A collection of twenty-five new assessment probes designed to determine students' thinking. [Yet More Everyday Science Mysteries](#) Richard Konicek-Moran, 2011

In the fourth book of this award-winning series, author Richard Konicek-Moran explores 15 new mysteries children and adults encounter in their daily lives. Relating the mysteries to experiences familiar to elementary and middle school students, the stories show how science is part of everyday life and initiate inquiry-based learning by leaving each mystery without an ending. Students identify the problem to be solved, formulate questions, form hypotheses, test their ideas, and come up with possible explanations. *Uncovering Student Ideas in Science, Volume 3*, 2008

Everyday Earth and Space Science Mysteries Richard Konicek-Moran, 2013

What are the odds that a meteor will hit your house? Do you actually get more sunlight from Daylight Savings Time? Where do puddles go? By presenting everyday mysteries like these, this book will motivate your students to carry out hands-on science investigations and actually care about the results. These 19 open-ended mysteries focus exclusively on Earth and space science, including astronomy, energy, climate, and geology. The stories come with lists of science concepts to explore, grade-appropriate strategies for using them, and explanations of how the lessons align with national standards. They also relieve you of the tiring work of designing inquiry lessons from scratch. Cover verso
