 process different banking services or applications in microseconds undreamed of in the past These rapid explosions of
 technology are changing the banking industries from paper and branch banks to digitized and networked banking services
 Wakeham 2010 Delivering banking services on this networked environment are more convenient and effective than ever
 before Expanding the geographical coverage of digitized and networked banking services are the mainstreams for banks to
 deliver QoS to customers NBE 2012 In developing countries the cost of expanding the geographical coverage of digitized and
 networked banking services to customers would be difficult for a single bank In this environment banks would start to
 collaborate to pool non differentiated activities using private cloud computing within a closed group of banks in a similar way
 to telecommunication sharing network infrastructure Sardet 2012 These bundling could provide shared services that interact
 with customers in more engaging ways while simultaneously freeing banks from the burden of routine transactions Thus
 when the transaction volumes decline this collaboration could enables banks to stop duplicating investment industrialize
 their security processes for economies of scale gain new service options and have immediate access to the latest apps These
 collaborative private clouds could even be hybrid cloud powered by a third party increasing the benefits of cost and flexibility
