Two Billion Cars Driving Toward Sustainability Author Daniel Sperling Jul 201:

Two Billion Cars Daniel Sperling, Deborah Gordon, 2010-07-22 Today there are over a billion vehicles in the world and within twenty years the number will double largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in unstable oil rich nations is on the rise will matters only get worse? Or are there hopeful signs that effective realistic solutions can be found? Blending a concise history of cars and their impact on the world leading transportation experts Daniel Sperling and Deborah Gordon explain how we arrived at this state and what we can do about it. Sperling and Gordon assign blame squarely where it belongs on the auto industry, short sighted government policies and consumers. They explore such solutions as getting beyond the gas guzzler monoculture, re-inventing cars, searching for low carbon fuels and more. Promising advances in both transportation technology and fuel efficiency together with shifts in traveller behaviour they suggest offer us a way out of our predicament. The authors conclude that the two places that have the most troublesome emissions problems California and China are the most likely to become world leaders on these issues. Arnold Schwarzenegger's enlightened embrace of eco friendly fuel policies which he discusses in the foreword and China's forthright recognition that it needs far reaching environmental and energy policies suggest that if they can tackle the issue effectively and honestly then there really is reason for hope. Updated with a new afterword that sheds light on the profound changes in the global economy in the last year *Two Billion Cars* makes the case for why and how we need to transform transportation now more than ever. *Restless Giant* James T.

Patterson, 2005-09-23 In *Restless Giant* acclaimed historical author James Patterson provides a crisp concise assessment of the twenty seven years between the resignation of Richard Nixon and the election of George W Bush in a sweeping narrative that seamlessly weaves together social cultural political economic and international developments. We meet the era's many memorable figures and explore the culture wars between liberals and conservatives that appeared to split the country in two. Patterson describes how America began facing bewildering developments in places such as Panama Somalia Bosnia and Iraq and discovered that it was far from easy to direct the outcome of global events and at times even harder for political parties to reach a consensus over what attempts should be made. At the same time domestic issues such as the persistence of racial tensions high divorce rates alarm over crime and urban decay led many in the media to portray the era as one of decline. Patterson offers a more positive perspective arguing that despite our often unmet expectations we were in many ways better off than we thought. By 2000 most Americans lived more comfortably than they had in the 1970s and though bigotry and discrimination were far from extinct a powerful rights consciousness insured that these were less pervasive in American life than at any time in the past. With insightful analyses and engaging prose *Restless Giant* captures this period of American history in a way that no other book has illuminating the road that the United States traveled from the dismal days of the mid 1970s through the hotly contested election of 2000. *The Oxford History of the United States* The Oxford History of the United

States is the most respected multi volume history of our nation The series includes three Pulitzer Prize winners a New York Times bestseller and winners of the Bancroft and Parkman Prizes The Atlantic Monthly has praised it as the most distinguished series in American historical scholarship a series that synthesizes a generation s worth of historical inquiry and knowledge into one literally state of the art book Conceived under the general editorship of C Vann Woodward and Richard Hofstadter and now under the editorship of David M Kennedy this renowned series blends social political economic cultural diplomatic and military history into coherent and vividly written narrative **Two Billion Cars** ,2009 *Two Billion Cars* ,2009 April 13 2009 Daniel Sperling director of the Institute of Transportation Studies at UC Davis presents the next installment of Berkeley Lab s Environmental Energy Technologies Divisions Distinguished Lecture series He discusses Two Billion Cars and What it Means for Climate and Energy Policy Cars and Carbon Theodoros I. Zachariadis,2011-11-19 This volume contains articles from leading analysts and researchers on sustainable transportation who provide critical reflections on how automobile related climate policies have evolved up to now in Europe and around the world in view of the widely recognized need to substantially curb global emissions of greenhouse gases in the coming decades Authors describe the policies which have been most effective outline their economic and social implications present success stories while critically reviewing less successful examples and suggest strategies to decarbonize passenger transportation on a global scale
