the role of ideas and opinions Mueller has maintained that war and peace are in essence merely ideas and that war has waned as the notion that peace is a decidedly good idea has gained currency The first part of the book extends this argument noting that as ideas have spread war is losing out not only in the developed world but now in the developing one and that even civil war is in marked decline It also assesses and critiques theories arguing that this phenomenon is caused by the rising acceptance of democracy and capitalism The second part argues that the Cold War was at base a clash of ideas that were seen to be threatening not of arms balances domestic systems geography or international structure It also maintains that there has been a considerable tendency to exaggerate security threats currently in particular the one presented by international terrorism and to see them in excessively military terms The third section deals with the role public opinion plays in foreign policy and argues that many earlier conclusions about opinion during the Korean and Vietnam Wars including especially ones concerning the importance of casualties in determining popular support for war apply to more recent military ventures in the Persian Gulf Bosnia Iraq and Afghanistan It also assesses the difficulties leaders and idea entrepreneurs often encounter when they try to manage or

manipulate public opinion This book will be of much interest to students of international relations security studies foreign policy and international history Fighting the War of Ideas Like a Real War J. Michael Waller, 2007 This ground breaking monograph departs from the conventional view of public diplomacy and international communication in time of war and argues for deploying messages as weapons of attack against the terrorists and other extremists Proposing an immedia

The War of Ideas Walid Phares, 2025-04-16 From Afghanistan and Iraq to Europe and the United States we are engaged in one of the most heated wars of all time In this incisive new book the man that has been called the only one to understand the mind of the jihadist shows that the most important battle is actually taking place in the hearts and minds of the world s population This is the war of ideas where ideology is the most powerful weapon of all Phares explores the beliefs of two opposing camps one standing for democracy and human rights and the other rejecting the idea of an international community and calling for jihad against the West He reveals the strategies of both sides explaining that new technologies and the growing media savvy of the jihadists have raised the stakes in the conflict And most urgently he warns that the West is in danger of losing the war for whereas debate and theorizing rarely translate into action here ideas and deeds are inextricably linked for the forces of jihad *Cultural Intelligence for Winning the Peace* Juliana Geran Pilon, 2009-09-01 **Wars of**

War at a Distance Mary A. Favret, 2009-10-19 What does it mean to live during wartime away from the battle zone What is it like for citizens to go about daily routines while their country sends soldiers to kill and be killed across the globe Timely and thought provoking *War at a Distance* considers how those left on the home front register wars and wartime in their everyday lives particularly when military conflict remains removed from immediate perception available only through media forms Looking back over two centuries Mary Favret locates the origins of modern wartime in the Napoleonic era and describes how global military operations affected the British populace as the nation's army and navy waged battles far from home for decades She reveals that the literature and art produced in Britain during the late eighteenth and early nineteenth centuries obsessively cultivated means for feeling as much as understanding such wars and established forms still relevant today Favret examines wartime literature and art as varied as meditations on the Iliad the history of meteorology landscape painting in India and popular poetry in newspapers and periodicals she locates the embedded sense of war and dislocation in works ranging from Austen Coleridge and Wordsworth to Woolf Stevens and Sebald and she contemplates how literature provides the public with methods for responding to violent calamities happening elsewhere Bringing to light Romanticism's legacy in reflections on modern warfare this book shows that war's absent presence affects home in deep and irrevocable ways

War and Ideas John Mueller, 2013-09-13 This book collects the key essays together with updating notes and commentary of Professor John Mueller on war and the role of ideas and opinions Mueller has maintained that war and peace are in essence merely ideas and that war has waned as the notion that peace is a decidedly good idea has gained currency The first part of the book extends this argument noting that as ideas have spread war is losing out not only in the developed world but now in the developing one and that even civil war is in marked decline It also assesses and critiques theories arguing that this phenomenon is caused by the rising acceptance of democracy and or capitalism The second part argues that the Cold War was at base a clash of ideas that were seen to be threatening not of arms balances domestic systems geography or international structure It also maintains that there has been a considerable tendency to exaggerate security threats currently in particular the one presented by international terrorism and to see them in excessively military terms The third section deals with the role public opinion plays in foreign policy and argues that many earlier conclusions about opinion during the Korean and Vietnam Wars including especially ones concerning the importance of casualties in determining popular support for war apply to more recent military ventures in the Persian Gulf Bosnia Iraq and Afghanistan It also assesses the difficulties leaders and idea entrepreneurs often encounter when they try to manage or manipulate public opinion This book will be of much interest to students of international relations security studies foreign policy and international history

The New Age, 1920 **Political Philosophy in Japan** Christopher

Goto-Jones,2009-01-30 Political Philosophy in Japan focuses on the politics of Japan's pre eminent philosophical school the Kyoto School and particularly that of its founder Nishida Kitar 1870 1945 Existing literature on Nishida is dismissive of there being serious political content in his work and of the political stance of the wider school Goto Jones contends that far from being apolitical Nishida's philosophy was explicitly and intentionally political and that a proper political reading of Nishida sheds new light on the controversies surrounding the alleged complicity of the Kyoto School in Japanese ultra nationalism This book offers a unique and potentially controversial view of the subject of Nishida and the Kyoto School

Assessing War Leo J. Blanken,Hy Rothstein,Jason J. Lepore,2015-12-15 Today's protracted asymmetrical conflicts confuse efforts to measure progress often inviting politics and wishful thinking to replace objective evaluation In Assessing War military historians social scientists and military officers explore how observers have analyzed the trajectory of war in American conflicts from the Seven Years War through the war in Afghanistan Drawing on decades of acquired expertise the contributors examine wartime assessment in both theory and practice and through alternative dimensions of assessment such as justice and proportionality the war of ideas and economics This group of distinguished authors grapples with both conventional and

irregular wars and emerging aspects of conflict such as cyberwar and nation building that add to the complexities of the modern threat environment The volume ends with recommendations for practitioners on best approaches while offering sobering conclusions about the challenges of assessing war without politicization or self delusion Covering conflicts from the eighteenth century to today *Assessing War* blends focused advice and a uniquely broad set of case studies to ponder vital questions about warfare s past and its future The book includes a foreword by Gen George W Casey Jr USA Ret former chief of staff of the US Army and former commander Multi National Force Iraq

Clausewitz's Timeless Trinity Colin M. Fleming,2016-05-23 This is the first book to apply the Clausewitzian Trinity of passion chance and reason to the experience of real war It explores the depth and validity of the concept against the conflicts of former Yugoslavia wars thought to epitomise a post Clausewitzian age In doing so it demonstrates the timeless message of the Trinity but also ties the Trinitarian idea back into Clausewitz s political argument Intended to build on the existing corpus of scholarship this book differs from the existing literature in two ways By applying the Trinity to the wars of former Yugoslavia 1991 1995 it explores war at its micro foundations assessing the complex cause and effect nexus of reciprocity produced by actions between belligerents embroiled in dynamic competition perpetuated by their own interaction Providing valuable insights into the complexities of real war fuelled by passion undermined by chance and shaped by reason it is the first study to bridge the Clausewitzian world of theory with real experience Examining each part of the triad separately the book explores the multiple manifestations of hostility and chance before then assessing the influence of these elements on the policies of the belligerents as the war evolved

Ideas of Social Order in the Ancient World Vilho Harle,1998-03-25 Harle focuses on the perennial issue of social order by providing a comparative analysis of ideas on social order in the classical Chinese political philosophy the Indian epic and political literature Zoroastrianism Judaism the classical Greek and Roman political thought and early Christianity His analysis is based on the religious political and literary texts that represent their respective civilizations as both their major achievements and sources of shared values Harle maintains that two major approaches to establishing and maintaining social order exist in all levels and types of social relations moral principles and political power According to the principle oriented approaches social order will prevail if and when people follow strict moral principles According to the contending power oriented approach orderly relations can only be based on the application of power by the ruler over the ruled The principle oriented approaches introduce a comprehensive civil society of individuals the power oriented approaches give major roles to the city state its government and relationships between them The question of morality can be recognized also within the power oriented approaches which

either submit politics to morality or maintain that politics must be taken as nothing else than politics This book is a contribution to peace and international studies as well as political theory and international relations
