In this book Prophecy Coles traces the existential history of the unwanted child with particular attention to the illegitimate child linking myth literature and clinical practice in the historical and legal context of adoption From the time of the Reformation in the sixteenth century until the early twentieth century the lives of such children were short lived The Adoption Act of 1926 did much to change the moral climate and the fate of the illegitimate child It provided the child with a legal family and a name There follows some unexpected difficulties that emerged after World War Two Adopted children did not necessarily thrive and young mothers who had been forced to give up a child born out of wedlock revealed their suffering The sealed records of the illegitimate child s origins became an issue Attachment theory and the development of neuroscience underpin the theoretical approach of this book Today the children who are available for adoption are older and may be distressed by several years in care Fundamental to helping these adopted children and their families there needs to be a multi disciplined therapeutic approach to try and mitigate the damage that has often been done to the early infant brain through trauma This book brings to life some of the adoption issues through the study of personal memoirs Each chapter considers adoption from a different angle the adopted child the birth mother the birth father foster parents and adopting parents The final chapter discusses some of the problems around adoption that have arisen again with reproductive technology and surrogate mothering This book will be of interest to all those who have been involved in or affected by adoption It will be of special interest to those adopting parents who have not been properly prepared or supported in their magnificent work of taking on some of the most troubled children in our society

Latchford, 2019-08-15 What personal truths reside in biological ties that are absent in adoptive ties And why do we think adoptive and biological ties are essentially different when it comes to understanding who we are At a time when interest in DNA and ancestry is exploding Frances Latchford questions the idea that knowing one s bio genealogy is integral to personal identity or a sense of family and belonging Upending our

established values and beliefs about what makes a family Steeped in Blood examines the social and political devaluation of adoptive ties It takes readers on an intellectual journey through accepted wisdom about adoption twins kinship and incest and challenges our naturalistic and individualistic assumptions about identity and the biological ties that bind us sometimes violently to our families Latchford exposes how our desire for bio genealogical knowledge understood as it is by family and adoption experts pathologizes adoptees by posing the biological tie as a necessary condition for normal identity formation Rejecting the idea that a love of the self same is fundamental to family bonds her book is a reaction to the wounds families suffer whenever they dare to revel in their difference A rejoinder to rhetoric that defines adoptees adoptive kin and their family intimacies as inferior and inauthentic Steeped in Blood s view through the lens of critical adoption studies decentres our cultural obsession with the biological family imaginary and makes real the possibility of being family in the absence of blood

American Baby Gabrielle Glaser,2022-01-25 A New York Times Notable Book The shocking truth about postwar adoption in America told through the bittersweet story of one teenager the son she was forced to relinquish and their search to find each other This book about the past might foreshadow a coming shift in the future I don t think any legislators in those states who are anti abortion are actually thinking Oh great these single women are gonna raise more children No their hope is that those children will be placed for adoption But is that the reality I doubt it says Glaser Mother Jones During the Baby Boom in 1960s America women were encouraged to stay home and raise large families but sex and childbirth were taboo subjects Premarital sex was common but birth control was hard to get and abortion was illegal In 1961 sixteen year old Margaret Erle fell in love and became pregnant Her enraged family sent her to a maternity home where social workers threatened her with jail until she signed away her parental rights Her son vanished his whereabouts and new identity known only to an adoption agency that would never share the slightest detail about his fate The adoption business was founded on secrecy and lies American Baby lays out how a lucrative and exploitative industry removed children from their birth mothers and placed them with hopeful families fabricating stories about infants origins and destinations then closing the door firmly between the parties forever Adoption agencies and other organizations that purported to help pregnant women struck unethical deals with doctors and researchers for pseudoscientific assessments and shamed millions of women into surrendering their children The identities of many who were adopted or who surrendered a child in the postwar decades are still locked in sealed files Gabrielle Glaser dramatically illustrates in Margaret and David s tale one they share with millions of Americans a story of loss love and the search for identity
