The Wollemi Pine James Woodford:

The Wollemi Pine James Woodford,2012-01-30 In mid 1994 a National Parks Wildlife ranger abseiling in the Wollemi Wilderness outside Sydney came upon an extraordinary sight a canyon filled with massive pines What he accidentally discovered has become one of the century s most important botanical finds The ancient pines were thought to have become extinct millions of years ago Great White James Woodford,2014-12-01 I remember thinking two things at the time Firstly if it had wanted to eat us we wouldn t have stood a chance and second it didn t want to eat us When James Woodford was confronted by half a dozen sharks swimming at full speed he froze in shock But he was even more surprised when they swam right past completely ignoring him He couldn t reconcile this experience with the mindless eating machines that dominate the discussion of sharks in Australia Interviewing world renowned experts and joining research teams at Neptune Islands one of the most famous shark aggregation locations in the world and consequently one of the most dangerous dive sites James investigates these intriguing creatures at close range and discovers their fascinating world **Real Dirt** James

Woodford,2008-09-29 Real Dirt is the true story of a sea change the life that led there and what you have to do to get where you want to be When James Woodford realised the greasy pole of big city ambition was not for him he focused on rediscovering the environmentalist within and getting his family out of the city How hard could it be *The Great Barrier Reef (Revised Edition)* James Woodford,2011-08-01 The real Great Barrier Reef is not just a single clown fish or a colony of branching stag horn coral It is not simply the crystal clear water cocktails and beautiful bodies of the tourist ads Nor is it just the stage for murders mishaps shipwrecks shark attacks crocodile death rolls or gropers that swallow men s heads whole and only sometimes spit them back out The real Great Barrier Reef is a living thing a 2300 kilometre long untamed organism made up of trillions of animals It is the magnificent and terrifying home to the wild things of nightmares and hallucinations James Woodford wanted to understand the real reef in all its complexity and along its entire extraordinary length For a year he worked and dived with marine biologists exploring it from the coral outpost of Lord Howe Island in the south to the crocodile haunted waters at the reef s northern boundary in Cape York The Great Barrier Reef is a thrilling study of the reef of its beauty mystery and terror as it faces its greatest threat rising sea temperatures that stem from global warming Part science part history part travel and wholly adventurous Woodford s book is as captivating grand and magical as the reef itself

Vanished Sadiya Qureshi,2025-06-05 A vital and important book David Olusoga From an award winning historian of race science and empire a path breaking and poignant history of extinction as a scientific idea an imperial legacy and a political choice Anyone alive today is among a tiny fraction of the once living over 90% of species that ever existed are now extinct How did we come to think of ourselves as survivors in a world where species can vanish forever or as capable of pushing our planet to the verge of a sixth mass extinction Extinction Sadiya Qureshi shows us is a surprisingly modern concept and a phenomenon that s not as natural as we might think In Europe until the late eighteenth century species were considered

perfect and unchanging creations of God Then in the age of revolutions scientists gathered enough fossil evidence to determine that mammoth bones for example were not just large elephants but a lost species that once roamed the Earth alongside ancient humans Extinction went from being regarded as theologically dangerous to pervasive and even inevitable Yet Vanished shows us that extinction is more than a scientific idea it s a political choice that has led to devastating consequences Europeans and Americans quickly used the notion that extinction was a natural process to justify persecution and genocide predicting that nations from Newfoundland s Beothuk to Aboriginal Australians were doomed to die out from imperial expansion Exploring the tangled and unnatural histories of extinction and empire Vanished weaves together pioneering original research and breath taking storytelling to show us extinction is both an evolutionary process and a human act one which illuminates our past and may alter our future

date the oldest living things on earth The new science of tree time prompted travelers to visit ancient specimens and conservationists to protect sacred groves Exploitation accompanied sanctification as old growth forests succumbed to imperial expansion and the industrial revolution Taking us from Lebanon to New Zealand to California Farmer surveys the complex history of the world s oldest trees including voices of Indigenous peoples religious figures and contemporary scientists who study elderflora in crisis In a changing climate a long future is still possible Farmer shows but only if we give care to young things that might grow old Winner of the 2023 Jacques Barzun Prize in Cultural History **Plant Talk** ,2000

The Dog Fence James Woodford,2013-06-18 An extraordinary and absorbing book about travel history and one of the loneliest environments in the world *The Dawn Of Life And Other Australian Tales* John Campbell Gardiner,2013 The dawn of life and other Australian tales Come take a time travelling magic carpet ride through the natural and cultural delights of Australia From west coast to east coast from Cape York to Tasmania this book uses the most up to date web resources and scientific papers to paint a many coloured portrait of this amazing continent **Australian Geographic** ,2005 **The Secret Life of Wombats** James Woodford,2012-01-30 Whitley Award winner for Best Popular Zoology Book With his usual brilliance James Woodford explores the wombat s bizarre evolutionary history and perilous future This is popular science writing at its best an irresistible subject in the hands of an irrepressible author *A Sense of Wonder Towards Nature* Haydn Washington,2018-08-06 Environmental scientist and writer Haydn Washington argues that we will not solve the environmental crisis unless we change our worldview and ethics and to do so we must rejuvenate our sense of wonder at nature This book focuses on humanity s relation with nature and the sense of wonder and belonging common to indigenous cultures and children everywhere Drawing on events in the author s own four decades working to protect wild places and the current literature on wonder it examines what a sense of wonder is what it has been called in different cultures and our high points of wonder at nature It also looks at the Great Divide in worldview between anthropocentrism and ecocentrism and considers the problem of anthropocentric theory in academia arguing that the focus should instead be on harmony with nature The book concludes with an examination of why wonder has become buried in Western society and considers ways in which it can be revived including rituals and education It also considers how wonder helps humanity to become whole The final chapter presents the road back to wonder and how wonder towards nature can be restored in Western society This book will be of great interest to environmental scientists conservation biologists environmental philosophers and ecological ethicists as well as environmentalists educators eco psychologists and students looking at sustainability deep ecology and environmental philosophy and ethics **Australia's Remarkable Trees** Richard Allen,2009 Elephantine Boabs dot the Kimberley region of Western Australia Cattle rub against giant Bottle Trees and Ironbarks in Queensland and Strangler Figs with 40 metre girths thrive in our northern rainforests Snow Gums and Shining Gums eke out their lives on our icy mountain tops and prehistoric looking Bunya Pines which once looked down on the dinosaurs grow in a few isolated places in Australia

s north east Australia s Remarkable Trees explores the extraordinary lives of fifty of Australia s oldest largest and most unusual trees Richly illustrated with more than 500 photographs writer Richard Allen and photographer Kimbal Baker went to the far reaches of Australia travelling more than 60 000 kilometres to photograph them and tell their stories Australia s Remarkable Trees is not just a celebration of Australia s great trees It also prompts us to look to the future to see what lies in store for them It is a call to arms to preserve and protect our oldest and most magnificent living things and the forests and wilderness in which they live Meanjin ,2000 The Old Country George Seddon,2005-10-04 We are a nation of gardeners and we take pleasure in tending our backyards But this pleasure sits uneasily with our knowledge that the places where most of us live are running out of water We suspect that our lawns and many of our plants from the damp climates of northern European gardens are too demanding of scarce supplies but can t imagine our streets and gardens without them The Old Country opens our eyes and minds to other possibilities It does so by telling us stories about our natural landscape George Seddon believes that the better we understand the delicacy and beauty of our natural environment the more at home we will feel as Australians This passionate wise and witty book enriched with breathtakingly beautiful illustrations suggests that the answers to our water problems lie here at home *Horseshoe Crabs and Velvet Worms* Richard Fortey,2012-04-10 From one of the world s leading natural scientists and the acclaimed author of Trilobite Life A Natural History of Four Billion Years of Life on Earth and Dry Storeroom No 1 comes a fascinating chronicle of life s history told not through the fossil record but through the stories of organisms that have survived almost unchanged throughout time Evolution it seems has not completely obliterated its tracks as more advanced organisms have evolved the history of life on earth is far older and odder than many of us realize Scattered across the globe these remarkable plants and animals continue to mark seminal events in geological time From a moonlit beach in Delaware where the hardy horseshoe crab shuffles its way to a frenzy of mass mating just as it did 450 million years ago to the dense rainforests of New Zealand where the elusive unprepossessing velvet worm has burrowed deep into rotting timber since before the breakup of the ancient supercontinent to a stretch of Australian coastline with stromatolite formations that bear witness to the Precambrian dawn the existence of these survivors offers us a tantalizing glimpse of pivotal points in evolutionary history These are not living fossils but rather a handful of tenacious creatures of days long gone Written in buoyant sparkling prose Horseshoe Crabs and Velvet Worms is a marvelously captivating exploration of the world s old timers combining the very best of science writing with an explorer s sense of adventure and wonder
