

2. Derivative Work and Hong Kong's Umbrella Movement: Three Perspectives

Wing-Ki Lee

Abstract

This chapter discusses a type of visual image that emerged from the Occupy movement in Hong Kong – 'derivative work', or Internet meme, a visual and photographic manipulation of found images to parody public events. A selection of derivative works emerging from and related to the Umbrella Movement (2014) are brought into discussion to examine the social, cultural and political aspects of visual images and Hong Kong's recent history. The theoretical framework is primarily drawn from recent discussions of visual images and digital humanities. Derivative work is used by different groups with different political views and aims of which three are distinguished in the article: grassroots participatory propaganda, sexist and racist cyber culture, and the recuperation by pro-establishment lobbyists. Two critical points are highlighted in the conclusive remarks to, first, bring these three perspectives together as the three perspectives may, or may not, be treated in a linear progression; and, secondly, to suggest that forms of censorship will always be imposed on derivative work because they are direct responses to local politics. The author suggests that future practices of visualizing the street are dependent on and conditioned by legal-political progress.

Protest and Resistance in the Chinese Party State Hank Johnston, Sheldon Zhang, 2022-02-24 Although contemporary China is a repressive state protests and demonstrations have increased almost tenfold between 2005 and 2015 This is an astounding statistic when one considers that Marxist Leninist regimes of the past tolerated little or no public dissent How can protests become so common in an autocratic state What are the trends of repression and mobilization This collection helps to answer these compelling questions through in depth analyses of several Chinese protest movements and state responses The chapters examine the opportunities and constraints for protest mobilization and explains their importance for understanding contemporary Chinese society

The Umbrella Movement Ngok Ma, Edmund W. Cheng, 2025-10-01 This volume examines the most spectacular struggle for democracy in post handover Hong Kong Bringing together scholars with different disciplinary focuses and comparative perspectives from mainland China Taiwan and Macau one common thread that stitches the chapters is the use of first hand data collected through on site fieldwork This study unearths how trajectories can create favourable conditions for the spontaneous civil resistance despite the absence of political opportunities and surveys the dynamics through which the protestors the regime and the wider public responses differently to the prolonged contentious space The Umbrella Movement Civil Resistance and Contentious Space in Hong Kong offers an informed analysis of the political future of Hong Kong and its relations with the authoritarian sovereignty as well as sheds light on the methodological

challenges and promises in studying modern day protests *The Umbrella Movement* Ngok Ma, Wei Zheng (College teacher), 2019 For 79 days the Umbrella Movement staged Hong Kong's most spectacular struggle for democracy Sparked by disgruntlement over Beijing's denial of universal suffrage elections the protests first began with class boycott along the largely scripted Occupy Central but later morphed into a spontaneous resilient street occupation transforming roads and pavements into protest sites and tent villages Although the movement failed to bring any tangible political changes it has transformed Hong Kong politics in many ways Not only has it catalyzed the emergence of new movement agency repertoires and claims it has also defined a new era for Hong Kong its relations with China and its identity in the world This emerging political landscape merits thorough examination This book is a collaborative attempt to examine this unprecedented and watershed event It brings together 13 essays written by scholars with different disciplinary and research focuses The chapters probe the political origins of the movement identify new participants protest forms and action repertoires analyze protesters strategies and regime responses and also bring in comparative perspectives from mainland China Taiwan and Macau One common thread that stitches the chapters together is the use of first hand data collected through on site fieldwork across the protest sites *TiLis, the Times Literary Supplement*, 1969 **Take Back Our Future** Ching Kwan Lee, Ming Sing, 2019-11-15 In a comprehensive and theoretically novel analysis Take Back Our Future unveils the causes processes and implications of the 2014 seventy nine day occupation movement in Hong Kong known as the Umbrella Movement The essays presented here by a team of experts with deep local knowledge ask how and why had a world financial center known for its free wheeling capitalism transformed into a hotbed of mass defiance and civic disobedience Take Back Our Future argues that the Umbrella Movement was a response to China's internal colonization strategies political disenfranchisement economic subsumption and identity reengineering in post handover Hong Kong The contributors outline how this historic and transformative movement formulated new cultural categories and narratives fueled the formation and expansion of civil society organizations and networks both for and against the regime and spurred the regime's turn to repression and structural closure of dissent Although the Umbrella Movement was fraught with internal tensions Take Back Our Future demonstrates that the movement politicized a whole generation of people who had no prior experience in politics fashioned new subjects and identities and awakened popular consciousness **Pro-Democracy Contention in Hong Kong** Francis L. F. Lee, 2025-02-01 Elucidates the political dynamics that link the Umbrella Movement to the anti extradition protests and helps explain the key character of the latter movement Presenting an analytical account of the relational dynamics linking the 2014 Umbrella Movement and the 2019 anti extradition protests in Hong Kong Pro Democracy Contention in Hong Kong aims to explain not only the relationship between two spectacular protest campaigns but also why the anti extradition protests exhibited a high degree of internal solidarity and public sympathy toward confrontational and at times violent protest actions The analysis moves beyond the typical focus on the peaks of social mobilization to examine the

contingent and dynamic evolution of the pro democracy movement in Hong Kong Drawing upon a range of research materials including in depth interviews with protesters and leading activists surveys of protesters conducted onsite population opinion surveys systematic analyses of media materials and examination of the verdicts of protest related court cases Francis L F Lee offers theoretical insights on various important issues in the study of social movements including among others the possibility of movement transformation during abeyance the relationship between protest events and elections the role of ideological brokers in movement dynamics and the nature of spontaneous protests Readers interested in Chinese and Hong Kong politics or interested in social movement studies and analyses of political dynamics in hybrid regimes will find value in Lee s analysis

Media and Protest Logics in the Digital Era Francis L. F. Lee, Joseph M. Chan, 2018-04-05 Digital and social media are increasingly integrated into the dynamics of protest movements around the world They strengthen the mobilization power of movements extend movement networks facilitate new modes of protest participation and give rise to new protest formations Meanwhile conventional media remains an important arena where protesters and their targets contest for public support This book examines the role of the media understood as an integrated system comprised of both conventional media institutions and digital media platforms in the formation and dynamics of the Umbrella Movement in Hong Kong For 79 days in 2014 Hong Kong became the focus of international attention due to a public demonstration for genuine democracy that would become known as the Umbrella Movement During this time twenty percent of the local population would join the demonstration the most large scale and sustained act of civil disobedience in Hong Kong s history and the largest public protest campaign in China since the 1989 student movement in Beijing On the surface this movement was not unlike other large scale protest movements that have occurred around the world in recent years However it was distinct in how bottom up processes evolved into a centrally organized programmatic movement with concrete policy demands In this book Francis L F Lee and Joseph M Chan connect the case of the Umbrella Movement to recent theorizations of new social movement formations Here Lee and Chan analyze how traditional mass media institutions and digital media combined with on the ground networks in such a way as to propel citizen participation and the evolution of the movement as a whole As such they argue that the Umbrella Movement is important in the way it sheds light on the rise of digital media enabled social movements the relationship between digital media platforms and legacy media institutions the power and limitations of such occupation protests and new action logics and the continual significance of old protest logics of resource mobilization and collective action frames Through a combination of protester surveys population surveys analyses of news contents and social media activities this book reconstructs a rich and nuanced account of the Umbrella Movement providing insight into numerous issues about the media movement nexus in the digital era

Theological Reflections on the Hong Kong Umbrella Movement Justin K.H. Tse, Jonathan Y. Tan, 2016-07-14 This book gathers the voices of four local Hong Kong theologians to reflect on the 2014 democracy protests in the city from the perspectives of Catholic social teaching

feminist and queer intersectionality Protestant liberation and textual exegesis The volume also includes an extended primer on Hong Kong politics to aid readers as they reflect on the theology underlying the democracy protests September 28 2014 is known as the day that political consciousness in Hong Kong began to shift As police fired eighty seven volleys of tear gas at protesters demanding genuine universal suffrage in Hong Kong the movement termed the Umbrella Movement ignited a polarizing set of debates over civil disobedience government collusion with private interests and democracy The Umbrella Movement was also a theological watershed moment a time for religious reflection This book analyzes the role that religion played in shaping the course of this historic movement **Reorienting Hong Kong's Resistance** Wen Liu,JN

Chien,Christina Chung,Ellie Tse,2022-01-27 This book brings together writing from activists and scholars that examine leftist and decolonial forms of resistance that have emerged from Hong Kong s contemporary era of protests Practices such as labor unionism police abolition land justice struggles and other radical expressions of self governance may not explicitly operate under the banners of leftism and decoloniality Nevertheless examining them within these frameworks uncovers historical transnational and prefigurative sightlines that can help to contextualize and interpret their impact for Hong Kong s political future This collection offers insights not only into Hong Kong s local struggles but their interconnectedness with global movements as the city remains on the frontlines of international politics **The Blame Game** Andrea Kyna Chiu-wai

Cheng,Massachusetts Institute of Technology. Department of Urban Studies and Planning,2012 Hong Kong has seen several social movements emerge since 2003 that have focused on saving quotidian public spaces such as traditional shopping streets and markets from redevelopment This thesis explores how the most important form of public space in Hong Kong streets and sidewalks has been shaped by the regulatory framework for street vendors and markets which in turn bears the imprint of Hong Kong s colonial heritage I seek to identify contradictions between the ways society currently uses space and the original intent of the regulations and establish if these can explain current frictions over public space expressed as protests In turn I also argue that locating the contradictions helps to identify alternative approaches to mediating conflicting claims on space which thus far have been analyzed through a right to the city perspective This paper utilizes informal economy analysis and studies of colonial urbanism as additional lenses through which to interpret past policy choices A case study applies this approach to analyze government responses to the deaths of nine people in fatal fire in a tenement building on Fa Yuen Street which plays host to a lively street market in Mongkok a bustling lower income district in the heart of Hong Kong Narratives about the causes of the fire assign blame to the street vendors rather than building owners whose renovations left fire escapes blocked and inaccessible This narrative fits a pattern of associating vendors with public health or safety risks While this characterization is common world wide in Hong Kong it is exacerbated by its colonial legacy of combining laissez faire governance and paternalism The dialectic between laissez faire and paternalism can be recognized as playing a role shaping street vendor policies **Narrative, Space and Atmosphere** Daniel Matthews,2016 Since the

financial crash of 2008 the strategy of occupation has been widely deployed as a means of expressing and mobilizing political dissent Within legal studies responses to this mode of protest have remained wedded to a statist perspective that fails to assess the normative commitments immanent to occupations themselves Rather than examining the strategy of occupation through a legalistic lens this article approaches a recent occupation through the theoretical apparatus of the nomosphere This term originally coined by David Delaney but substantially expanded here allows for an assessment of the spatial narrative and atmospheric orderings of the Umbrella Movement a pro democracy campaign that sustained a 79 day occupation in Hong Kong s city centre in late 2014 This nomospheric inquiry assesses the forms of ordering that animated the movement from within and seeks to foreground the lived and felt reality of the occupation rather than focus on its legalistic or constitutional significance alone Understanding Citizenship from Dialogues ,2015 **The Dynamics of Social Policy Making in Hong Kong** Catherine M.
