War Is Not Inevitable On The Psychology Of War And Aggression:

War Is Not Inevitable Henri Parens, 2014-07-22 In 1932 Einstein asked Freud Is there any way of delivering mankind from the menace of war Freud answered that war is inevitable because humans have an instinct to self destroy a death instinct which we must externalize to survive But nearly four decades of study of aggression reveal that rather than being an inborn drive destructiveness is generated in us by experiences of excessive psychic pain In *War Is Not Inevitable On the Psychology of War and Aggression* Henri Parens argues that the death instinct based model of aggression can neither be proved nor disproved as Freud's answer is untestable By contrast the multi trends theory of aggression is provable and has greater heuristic value than does a death instinct based model of aggression When we look for causes for war we turn to history as well as national ethnic territorial and or political issues among many others but we also tend to ignore the psychological factors that play a large role Parens discusses such psychological factors that seem to lead large groups into conflict Central among these are the psychodynamics of large group narcissism Interactional conditions stand out hyper narcissistic large groups have in history caused much narcissistic injury to those they believe they are superior to But this is commonly followed by the narcissistically injured group's experiencing high level hostile destructiveness toward their injury perpetrator which in time will compel them to revenge Among groups that have been engaged in serial conflicts wars have followed from this psychodynamic narcissism based cyclicity Parens details some of the psychodynamics that led from World War I to World War II and their respective aftermath and he addresses how major factors that gave rise to these wars must can and have been counteracted In doing so Parens considers strategies by which civilization has and is constructively preventing wars as well as the need for further innovative efforts to achieve that end *Signs, Intentionality, and Imaginability* Horst Ruthrof, 2025-10-13 This book contains essays by Horst Ruthrof tracing the author's intellectual history from his encounter with literature to his critique of the philosophy of language If you have ever felt that our linguistic and philosophical approaches to language lack an explanation of what renders it so powerful you share the author's motivation for writing these essays With tools from Locke Kant Peirce and especially Husserl the author redefines natural language as a set of social instructions for schematically imagining and acting in a world and gradually identifies what grants natural language its power imaginability *UGC NET Paper II Psychology (Vol 4) Topic-wise Notes (English Edition) | A Complete Preparation Study Notes with Solved MCQs* Mr. Rohit Manglik, 2023-06-30 EduGorilla's UGC NET Paper II Psychology Vol 4 Study Notes are the best selling notes in the English edition Their content is well researched and covers all topics related to UGC NET Paper II Psychology Vol 4 The notes are designed to help students prepare thoroughly for their exams with topic wise notes that are comprehensive and easy to understand The notes also include solved multiple choice questions MCQs for self evaluation allowing students to gauge their progress and identify areas that require further improvement These notes include Topics such as Emerging Areas These notes are perfect for understanding the pattern and type of questions asked by

Chimpanzees, War, and History R. Brian Ferguson, 2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill
