Language, Culture, and Society James Stanlaw, Nobuko Adachi, 2025-03-31 Why should we study language? How do the ways in which we communicate define our identities? And how is this all changing in the digital world? Over seven editions, many have turned to Language Culture and Society for answers to questions like these because of its comprehensive coverage of all critical aspects of linguistic anthropology. This eighth edition carries on the legacy while addressing some of the newer pressing and exciting challenges of the twenty-first century such as issues of language and power, language ideology, linguistic diasporas as well as online and digital ecosystems. New to this edition are a reconceptualization of how linguistics approaches race, gender, and sexuality with additional chapters and sections on how linguistics benefits archaeology and biological anthropology as well as considerations of the relationship between language and truth, ethics and war, and politics. It also features enhanced and updated pedagogical features such as learning objectives, updated resources for continued learning, and cross-references to updated encyclopedias of linguistic anthropology.

Netymology Tom Chatfield, 2013-03-28 Composed of 100 bite-sized entries of 400 to 600 words each, Netymology weaves together stories, etymologies, and analyses around digital culture's transformation and creation of words. Tom Chatfield presents a kaleidoscopic thought-provoking tour through the buried roots of some of the digital age's most common terms, from the Apple symbol to HTML and Trojan horses to the twisted histories of new forms of slang, memes, text messages, and gaming terms. There's also discussion of the trends behind digital words and of the ways language itself is being shaped by new forces and revelations about how these forces are in turn reshaping us.

SMS Communication Louise-Amélie Cougnon, Cédric Fairon, 2014-07-15 The media often point an accusatory finger at new technologies; they suggest that there is always a loss of information or quality, or even that computer-mediated communication is destroying language. Most linguists, on the contrary, are firmly convinced that it is better to consider language as an evolving and changing entity. From this point of view, language is a social tool that has to be studied in depth through the prism of objectivity as a process in motion which is influenced by new social and technological stakes rather than as a fading organism.

In this volume we study and describe the societal phenomenon of SMS writing in its full complexity The aim of this volume is threefold to present recent linguistic research in the field of SMS communication to inform the reader about existing large SMS corpora and processing tools and finally to display the many linguistic aspects that can be studied via a corpus of text messages These articles were previously published in *Linguisticae Investigationes* Vol 35 2 2012

The Pragmatics of Text Messaging Michelle A. McSweeney, 2018-05-30 This book provides a comprehensive linguistic exploration of textism use by bilingual young adults illustrating the function of alternative and creative linguistic features and their role in conveying tone through text Drawing on a corpus of nearly 45 000 text messages donated by bilingual young adults in New York City this volume explores the ways in which the use of texting features such as lol emojis abbreviations and acronyms is systematic and essential In part toward the aim of exposing the tensions bilinguals face navigating a platform that preferences monolingual language practices the book highlights creativity as a means of both constructing meaning and performing identity for bilingual youths These findings are extended to explore the role texting plays in communication and identity construction in contemporary society more generally This volume extends the boundaries of emerging research on language and digital communication and will be of particular interest to graduate students and scholars in computer mediated communication pragmatics and new media
