Walking Cities Quotidian Mobility Landscape:

Walking in Cities Evrick Brown, Timothy Shortell, 2016 Walking connects the rhythms of urban life to the configuration of urban spaces As the contributors and editors show in *Walking in Cities* walking also reflects the systematic inequalities that order contemporary urban life Walking has different meanings because it can be a way of temporarily taking possession of urban space or it can make the relatively powerless more vulnerable to crime The essays in *Walking in Cities* explore how walking intersects with sociological dimensions such as gender race and ethnicity social class and power Various chapters explore the flâneuse or female urban drifter in Tehran's shopping malls Hispanic neighborhoods in New York San Diego and El Paso and the intra neighborhood and inter class dynamics of gentrification in Greenpoint Brooklyn The essays in *Walking in Cities* provide important lessons about urban life

Everyday Globalization Timothy Shortell, 2016-03-10 *Everyday Globalization* is a micro sociological study of immigrant neighborhoods in Brooklyn and Paris Global flows of people bring together cultural practices from distant places and urban dwellers in global cities interpret the signs of collective identity in ascribing particular places as immigrant neighborhoods This book examines the spatial semiotics of identity in urban public space that make this possible Unlike other studies of globalization and cities this work brings together research on the social psychology of groups linguistic landscapes and quotidian mobility to explain how urban dwellers encounter cultural differences Signs of social identity are always interpreted in the context of group boundaries and the appropriation of public space The breadth of this analysis contributes to the literature in human geography on the meaningfulness of places This book will also be of interest to scholars and students in visual sociology In addition this research demonstrates an innovative method for studying everyday urban experience

Seeing Religion Roman Williams, 2015-05-13 The potential of visual research methods in the sociology of religion is vast but largely untapped This comes as a surprise however given the visual symbolic and material nature of religion and spirituality Evidence of religious faith and practice is materially present in everything from clothing and jewelry to artifacts found in people s homes and workplaces Not only is religion s symbolic and material presence palpable throughout society it also informs attitudes beliefs and behaviors of countless people worldwide Words and numbers approaches to social research however sometimes miss important dimensions of religion and spirituality in the contemporary world Seeing Religion is an invitation to a visual sociology of religion Contributors draw from their current research to discuss the application of visual methods to the study of religion and spirituality Each chapter stimulates the sociological imagination through examples of research techniques analytical approaches and methodological concerns

Landscapes of Mobility Jennifer Johung, 2016-04-22 Our world is unquestionably one in which ubiquitous movements of people goods technologies media money and ideas produce systems of flows Comparing case studies from across the world including those from Benin the United States India Mali Senegal Japan Haiti and Romania this book focuses on quotidian landscapes of mobility Despite their seemingly familiar and innocuous appearances these spaces exert tremendous control over our behavior and activities By examining and mapping the politics of place and motion this book analyzes human beings embodied engagements with their built world and provides diverse perspectives on the ideological and political underpinnings of landscapes of mobility In order to describe landscapes of mobility as a historically

socially and politically constructed condition the book is divided into three sections objects contacts and flows The first section looks at elements that constitute such landscapes including mobile bodies buildings and practices across multiple geographical scales As these variable landscapes are reconstituted under particular social economic ecological and political conditions the second section turns to the particular practices that catalyze embodied relations within and across such spaces Finally the last section explores how the flows of objects bodies interactions and ecologies are represented presenting a critical comparison of the means by which relations processes and exchanges are captured depicted reproduced and re embodied

Mobility Patterns and Urban Structure Paulo Pinho,Cecília Silva,2016-03-03 Despite extensive efforts to understand the overall effect of urban structure on the current patterns of urban mobility we are still far from a consensual perspective on this complex matter To help build agreement on the factors influencing travel behaviour this book discusses the influence of alternative urban structures on sustainable mobility Bringing together two existing and complementary methods to study the relationship between urban structure and mobility the authors compare two case studies with distinct urban structures and travel behaviour Copenhagen and Oporto Of particular concern is the influence of urban structure factors namely land use and transport system factors and motivational factors related to the social economic and cultural characteristics of the individual traveller The research presented in this book highlights the relevance of centrality in travel behaviour and in more sustainable travel choices Different operational forms of the centrality concept are revealed as important it is shown that more sustainable travel can be influenced by several urban structure factors and that no particular combination is required as long as a certain level of centrality is provided Finally the book concludes that urban structure can on the one hand constrain and on the other hand influence travel choice
