Innovative and Creative Industries in Hong Kong Grace L K Leung, 2018-10-29 The experience of Hong Kong's innovative and creative industries and the challenges they face serves as an important case study for other Chinese and Asian cities that are actively developing their innovative and creative industries in the era of globalization The return of sovereignty over Hong Kong back to China in 1997 has led to both collaboration and competition between the two places in innovative and creative sectors for the Greater China and Asian Regions Hong Kong has remained unique in spite of the integration but she has to strike a delicate balance between being simultaneously a Chinese and an international city This book looks at different innovative and creative industries such as international art and culture exhibition innovative technology digital entertainment TV and movies as well as government policy for innovative and creative industries particularly the changing competitive landscape brought about by the latest Great Bay Area development Drawing insights from cultural history innovation economics cultural policy studies and cultural geography this book explores the opportunities and challenges of Hong Kong's innovative and creative industries in particular after the change of sovereignty in 1997 It demonstrates that the city's legacy and heavy government input in capital do not guarantee their sustainable development This is a book not only for policymakers or academics interested in innovative and creative industries but also to students contemplating a career in these areas in Hong Kong the Greater China and the Asian Region

Trading Cultures Heung Wah Wong, Keiji Maegawa, 2015-06-01 This collection of original essays interrogates the nature of intercultural and intra cultural encounters through anthropological case studies of Asia Africa and the Pacific Islands The chapters show that parties involved in intercultural or intra cultural encounters each equipped with their own means and motivated by their own ends reciprocally engage each other in a dynamic emergent relationship Through detailed empirical research this volume seeks to advance the open question of how we may theorize the cultural interface

Creative Industries and Urban Development Terry Flew, 2013-10-31 The concept of creative industries has developed considerable academic and policy momentum in the 21st century There has been a connection identified between the rise of creative industries and the urbanisation of the world's population particularly in relation to the significance of cities as sites of cultural production and consumption Much of the work on creative industries and cities however has drawn upon imagined geographies about the relationship between creativity and place This collection draws together contributions that critically appraise recent urban cultural policy discourses as well as reflecting on the role of culture and creative industries in the future development of cities This book is based on a special issue of The Information Society An International Journal

Wong, Heung Wah Wong, 2015-04 This book investigates the histories of television dramas Hong Kong society and their interrelationship Rather than providing concrete interpretation of cultural content this book adopts a novel methodology laying out the motivations means and forces of production distribution and

Routledge Handbook of East Asian Popular Culture Koichi Iwabuchi,Eva Tsai,Chris Berry,2016-12-01 Since the 1990s there has been a dramatic increase in cultural flows and connections between the countries in the East Asian region Nowhere is this more apparent than when looking at popular culture where uneven but multilateral exchanges of Japanese Korean Taiwanese Hong Kong and Chinese products have led to the construction of an East Asian Popular Culture This is both influenced by and in turn influences the national cultures and generates transnational co production and reinvention As East Asian popular culture becomes a global force it is increasingly important for us to understand the characteristics of contemporary East Asian popular culture and in particular its transnational nature In this handbook the contributors theorize East Asian experiences and reconsider Western theories on cultural globalization to provide a cutting edge overview of this global phenomenon The Routledge Handbook of East Asian Popular Culture will be of great interest to students and scholars of a wide range of disciplines including Cultural Studies Media Studies Communication Studies Anthropology Sociology and Asian Studies in general Global Communications Paula Chakravartty,Yuezhi Zhao,2008 This provocative book takes a new approach toward understanding the uneven flows of global communications Rather than guiding its discussion by geography types of media or traditional separations of power and resistance Global Communications examines political economic power and communication in relation to historically specific encounters with modernity It underscores lived experiences in its approach to globalization showing that the state and the market can both be sites of empowerment just as civil society might also be a site of repression Taking a political economic analysis of communication and culture this dynamic group of international authors looks beyond developments in the North American information and culture industries to map new forms of citizenship and exclusion The chapters spotlight China Ghana India Japan Palestine Russia Singapore and Venezuela and foreground the transnational formations of the European Union the pan Arab and Spanish speaking markets and civil society actors in sub Saharan African the Middle East and North America Theoretically driven and empirically grounded Global Communications defines communication broadly to include production circulation and consumption and addresses urgent questions about the inequalities of globalization and the possibilities of hybrid cultural forms and practices
