Common answers that people have for this question are money education and skills This is actually very untrue To become a successful entrepreneur it is less about the hard skills or the investment you can afford and more about your mindset habits and self discipline These three aspects can help you create the investment or skills that you need to build the business of your choice With that being said choosing your business is important as well For instance if your dream is to start your own brewery you must have some knowledge of beer and beverage production If not it is still possible to achieve this goal but you need to invest more time into learning these skills from scratch Choosing the business you want to create has to be strategic based on your existing skills and background It is okay to choose something that you have no experience in but you have to be prepared to commit the time and energy into a steeper learning curve For instance if you have experience in landscaping then starting your own landscaping business or renovations business may be the most strategic move for you On the other hand choosing to start your own restaurant may not be the best move for you considering you don't have any existing skills This book will teach you everything you need to know to help you become a successful entrepreneur I will start off by teaching you about the four aspects of a successful mindset that you need to have This will be the baseline of your success as ensuring that you have mastered these four areas will help you accomplish the goals you've never thought you'd be able to The next topic I will teach you are the habits that all successful entrepreneurs have Building strong healthy habits will help you stay disciplined and complete all the necessary tasks that you will need to start your own business Without healthy entrepreneur habits you will struggle to catch up and beat your competition Once you have these areas down pat I will move on to teach you about how you can build new skills and improve existing ones This is especially important if you are planning on starting a business in an area where you have no existing experience In a case like this learning new skills and mastering them as fast as you can is largely beneficial Towards the end of this book I will teach you an important topic I will teach you how to overcome the obstacles that you will face as an entrepreneur Being an entrepreneur there is no one to hold you accountable The only person that can do that is you With that said the biggest obstacle that entrepreneurs face is procrastination Learning to beat procrastination will help you achieve the productivity you need to complete the numerous daily tasks to keep your business afloat and thriving In the last chapter of this book I will walk you through a 30 step guide combining everything you have learned to teach you how to become a more successful entrepreneur This guide will combine both your soft skills such as discipline and organization and hard skills like creating your schedule and company culture This final guide will tie everything you have learned together to make you a well rounded entrepreneur that is ready to beat out other competitors So let's not wait any longer and get started
