Tutela Della Salute E Diritto Internazionale Tutela Della Salute E Diritto Internazionale:

Tutela della salute e diritto internazionale Pia Acconci, 2011 *Environmental Health in International and EU Law* Stefania Negri, 2019-12-09 This book presents a broad overview of the many intersections between health and the environment that lie at the basis of the most crucial environmental health issues focusing on the responses provided by international and EU law Consistent with the One Health approach and moving from the relevant international and EU legal frameworks the book addresses some of the most important issues of environmental health including the traditional such as pollution of air water and soil and related food safety issues as well as new and emerging challenges like those linked to climate change antimicrobial resistance and electromagnetic fields Applying an intersectoral and interdisciplinary approach it also investigates other branches of international and EU law including human rights law investment law trade law energy law and disaster law The work also discusses ethics and intergenerational equity Ultimately the book assesses the degree of effectiveness of the international and EU normative framework and the extent to which the relevant legal instruments contribute to the protection of public health from major environmental hazards The book will be a valuable resource for students academics and policy makers working in the areas of Environmental Health law Global Health law International law and EU law

Private International Law Aspects of Corporate Social Responsibility Catherine Kessedjian, Humberto Cantú Rivera, 2020-03-06 This book addresses one of the core challenges in the corporate social responsibility or business and human rights debate how to ensure adequate access to remedy for victims of corporate abuses that infringe upon their human rights However ensuring access to remedy depends on a series of normative and judicial elements that become highly complex when disputes are transnational In such cases courts need to consider and apply different laws that relate to company governance to determine the competent forum to define which bodies of law to apply and to ensure the adequate execution of judgments The book also discusses how alternative methods of dispute settlement can relate to this topic and the important role that private international law plays in access to remedy for corporate related human rights abuses This collection comprises 20 national reports from jurisdictions in Europe North America Latin America and Asia addressing the private international law aspects of corporate social responsibility They provide an overview of the legal differences between geographical areas and offer numerous examples of how states and their courts have resolved disputes involving private international law elements The book draws two preliminary conclusions that there is a need for a better understanding of the role that private international law plays in cases involving transnational elements in order to better design transnational solutions to the issues posed by economic globalisation and that the treaty negotiations on business and human rights in the United Nations could offer a forum to clarify and unify several of the elements that underpin transnational disputes involving corporate human rights abuses which could also help to identify and bridge the existing gaps that limit effective access to remedy Adopting a comparative approach this book appeals to academics lawyers judges and legislators concerned with the

issue of access to remedy and reparation for corporate abuses under the prism of private international law **Human Rights and Emerging Technologies** Daniele Ruggiu, 2018-06-26 What is the state of current European governance on new and emerging technologies and where is it going What is and what can be the role of human rights in governance arrangements These are the main questions that this book answers for both European and non European scholars It provides a wide picture of current European governance notably in biotechnology nanotechnology and synthetic biology and discusses the model of Responsible Research and Innovation which is gaining popularity within the European Union under a human rights perspective It shows how human rights can contribute to governance frameworks without posing obstacles to research and innovation The theory presented in the book is followed by practical guidelines drawn from human rights law Starting from the Strasbourg Court jurisprudence it provides a complete review of the wide range of rights that the European Convention on Human Rights protects in light of the challenges of techno scientific advances This analysis will come in handy for private actors policymakers regulators as well as judges in solving hard cases raised by techno scientific progress in the future *General Interests of Host States in International Investment Law* Giorgio Sacerdoti, 2014-05-29 Signatory States have the right to take action in order to maintain their financial stability stimulate economic development or further their non economic interests such as health the environment and food security However such measures can potentially conflict with the rights of foreign investors Regulators and policy makers must take States international commitments toward foreign investors into account when making decisions They must also avoid resorting to protectionism in drafting new treaties With this tension in mind this book offers a balanced reappraisal of bilateral treaties and regional agreements on foreign investments The sensitive issues are examined in the light of the case law of arbitral investment tribunals and other international courts and the analysis highlights how cross fertilisation between trade and investment can assist in resolving conflicts **Rivista di diritto internazionale**, 1907 **Il diritto internazionale codificato e la sua sanzione giuridica** Pasquale Fiore, 1909 **Le leggi sul lavoro e il diritto internazionale operaio con prefazione del prof. Enrico Catellani** Anton Felice Locatelli, 1911 [Data protection in the context of covid-19. A short \(hi\)story of tracing applications](#) Elise Poillot, Gabriele Lenzini, Giorgio Resta, Vincenzo Zeno-Zencovich, 2021-11-13 The volume presents the results of a research project named Legafight funded by the Luxembourg Fond National de la Recherche in order to verify if and how digital tracing applications could be implemented in the Grand Duchy in order to counter and abate the Covid 19 pandemic This inevitably brought to a deep comparative overview of the various existing various models starting from that of the European Union and those put into practice by Belgium France Germany and Italy with attention also to some Anglo Saxon approaches the UK and Australia Not surprisingly the main issue which had to be tackled was that of the protection of the personal data collected through the tracing applications their use by public health authorities and the trust laid in tracing procedures by citizens Over the last 18 months tracing apps have registered a rise a fall and a sudden rebirth as mediums

devoted not so much to collect data but rather to distribute real time information which should allow informed decisions and be used as repositories of health certifications DOI 10.13134/979.12.5977.055.4 **La tutela e la circolazione dei beni**
