Cincinnati Magazine, 1983-05 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region *Taking The Road Less Traveled* Barry Allen Rosenfeld, 2008-11-21 A young man barely starting out in life is faced with a choice Marry the beguiling young widow he has just met in an Israeli kibbutz and become the father of her three children or return single to his empty life as a rabbinical student studying to be a Reform rabbi Although doubting the existence of God he believes that God is guiding him and he marries the young woman Thus begins his trip down the road less traveled that will take him back to the States where he experiences the psychedelic 60s back to Israel where he covers a very hot war while working for NBC television and on to Belize where he becomes a gentleman planter and developer of thousands of acres of bananas and citrus only to return once again to the States where he confronts a decision that will change his life forever Exam Schools Chester E. Finn, Jr., Jessica A. Hockett, 2012-09-16 An in depth look at academically selective public high schools in America What is the best education for exceptionally able and high achieving youngsters Can the United States strengthen its future intellectual leadership economic vitality and scientific prowess without sacrificing equal opportunity There are no easy answers but as Chester Finn and Jessica Hockett show for more than 100 000 students each year the solution is to enroll in an academically selective public high school Exam Schools is the first ever close up look at this small sometimes controversial yet crucial segment of American public education This groundbreaking book discusses how these schools work and their critical role in nurturing the country's brightest students The 165 schools identified by Finn and Hockett are located in thirty states plus the District of Columbia While some are world renowned such as Boston Latin and Bronx Science others are known only in their own communities The authors survey the schools on issues ranging from admissions and student diversity to teacher selection They probe sources of political support curriculum instructional styles educational effectiveness and institutional autonomy Some of their findings are surprising Los Angeles for example has no exam schools while New York City has dozens Asian American students are overrepresented but so are African American pupils Culminating with in depth profiles of eleven exam schools and thoughtful reflection on policy implications Finn and Hockett ultimately consider whether the country would be better off with more such schools At a time of keen attention to the faltering education system Exam
