The Natural History of Sexuality in Early America Greta LaFleur, 2020-08-04 How natural history made sex scientific in the eighteenth century If sexology the science of sex came into being sometime in the nineteenth century then how did statesmen scientists and everyday people make meaning out of sex before that point In The Natural History of Sexuality in Early America Greta LaFleur demonstrates that eighteenth century natural history the study of organic life in its environment actually provided the intellectual foundations for the later development of the scientific study of sex Natural historians understood the human body to be a porous envelope eminently vulnerable to its environment Yet historians of sexuality have tended to rely on archival evidence of genital based or otherwise bodily sex acts for source material Through careful readings of both elite natural history texts and popular print

forms that circulated widely in the British North American colonies among them Barbary captivity execution cross dressing and anti vice narratives LaFleur traces the development of a broad knowledge of sexuality defined in terms of the dynamic relationship between the human and the natural social physical and climatic milieu At the heart of this book is the question of how to produce a history of sexuality for an era in which modern vocabularies for sex and desire were unavailable LaFleur demonstrates how environmental logic was used to explain sexual behavior on a broad scale not just among the educated elite who wrote and read natural historical texts LaFleur reunites the history of sexuality with the history of race demonstrating how they were bound to one another by the emergence of the human sciences Ultimately *The Natural History of Sexuality in Early America* not only rewrites all dominant scholarly narratives of eighteenth century sexual behavior but also poses a major intervention into queer theoretical understandings of the relationship between sex and the subject **A**

Companion to Museum Studies Sharon Macdonald, 2011-08-24 *A Companion to Museum Studies* captures the multidisciplinary approach to the study of the development roles and significance of museums in contemporary society Collects first rate original essays by leading figures from a range of disciplines and theoretical stances including anthropology art history history literature sociology cultural studies and museum studies Examines the complexity of the museum from cultural political curatorial historical and representational perspectives Covers traditional subjects such as space display buildings objects and collecting and more contemporary challenges such as visiting commerce community and experimental exhibition forms *The Heart of the Wild* Ben A. Minteer, Jonathan B. Losos Losos, 2024-08-13 Timely and provocative reflections on the future of the wild in an increasingly human world *The Heart of the Wild* brings together some of today's leading scientists humanists and nature writers to offer a thought provoking meditation on the urgency of learning about and experiencing our wild places in an age of rapidly expanding human impacts These engaging essays present nuanced and often surprising perspectives on the meaning and value of wildness amid the realities of the Anthropocene They consider the trends and forces from the cultural and conceptual to the ecological and technological that are transforming our relationship with the natural world and sometimes seem only to be pulling us farther away from wild places and species with each passing day The contributors make impassioned defenses of naturalism natural history and nature education in helping us to rediscover a love for the wild at a time when our connections with it have frayed or been lost altogether Charting a new path forward in an era of ecological uncertainty *The Heart of the Wild* reframes our understanding of nature and our responsibility to learn from and sustain it as the human footprint sinks ever deeper into the landscapes around us With contributions by Bill Adams Joel Berger Susan Clayton Eileen Crist Martha L Crump Thomas Lowe Fleischner Harry W Greene Hal Herzog Jonathan B Losos Emma Marris Ben A Minteer Kathleen Dean Moore Gary Paul Nabhan Peter H Raven Christopher J Schell Richard Shine and Kyle Whyte *Doing Museology Differently* Duncan Grewcock, 2013-09-05 One might believe that museum studies is a stable field of academic inquiry based on a set of familiar institutional forms and

functions But as institutions museums have never been stable or singular and neither has the discipline of museum studies Museum studies as a field of academic inquiry has received little critical attention One result of this neglect has arguably been a lack of invention in museum studies another is the distancing of academic museum studies from museum practice *Doing Museology Differently* charts a different course A critical creative reflection on academic practice the book takes the form of a narrative account of museological fieldwork A research story unfolds challenging academic conventions at the level of its own presentation the book combines critical museum visiting with an autobiographical voice The identification of a previously underexplored interdisciplinary space leads the author to experiment with museum studies using contemporary developments in the theory and practice of human geography The new approaches to museological research and representation that emerge from this unique inquiry challenge assumed institutional and intellectual boundaries and act as a call to further creative experimentation "The" Edinburgh Journal of Natural History, and of the Physical Sciences ,1840
