Parental Influence on Child Social and Emotional Functioning Xiaoqin Zhu,Diya Dou,Thanos Karatzias,Tan Tang,2024-03-20 Social and emotional functioning interpersonal interactions social adjustment emotional well being and mental health among children and adolescents has drawn growing attention from academics practitioners parents educators and policymakers Worldwide it is agreed that social

and emotional development is a result of individual context interactions. Particularly socialization perspectives regard parenting as the primary factor that shapes child and adolescent development to a large extent. Meanwhile the ecological perspective highlights the bi-directional nature of interactions between children and parents by which they affect each other. Parenting can be parents' active socialization actions that influence their children's development (i.e. parent effect); it can also be parents' reactions to their children's social and emotional functioning (i.e. child effect). *The Official Railway Guide*, 1897
