The Vocation Lectures Hackett Classics:

The Vocation Lectures Max Weber, 2004-03-15 Originally published separately Weber's Science as a Vocation and Politics as a Vocation stand as the classic formulations of his positions on two related subjects that go to the heart of his thought the nature and status of science and its claims to authority and the nature and status of political claims and the ultimate justification for such claims Together in this volume these newly translated lectures offer an ideal point of entry into Weber's central project understanding how as Weber put it in the West alone there have appeared cultural manifestations that seem to go in the direction of universal significance and validity *The Vocation Lectures* Max Weber, David S. Owen, 2004-03-12 Originally published separately Weber's Science as a Vocation and Politics as a Vocation stand as the classic formulations of his positions on two related subjects that go to the heart of his thought the nature and status of science and its claims to authority and the nature and status of political claims and the ultimate justification for such claims Together in this volume these newly translated lectures offer an ideal point of entry into Weber's central project understanding how as Weber put it in the West alone there have appeared cultural manifestations that seem to go in the direction of universal significance and validity **The Interest in Disinterestedness** Pierre Bourdieu, 2024-07-04 A key feature of those who work for the state in the legal system and in public services is that they claim to be putting their own personal interests aside and working in a disinterested fashion for the public good But is disinterested behaviour possible Can law be treated as a set of universal rules that are independent of particular interests or is this mere ideology Is the state bureaucracy a universal class as Hegel thought or a structure that serves the interests of the dominant class as Marx claimed In his lecture courses at the Collège de France in 1987-88 and 1988-89 Pierre Bourdieu addressed these questions by examining the formation of the legal and bureaucratic fields characteristic of the modern state uncovering the historical and social conditions that enable a social group to form and find its own interests in the very fact of serving interests that go beyond it For a disinterested universe to emerge it needs both the invention of a public service or a spirit of service to the public cause and the creation of a social universe in which individuals can pursue a career devoted to public service and be rewarded for it In other words it requires a process of specialization whereby autonomous specific fields become established in the social cosmos within which a special kind of game that follows the rules of disinterest can be played out By reconstructing the conditions under which an interest in disinterestedness emerged Bourdieu sheds new light on the formation of the modern state and legal system and provides a fresh perspective on the many professions in modern societies that are oriented towards the service of the common good Political Entrepreneurship Josef Lentsch, 2018-11-20 This book demonstrates how political entrepreneurs entrepreneurially minded citizens who launch innovative political start-ups can drive political change Building on unique insights rich examples and personal stories of centrist political entrepreneurs distilled from 40 in-depth interviews the author guides readers through key stages of political entrepreneurship and shows

how to master them By equally highlighting successes and failures the book reveals how political entrepreneurs actually go about producing transformative political change In light of the populist challenge and the decline of traditional political parties the book also offers an entertaining backstage view and first hand insights into the successes of En Marche in France Ciudadanos in Spain NEOS in Austria and other centrist political startups It provides practical advice on how to learn from and replicate their successes Political practitioners and other politically interested readers will find a useful theory of Political Entrepreneurship what it is how it works and what its role is in 21st century democracies Most of all they will find essential reproducible tools and methods You have read a lot about startups in business but if you want to know how Silicon Valley style startups look in politics read this Its author is not only writing about political entrepreneurs he is one of them Ivan Krastev Chairman of the Centre for Liberal Strategies in Sofia and permanent Fellow at the Institute of Human Sciences in Vienna No one understands better what it takes to take a political start up from ideation to the parliament than Josef Lentsch In Political Entrepreneurship he combines first hand experience with a thoughtful review of what we know about entrepreneurship in the interest of society Johanna Mair Professor of Organization Strategy and Leadership at the Hertie School of Governance and Co Director Global Innovation for Impact Lab at Stanford University Josef Lentsch has produced a fascinating commanding guide to the new insurgent players shaking up traditional party systems and reinvigorating liberal politics Political Entrepreneurship is essential reading for anyone who wants to understand today s fragmented and disrupted European politics and the European politics of the future Jeremy Cliffe Charlemagne columnist The Economist The rarest of events has occurred a new political species has appeared in the European eco system the centrist political start up From Macron s En Marche in France to Spain s Ciudadanos a new type of political actor has emerged Few are better positioned to tell this Europe wide story than Josef Lentsch who has had a front seat view on this important political transformation that is shaking Europe A dramatic and important account Daniel Ziblatt Eaton Professor of Government Harvard University and co author of How Democracies Die The Routledge Handbook of Classics, Colonialism, and Postcolonial Theory Katherine Blouin, Ben Akrigg, 2024-07-29 This handbook explores the ways in which histories of colonialism and postcolonial thought and theory cast light on our understanding of the ancient Mediterranean world and the discipline of Classics utilizing a wide body of case studies and providing avenues for future research and discussion It brings together chapters by a wide international and intersectional range of scholars coming from a variety of backgrounds and sub disciplinary perspectives and from across the chronological and geographical scope of Classics Chapters cover the state of current research into ancient Mediterranean and South Central and West Asian histories They provide case studies to illustrate both how postcolonial thought has already illuminated our understanding of the ancient Mediterranean world and beyond as well as its potential for the future Chapters also provide opportunities for reflection on the current state of the discipline An introduction by the volume editors offers a survey of the development of postcolonial theory its relationship to other bodies of

theory and its connections to Classics Toward the end of the book three scholars with different career and disciplinary perspectives provide short reflections on the themes of the volume and the directions of future research The Routledge Handbook of Classics Colonialism and Postcolonial Theory offers an impressive collection of current research and thought on the subject for students and scholars in classical studies understood in its larger sense as well as in related disciplines such as Archaeology Ancient History Imperial History and the History of Colonialism Reception Studies and Museum Studies For anyone interested in classical antiquity it provides an engaging introduction to a potentially bewildering but ultimately vital and enriching body of thought and theory

Climate Change and the Future of Democracy R. S. Deese, 2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons

Liberal Education and Democratic Citizenship Michael H. McCarthy, 2024-06-10 In Liberal Education and Democratic Citizenship Michael H McCarthy carefully describes the many crises confronting American democracy and identifies their philosophical cultural and institutional origins He argues that a liberal education properly understood can address several of these crises effectively The book s successive chapters explore the sources areas and levels of division in contemporary America and show how they have created important disagreements about the major challenges we presently face and the credible solutions they require McCarthy articulates what a liberal education actually is and why it is vitally important for both our personal and civic lives He also clarifies the critical contrast between effective freedom the aim of a liberal education and the concepts of freedom within economic and political liberalism McCarthy addresses the distinctive educational challenges presented by modernity and post modernity their moral aspirations acute historical consciousness and passion for radical criticism as well as the traditional Tocqueville and contemporary William Galston and Charles Taylor discontents of American democracy A central part of the book s unfolding argument is the enduring cultural contrast between the principles and aspirations of civic republicanism and the imperial assumptions of economics This juxtaposition helps us to understand the power and limitations of the stories we Americans live by as well as the civic virtues we commonly need to create a free just and multi racial America These critical virtues McCarthy argues are the specific goal of a liberal and democratic education

Engineering and Philosophy Zachary Pirtle, David Tomblin, Guru Madhavan, 2021-05-14

Engineers love to build things and have an innate sense of wanting to help society. However, these desires are often not connected or developed through reflections on the complexities of philosophy, biology, economics, politics, environment, and culture. To guide future efforts and to best bring about human flourishing and a just world, *Engineering and Philosophy: Reimagining Technology and Progress* brings together practitioners and scholars to inspire deeper conversations on the nature and varieties of engineering. The perspectives in this book are an act of reimagination: how does engineering serve society, and in a vital sense, how should it? *Classics of Moral and Political Theory* Michael L. Morgan, 2011-09-15. The fifth edition of Michael L. Morgan's *Classics of Moral and Political Theory* broadens the scope and increases the versatility of this landmark anthology by offering new selections from Aristotle's *Politics*, Aquinas' *Disputed Questions on Virtue* and *Treatise on Law*, as well as the entirety of Locke's *Letter Concerning Toleration*, Kant's *To Perpetual Peace*, and Nietzsche's *On the Advantage and Disadvantage of History for Life*. *The Palgrave Handbook of Political Economy* Ivano Cardinale, Roberto Scazzieri, 2018-08-16. This book is a major contribution to the study of political economy. With chapters ranging from the origins of political economy to its most exciting research fields, this handbook provides a reassessment of political economy as it stands today whilst boldly gesturing to where it might head in the future. This handbook transcends the received dichotomy between political economy as an application of rational choice theory or as the study of the causes of societies' material welfare, outlining a broader field of study that encompasses those traditions. This book will be essential reading for academics, researchers, students, and anyone looking for a comprehensive reassessment of political economy. *Research Handbook on the Sociology of Knowledge* Fran Collyer, 2025-07-15. This timely Handbook celebrates and contributes to the recent revitalisation of the sociology of knowledge. A diverse group of leading experts from the global North and South provide a state-of-the-art overview of a field which is developing rapidly with the growth of poststructuralist, postcolonial, and feminist approaches. **Living under Post-Democracy** Caleb R. Miller, 2020-02-28. When money equates to power and the system is rigged in favor of wealthy elites, why do we still pretend we are living in a democracy? In *Living under Post Democracy*, Caleb R. Miller challenges us to admit what we already know: that most of us are effectively powerless over the political decisions that govern our lives. Instead, we should embrace a post-democratic view of politics, one which recognizes the way in which our political institutions fail both systematically and historically to live up to our democratic ideals while also acknowledging our tragic yet enduring attachment to them both. Offering a new framework for conceptualizing contemporary citizenship, Miller explores how a post-democratic perspective can help us begin to reorient ourselves in our paradoxical, fractured political landscape. This model of citizenship opens the possibility for a distinctly post-democratic approach to both political participation and political philosophy, treating them not as ways of affecting politics but as opportunities for therapeutically engaging with the ongoing challenges and inevitable frustrations of post-democratic life. This book is an excellent addition to courses on democratic theory as well as introductory courses to political theory. *Morphology, Neurogeometry, Semiotics*

Courting Science Damon V. Coletta, 2016-05-25 In *Courting Science* Damon Coletta offers a novel explanation for the decline of American leadership in world affairs Whether

the American Century ends sooner rather than later may depend on America's capacity for self reflection and ultimately self restraint when it comes to science technology and engineering Democracy's affinity for advanced technology has to be balanced against scientific research and progress as a global enterprise In an era of rising challengers to America's lead in the international order and an increasingly globalized civil society a Scientific State has a better chance of extending its dominance In order to draw closer to this ideal though the United States will have to reconsider its grand strategy It must have a strategy that scrutinizes how tightly it constrains how narrowly it directs and how far it trusts American scientists If given the opportunity scientists have the potential to lead a second American Century through domestic science and technology policy international diplomacy and transnational networks for global governance

Rebel Governance in the Middle East Ibrahim Fraihat,Abdalhadi Alijla,2023-10-14 This book uses the cases of Syrian factions in rebel held areas Hamas in the Gaza Strip Houthi in Yemen rebels in Libya Taliban in Afghanistan In Iraq and Somalia to explain the importance of examining genealogies tribalism common local knowledge and social networks in understanding the institutionalisation of armed group governance systems The book provides a series of studies employing heterogenous methodological approaches to address the issue using qualitative quantitative and mixed methods The proposed project also attempts to move away from the central debate on the national political crisis trend by examining the sub national level patterns and assessing various factors and questions that bring about clear answers regarding how de facto rulers use tribes and tribal informal institutions to sustain their presence and create a safe social incubator

The Lives of Guns Jonathan Obert,Andrew Poe,Austin Sarat,2018-09-03 Guns have never been as prevalent in American culture as they are at this moment Most contemporary conversations on guns either highlight the gun as just a tool used in mass killings or a right to be fiercely defended eventually whatever progress these debates foster in the public conversation tend to halt altogether once the old clich guns don't kill people people kill people is trotted out These gun control and gun violence discussions take the gun as passive object ignoring the changing effects and the very agency that guns may deploy as politicized objects What happens if we reset the conversation and admit that guns and not the people behind them kill people The Lives of Guns offers a new and compelling way of thinking about the role of the gun in our social and political lives In gathering ideas from law science studies sociology and politics each chapter turns the stale standard gun conversations around by investigating the gun as an object with agency In approaching guns from a technological perspective down to the very science of how they are created and how they fire The Lives of Guns takes up a number of questions such as How does the presence of these objects shape civic ideology What does it mean to develop and care for gun and gun accessories technology What do guns mean to those who build them versus those who fight for and against them What could happen when drone technology meets gun technology In bringing together fresh perspectives from leading lawyers political scientists and historians The Lives of Guns promises to move the gun debate forward by opening up new ways of thinking about these issues and broadening the scope

of these perennial debates **Anne Carson** Elizabeth Sarah Coles, 2023 The scene with which I begin this chapter is the kind of scene that interests Carson In the words of her Essay on What I Think About Most 1999 a disquisition on mistake in stanzas of unrhyming verse the wilful creation of error is the action of the master contriver the poet what Aristotle would call an imitator of reality Like the true mistakes of poetry the matter Carson confesses to think about most Streb's choreographed falls perform the conversion of human error into an art form Under the dancer's regime and by an extraordinary coup of artifice the emotions of mistake shame exposure thrill are handed to us putting our own contradictions and odd longings centre stage
