Unconscious Branding How Neuroscience Can Empower And Inspire Marketing:

Unconscious Branding Douglas Van Praet, 2012-11-13 For too long marketers have been asking the wrong question If consumers make decisions unconsciously why do we persist in asking them directly through traditional marketing research why they do what they do They simply can't tell us because they don't really know Before marketers develop strategies they need to recognize that consumers have strategies too human strategies not consumer strategies We need to go beyond asking why and begin to ask how behavior change occurs Here author Douglas Van Praet takes the most brilliant and revolutionary concepts from cognitive science and applies them to how we market advertise and consume in the modern digital age Van Praet simplifies the most complex object in the known universe the human brain into seven codified actionable steps to behavior change These steps are illustrated using real world examples from advertising marketing media and business to consciously unravel what brilliant marketers and ad practitioners have long done intuitively deconstructing the real story behind some of the greatest marketing and business successes in recent history such as Nike's Just Do It campaign Got Milk Wendy's Where's the Beef and the infamous Volkswagen Punch Buggy launch as well as their beloved The Force Mini Darth Vader Super Bowl commercial

Biosurveillance in New Media Marketing Selena Nemorin, 2018-10-05 Advertising has long been considered a manipulator of minds and has increased significantly in coercive power since the emergence of research in behavioural psychology Now with the deployment of neurophysiological imaging technologies into market contexts companies are turning to neuromarketing to measure how we think and feel Data driven models are being used to inform advertising strategies designed to trigger human action at a level beneath conscious awareness This practice can be understood as a form of consumer biosurveillance but what is behind the hype What are the consequences Biosurveillance in New Media Marketing is a critical reflection on the role that technology is playing in the construction of consumer representations and its encroachment into the internal lives of individuals and groups It is a work that examines the relationship between neuromarketing practitioners and machines and how the discourses and practices emerging from this entanglement are influencing the way we make sense of the world

Branding with Brains Tjaco Walvis,2010-06-15 What has neuroscience got to do with branding The link may not be immediately obvious but the fact is our brains select brands in much the same way that Google selects websites So just as web marketers play on Google s algorithm to make sure their site appears as high up the search list as possible brand marketers should play on the brain s algorithm to make sure their brand is at the top of their customers minds at the moment they choose which brand to buy This ground breaking new book brings the proven effects of hard science to the creative practice of branding It shows you how to harness this powerful combination to your own advantage by helping you understand how customers brains work when they choose brands A strong brand cannot be build effectively without taking into account the laws of the brain which as this book shows really exist and can be scientifically proven to work Once you know this you can apply the familiar branding laws of relevance coherence and participation more precisely more confidently and to much greater effect This means your brand will have a much greater

chance of being chosen by customers than your competitors brands Branding with Brainsshatters the conventional approach to branding which is based on hunches and intuition by uncovering the hard scientific truth about why customers choose some brands over others Insights into company stories from Leica to Innocent Drinks from Starbucks to Schipol International Airport give you the fascinating truth about how the processes that go on in our brain affect our decisions to buy a particular product or service All in all this breathtakingly radical new book from Tjaco Walvis presents a daringly different state of the art approach to brand strategy that will help you build powerful brands more efficiently more effectively and more reliably than ever before Branding really is all in the mind and this book proves it *Psychology of Branding* W. Douglas Evans,2013

This title explores the psychological factors underlying brand choices we make How we encounter brands and how often we think about them feel about them and how we experience them in relation to competing brands has a big effect on which ones we choose and keep on choosing At the same time presumably there are neural events occurring when we encounter and mentally respond to brands These represent ways in which we can explain and understand why people choose and remain loyal to brands These explanations of branding are related and intuitive But how does the psychology of branding work This book offers answers to that question **The Neuro-Consumer** Anne-Sophie Bayle-Tourtoulou, Michel Badoc,2020-04-24 Neuroscientific research shows that the great majority of purchase decisions are irrational and driven by subconscious mechanisms in our brains This is hugely disruptive to the rational logical arguments of traditional communication and marketing practices and we are just starting to understand how organizations must adapt their strategies This book explains the subconscious behavior of the neuro consumer and shows how major international companies are using these findings to cast light on their own consumers behavior Written in plain English for business and management readers with no scientific background it focuses on how to adapt marketing and communication to the subconscious and irrational behaviors of consumers the direct influence of the primary senses sight hearing smell taste touch on purchasing decisions and the perception of communications by customers brains implications for innovation packaging price retail environments and advertising the use of nudges and artifices to increase marketing and communication efficiency by making them neuro compatible with the brain s subconscious expectations the influence of social media and communities on consumers decisions when collective conscience is gradually replacing individual conscience and recommendation becomes more important than communication and the ethical limits and considerations that organizations must heed when following these principles Authored by two globally recognized leaders in business and neuroscience this book is an essential companion to marketers and brand strategists interested in neuroscience and vital reading for any advanced student or researcher in this area

Neuromarketing in the B-to-B-Sector: Importance, Potential and Its Implications for Brand Management Friedrich Gentner, 2012-02 Business administration theory has dealt since its inception with the issue of providing practical support to corporate decision making For their explanatory models it has resourced the knowledge body

provided by economics philosophy sociology and psychology In the last few years it increasingly draws also on the findings taken from neuroscience By means of so called imaging techniques neuroscientists can conduct a deeper analysis of the relationships and processes in the brain The question of how buying decisions occur and how these may be influenced has finally created Neuromarketing The findings from this research filed reveal that feelings and emotions play a much greater role than previously supposed and that these can be addressed through brands However the management of immaterial values such as brands does not fit well with the predominantly engineering oriented mindset of top management in B to B companies In his preface to B to B Markenführung Klaus Backhaus states Effektive und effiziente Markenpolitik ist in der Praxis des Business to Business Marketing immer noch ein Stiefkind auch wenn mittlerweile eine Reihe von wissenschaftlichen Veröffentlichungen bis hin zu Lehrbüchern zur Markenpolitik in diesem Bereich vorliegt Einer der wesentlichen Gründe hierfür liegt sicherlich darin dass der Business to Business Bereich stark durch Personen mit einer technischen bzw ingenieurwissenschaftlichen Ausbildung geprägt ist die für intangible assets wie sie die Marke darstellt erfahrungsgem weniger Aufmerksamkeit aufbringen Even though the purchase decision is made by the Buying Center in the B to B market the assumption prevails that the findings from Neuromarketing can still be applied because this group consists of human beings as well This book will consider the findings taken from Neuromarketing in the light of particular instances of B to B Marketing The question will be raised as to why and to what extent Neuromarketing is relevant for brand management in B to B Marketing The possibilities arising from this comparison will only be presented as examples and do not claim to be complete An example from the Corporate Communication Sector at Siemens will be taken to display the application

Neurobranding Peter Steidl, 2018-04-19 Neuromarketing is fast becoming more visible in mainstream marketing and communications practice but is still not often enough integrated into strategy development and decision making Neurobranding argues that as the world starts to experience the disruption wrought by the current technology led industrial revolution effective brand strategy is more critical than ever before Informed by neuromarketing principles Neurobranding brings together in one place what marketers need to know to build and manage brands that can form a strong meaningful relationship with consumers that will protect them in a technology driven future

The Branded Mind Erik Du Plessis, 2011 The Branded Mind is about how people think and particularly how people think about brands It explores what we know about the structure of the brain explains how the different parts of the brain interact and then demonstrates how this relates to current marketing theories on consumer behaviour It investigates developments in neuroscience and neuromarketing and how brain science can contribute to marketing and brand building strategies Including research by Millward Brown one of the World's top market research companies it touches on key topics such as the nature of feelings emotions and moods personality measuring the brain consumer behaviour and decision making and market segmentation

Branding Between the Ears: Using Cognitive Science to Build Lasting Customer Connections Sandeep Dayal, 2021-11-30

Build a cognitive brand that connects with your customers in the deepest most meaningful ways Successful marketing is all about unlocking the door to peoples thoughts feelings memories and fantasies Tap into one or more of these and your brand will stick forever In Branding Between the Ears world renowned marketing thought leader Sandeep Dayal explains how to leverage behavioral psychology social anthropology and neuroscience to decode what goes on in consumer minds and create effective marketing strategies to build the kind of loyalty that fuels today s iconic brands Dayal reveals that most successful cognitive brands are architected around three questions consumers ask themselves Does this brand give me good vibes Does what this brand says make sense to me Will I be happier if I buy this brand These three factors good brand vibes brand sense and brand resolve are the hidden mantra that push customers off the fence of indecision and get them not just to admire but actually buy the brands again and again Branding Between the Ears reveals paradigm shifts in building and executing brands that are informed by a burgeoning body of research in brain sciences and offers a better way to make brands that not just stand out but connect with consumers and embed deeply in their thoughts to drive choice Dayal is the marketing thought leader who predicted that consumer collaboration would be the key factor in winning people s trust online and giving consumers control over their personal information would be central to gaining their trust issues that are unfolding today Now with Branding Between the Ears he provides equally prescient principles and new ideas for gaining the competitive edge in a largely uncertain future and winning with cognitive power brands
