Trinity In Relation Creation Incarnation And Grace In An Evolving Cosmos:

Trinity in Relation Gloria L. Schaab, 2012 This book is about relations intimate relations that exist between all that is living between the cosmos and humanity between the cosmos and God and between God and humanity It is also about relations essential relations that exist within all that is living within an evolving cosmos within a developing humanity and within the living God It is moreover about relations that are fundamentally constitutive of cosmic human and divine being and thus provide a clue to the nature of reality itself Intro p 11

Reinventing Theology in Post-Genocide Rwanda Marcel Uwineza, Elisé Rutagambwa, Michel Segatagara Kamanzi, 2023 In the year 2019 Rwanda marked twenty five years after the genocide against the Tutsi Sadly Catholic priests and nuns were complicit or even participated in the killing of an estimated 800 000 ethnic Tutsis Thousands of people were slaughtered in Catholic Churches where they took refuge For example 5000 people are estimated to have been killed at the Ntarama Catholic Church in August 1994 In March of 2017 Pope Francis issued an apology remarking that the sins and failings of the Church and its members had disfigured the face of Catholicism This statement recognized that the Catholic Church's role in the genocide has implicated the entire Church and is an invitation to reimagine the very essence of the meaning of the Church theology in its multiple dimensions the missionary enterprise the mission of the Church and the place of human dignity in the Catholic faith The task of rethinking what it means to be the Church and restoring fraternal identity as Christians in post genocide Rwanda is thus crucial if theology is to make sense again This is particularly imperative in as much as theology is compelled to reflect upon the very evils that have disfigured the Church's image and people's identity namely the evils of sin suffering the indifference of bystanders the increasing number of genocide deniers the complexity of memory the lack of credible and prophetic leadership that invites a new way of thinking about theology This book brings together bishops theologians historians and other scholars to reflect on how the Rwandan Catholic Church can restore fundamental peace and rebuild lasting reconciliation

Worship and the New Cosmology Catherine Vincie, 2014 What is the Christian response to developments in the hard sciences What do discoveries at the macro and micro levels have to say about Christian theology about a theology of God Christology pneumatology and creation How do the developments in systematic theology that do take the advances in cosmology and the New Sciences seriously come to bear on our worship life These are the questions that are addressed in this text It is an initial effort to bring cosmology and the New Sciences into dialogue with developments in systematic and sacramental theology This book also suggests some ways in which these developments might appear in our worship Overall the author is concerned to reduce the cognitive dissonance between our scientifically informed everyday lives and our life of faith

Extraterrestrials in the Catholic Imagination Jennifer Rosato, Alan Vincelette, 2021-02-10 What do scientists know about the possibility of life outside our solar system How does Catholic science ction imagine such worlds What are the implications for Catholic thought This collection brings together leading scientists philosophers theologians and science fiction authors in

the Catholic tradition to examine these issues In the first section Christian scientists detail the latest scientific findings regarding the possibility of life on exoplanets The second part brings together leading Catholic science fiction authors who describe how alien life forms have been prevalent in the Catholic imagination from the Middle Ages right up to the present day In the final section Catholic philosophers and theologians examine the implications of discovering intelligent life elsewhere in the universe Rather than worrying that the discovery of intelligent extraterrestrials might threaten the dignity of humans or their existence the contributors here maintain that such creatures should be welcomed as fellow creatures of God and potential subjects of divine salvation Ask the Beasts: Darwin and the God of Love Elizabeth A.

Johnson,2014-01-16 For millennia plant and animal species have received little sustained attention as subjects of Christian theology and ethics in their own right Focused on the human dilemma of sin and redemptive grace theology has considered the doctrine of creation to be mainly an overture to the main drama of human beings relationship to God What value does the natural world have within the framework of religious belief The crisis of biodiversity in our day when species are going extinct at more than 1 000 times the natural rate renders this question acutely important Standard perspectives need to be realigned theology needs to look out of the window so to speak as well as in the mirror Ask the Beasts Darwin and the God of Love leads to the conclusion that love of the natural world is an intrinsic element of faith in God and that far from being an add on ecological care is at the centre of moral life The Routledge Handbook of Religion and Animal Ethics Andrew

Linzey,Clair Linzey,2018-09-29 The ethical treatment of non human animals is an increasingly significant issue directly affecting how people share the planet with other creatures and visualize themselves within the natural world The Routledge Handbook of Religion and Animal Ethics is a key reference source in this area looking specifically at the role religion plays in the formation of ethics around these concerns Featuring thirty five chapters by a team of international contributors the handbook is divided into two parts The first gives an overview of fifteen of the major world religions attitudes towards animal ethics and protection The second features five sections addressing the following topics Human Interaction with Animals Killing and Exploitation Religious and Secular Law Evil and Theodicy Souls and Afterlife This handbook demonstrates that religious traditions despite often being anthropocentric do have much to offer to those seeking a framework for a more enlightened relationship between humans and non human animals As such The Routledge Handbook of Religion and Animal Ethics is essential reading for students and researchers in religious studies theology and animal ethics as well as those studying the philosophy of religion and ethics more generally **Planetary Solidarity** Grace Ji-Sun Kim,Hilda P.

Koster,2017-08-23 Planetary Solidarity brings together leading Latina womanist Asian American Anglican American South American Asian European and African woman theologians on the issues of doctrine women and climate justice Because women make up the majority of the world s poor and tend to be more dependent on natural resources for their livelihoods and survival they are more vulnerable when it comes to climate related changes and catastrophes Representing a subfield of

feminist theology that uses doctrine as interlocutor this book ask how Christian doctrine might address the interconnected suffering of women and the earth in an age of climate change While doctrine has often stifled change it also forms the thread that weaves Christian communities together Drawing on postcolonial ecofeminist womanist analysis and representing different ecclesial and denominational traditions contributors use doctrine to envision possibilities for a deep solidarity with the earth and one another while addressing the intersection of gender race class and ethnicity The book is organized around the following doctrines creation the triune God anthropology sin incarnation redemption the Holy Spirit ecclesiology and eschatology

Preservation and Protest Ryan Patrick McLaughlin,2014-11-01 Preservation and Protest proposes a novel taxonomy of four paradigms of nonhuman theological ethics by exploring the intersection of tensions between value terms and teleological terms McLaughlin systematically develops the paradigm of cosmocentric transfiguration arguing that the entire cosmos shares in the eschatological hope of a harmonious participation in God s triune life With this paradigm McLaughlin offers an alternative to anthropocentric and conservationist paradigms within the Christian tradition an alternative that affirms both scientific claims about natural history and the theological hope for eschatological redemption

All God's Animals Christopher Steck,2019-10-01 The book is the first of its kind to draw together in conversation the views of the early Church contemporary biblical and theological scholarship and post conciliar teachings Steck develops a comprehensive Catholic theology of animals based on an in depth exploration of Catholicism s fundamental doctrines trinitarian theology Christology pneumatology eschatology and soteriology All God s Animals makes two central claims First we can hope that God will include animals of the present age in the kingdom inaugurated by Christ Second because of this inclusion our responses to animals should be guided by the values of the kingdom As Christians await the final liberation of all creation they are to be witnesses to God s kingdom by embodying its ideals in their relations with animal life Because the kingdom s fullness is yet to come and because our world remains marked by the wounds of sin however Christian treatment of animals will at times require acts that are at odds with the kingdom s ideals for example those causing suffering and death Steck examines each of these ideas and explores all of their complexities

Incarnation Niels Henrik Gregersen,2015-07-01 This volume takes the reader on a journey from New Testament and early church views of incarnation to contemporary understandings of Christology A prominent group of scholars explores and debates the idea of deep incarnation the view that the divine incarnation in Jesus presupposes a radical embodiment that reaches into the roots of material and biological existence as well as into the darker sides of creation Such a wide scope view of incarnation allows Christology to be meaningful when responding to the challenges of scientific cosmology and global religious pluralism

To Unite the Scattered Children of God Stephen Finlan,2022-11-07 To Unite the Scattered Children of God is an accessible exploration of hope for the spiritual uniting of humankind in worship and in other ways from Isaiah on down to present times Several prophets shared this hope Many nations shall join themselves to the Lord on that day and shall be my people Zech 2

11 To an even greater degree Jesus set in motion a universalizing power Jesus and Paul inspired hope for the uniting of Jews Samaritans and Gentiles into one fold in the unity of the faith The book also builds upon the work of Teilhard de Chardin regarding the convergence of the human race under the spiritual influence of Christ the omega point of evolution Insights from pneumatology process theology personalism interfaith discussions and world peace advocacy add to the discussion

The Trinity, in Its Theological, Scientific and Practical Aspects, Analysed and Illustrated. (The Incarnation.).

M. Edgeworth Lazarus,1851 Christology and Science F. LeRon Shults,2021-11-18 The dialogue between theology and science has blossomed in recent decades but particular beliefs about Jesus Christ have not often been brought to the forefront of this interdisciplinary discussion even in explicitly Christian contexts This book breaks new ground by explicitly bringing the specific themes of Christology into dialogue with contemporary science It engages recent developments in late modern philosophy of science in order to articulate the Christian beliefs about Jesus Christ in a way that responds to challenges and opportunities that have arisen in light of various scientific discoveries The main chapters deal with Incarnation Atonement and Parousia After a brief treatment of the history of the shaping of these ideas the author traces developments in some of the sciences that have challenged these formulations evolutionary biology cultural anthropology and physical cosmology Each chapter also summarises some of the popular constructive responses to these developments After clarifying the way in which the Christian understanding of God and of humanity shape the task of reforming Christology each chapter concludes with a programmatic outline of ways in which we might articulate the identity agency and presence of Jesus Christ in dialogue with late modern science and culture *The Trinity* John M. Farrelly,2005-01-04 The mystery of the Trinity is the central Christian belief that defines God's essence God's ongoing love for humanity and saving grace Yet over the past few centuries especially in the West Christians have either ceased believing in the Trinity or simply no longer recognize its relevance in their ecclesial or individual lives Written in an ecumenical spirit that engages contemporary questions and theological viewpoints *The Trinity Rediscovering the Central Christian Mystery* articulates the mystery of the Trinity for people formed by modern historical consciousness science awareness of the equal dignity of men and women and respect for world religions By first identifying contemporary problems with the Christian proclamation of the Trinity in our culture and major differences among modern theologians John Farrelly OSB explores Scripture the life and message of Jesus Christ the various stages of the development of Trinitarian doctrine in Christian History the relation of the Trinity to creation and salvation the generation of the Son from the Father within the Trinity and the procession of the Holy Spirit from Father and Son and the meaning of three persons in one God He concludes by reflecting on the implications this renewed theology of the Trinity has for ecclesiology and Christian spirituality in our twenty first century world especially in relation to other world religions God in Contemporary Thought Sebastian A. Matczak,1977 In Search of the Whole John C. Haughey,2011-09-29 The contributors to this inspiring anthology meet the challenge that everyone faces that of becoming a

whole person in both their personal and professional lives John C Haughey SJ has gathered twelve professionals in higher education from a variety of disciplines philosophy theology health care business and administration What they have in common reflects the creative understanding of the meaning of catholic as Haughey has found it to operate in Catholic higher education Each essay in the first six chapters describes how its author has assembled a unique whole from within his or her particular area of academic competence The last six chapters are more autobiographical with each author describing what has become central to his or her identity All twelve are anticipating an entirety with each contributing a coherence that is as surprising as it is delightful

Incarnation and Neo-Darwinism David O. Brown, 2019-11-15 A ground breaking theological appreciation of neo Darwinism arguing that evolution is not the way that God creates but is a consequence of creatures imitating and participating in God

God is Green Bob Shore-Goss, 2016-10-28 At this time of climate crisis here is a practical Christian ecospirituality It emerges from the pastoral and theological experience of Reverend Robert Shore Goss who worked with his congregation by making the earth a member of the church by greening worship and by helping the church building and operations attain a carbon neutral footprint Shore Goss explores an ecospirituality grounded in incarnational compassion Practicing incarnational compassion means following the lived praxis of Jesus and the commission of the risen Christ as Gardener Jesus becomes the green face of God Restrictive Christian spiritualities that exclude the earth as an original blessing of God must expand This expansion leads to the realization that the incarnation of Christ has deep roots in the earth and the fleshly or biological tissue of life This book aims to foster ecological conversation in churches and outlines the following practices for congregations meditating on nature inviting sermons on green topics covenanting with the earth and retrieving the natural elements of the sacraments These practices help us recover ourselves as fleshly members of the earth and the network of life If we fall in love with God s creation says Shore Goss we will fight against climate change
