Watergate Primary Sources:

Using Internet Primary Sources to Teach Critical Thinking Skills in History Kathleen W. Craver, 1999-10-30 History teachers and school library media specialists will find this guide a valuable resource for creating technologically advanced resource based instructional units in American and World History in grades 7-12. It is filled with 150 recommended primary source Internet sites about history ranging from ancient civilizations to 1998 and is stocked with exciting, interesting and challenging questions designed to stimulate students' critical thinking skills. Dr. Craver, who maintains an award-winning interactive Internet database and conducts technology workshops for school library media specialists, provides an indispensable tool to enable students to make the best use of the Internet for the study of history. Each site is accompanied by a summary that describes its contents and usefulness to history teachers and school library media specialists. The questions that follow are designed specifically to stimulate critical thinking skills. Critical thinking skills are deemed essential for students if they are to succeed academically and economically in the twenty-first century. An annotated appendix of selected primary source databases includes the Internet addresses for 60 additional primary source sites. **Watergate and the Resignation of President Nixon** Christine Honders, 2018-07-15 Why did Richard Nixon become the first president to resign? Readers discover the answer to this question as they explore the political scandal known as Watergate. This complex topic is explained through accessible main text featuring annotated quotations from historians as well as historical figures and documents. Primary sources, enlightening sidebars and a detailed timeline provide additional information and context for readers looking for insight into this challenging time in American history. Watergate continues to influence how Americans view politics and politicians and a deeper understanding of why is crucial for the next generation of informed American citizens. *Using Internet Primary Sources to Teach Critical Thinking Skills in Government, Economics, and Contemporary World Issues* James M. Shiveley, Phillip J. VanFossen, 2001-09-30 Teachers of political science, social studies and economics as well as school library media specialists will find this resource invaluable for incorporating the Internet into their classroom lessons. Over 150 primary source Web sites are referenced and paired with questions and activities designed to encourage critical thinking skills. Completing the activities for the lessons in this book will allow students to evaluate the source of information, the content presented and its usefulness in the context of their assignments. Along with each Web site, a summary of the site's contents identifies important primary source documents such as constitutions, treaties, speeches, court cases, statistics and other official documents. The questions and activities invite the students to log on to the Web site, read the information presented, interact with the data and analyze it critically to answer such questions as: Who created this document? Is the source reliable? How is the information useful and how does it relate to present-day circumstances? If I were in this situation, would I have responded the same way as the person in charge? Strengthening these critical thinking skills will help prepare students for both college and career in the 21st century. **Dictionary of American History: Archival maps and**
