Jensen,1992 **Code of Accepted Farming Practice for the Welfare of Cattle (Victoria)** ,1997 **Information Resources on the Care and Welfare of Beef Cattle** Cynthia Petrie Smith,2004 One of the main animal welfare concerns in beef cattle production is that of pain and distress Dehorning castration and branding are husbandry procedures which can cause pain and discomfort Less acute but still distressful are those issues related to the animal environment Extreme natural conditions can result in cattle that are heat and or cold stressed Drought and the resulting overstocking for available feed resources can also reduce body fatness These are important welfare issues in modern beef production The following bibliography explores these issues and more and should provide a useful resource for scientists veterinarians extension specialists students and others *Nutrition and the Welfare of Farm Animals* Clive J. C. Phillips,2016-05-12 This book explores the importance of good nutrition in ensuring an adequate standard of welfare for farm animals It is often not realized that farm animals can suffer when they are fed unsuitable diets which may be because these diets are more economic or the farmer does not know how to rectify poor nutrition This book reveals how to recognize and deal with feeding problems in farm animals when the animal s behaviour is indicating a deficiency through oral stereotypies for example Feeding livestock in emergency situations can present special challenges and the availability of clean and potable water one of the essential components of life can also be an unrecognized problem for many farm animals Feeding farm animals effectively is rarely recognized for the major welfare issue that it is We may assume that animals in intensive husbandry conditions have adequate feed yet it is often too concentrated and designed primarily to immediately maximize production from the animals in the form of growth milk yield or reproduction In extensive rangeland conditions adequate

feed supply also cannot be assured potentially leading to undernutrition with serious consequences for the health and even survival of livestock This book will provide a much needed review of the relationships between nutrition and the welfare of farm animals *Code of Welfare* New Zealand.
