

MAINTENANCE

This Addendum updates the Maintenance section of the GAC® 2500 (UGMA & INTL) operator's manual (11001-1505F and all other preceding manuals).

NOTE: For customers that require a more extensive cleaning procedure with debris buildup in the cell, contact and schedule your instrument for cleaning with your dealer or authorized service center.

IMPORTANT: It is highly recommended the unit be regularly inspected and cleaned to ensure continued and consistent results.

For optimum performance, extensive cleaning should be performed weekly or more often based on surrounding environment conditions. Factors such as dust, temperature extremes, grain dust, and external humidity vary from location to location. If there are any questions about the cleanliness or instrument performance, contact your local authorized service center.

Note: The following recommendations are provided as a guideline to maintain a robust and quality operating instrument. It should not be interpreted as an exhaustive maintenance program. Dust and debris may periodically accumulate in areas not specified in this manual. The owner is responsible for ensuring overall equipment cleanliness. If any questions arise regarding the maintenance or performance of the instrument, contact your dealer or local authorized service center.

EXTERNAL CLEANING

The LCD display may require periodic cleaning. Use a commercial cleaner for glass lenses to remove dust.

CAUTION

Do not apply water, organic solvent or chemicals, such as acid and alkali to the LCD display.

The GAC® 2500 surface can be cleaned with any cleaner designed for plastic and stainless steel surfaces.

Periodically use a rag to wipe the grain hopper and the (2) upper grain hopper sensors.
