Vanished Paths Crisis Of Representation And Destruction:

Vanished Paths Palazzo Bonaguro (Bassano del Grappa),2000 **At a Distance** Annmarie Chandler,2005 The theory and practice of networked art and activism including mail art sound art telematic art fax art Fluxus and assemblings Networked collaborations of artists did not begin on the Internet In this multidisciplinary look at the practice of art that takes place across a distance geographical temporal or emotional theorists and practitioners examine the ways that art activism and media fundamentally reconfigured each other in experimental networked projects of the 1970s and 1980s By providing a context for this work showing that it was shaped by varying mixes of social relations cultural strategies and political and aesthetic concerns At a Distance effectively refutes the widely accepted idea that networked art is technologically determined Doing so it provides the historical grounding needed for a more complete understanding of today s practices of Internet art and activism and suggests the possibilities inherent in networked practice At a Distance traces the history and theory of such experimental art projects as Mail Art sound and radio art telematic art assemblings and Fluxus Although the projects differed a conceptual questioning of the art object combined with a political undermining of dominant art institutional practices animated most distance art After a section that sets this work in historical and critical perspective the book presents artists and others involved in this art re viewing their work including experiments in mini FM telerebotics networked psychoanalysis and interactive book construction Finally the book recasts the history of networks from the perspectives of politics aesthetics economics and cross cultural analysis **Damage Control** Kerry Brougher,Russell Ferguson,Dario Gamboni,2013 Timely and wide ranging this volume explores in depth the theme of destruction in international contemporary art While destruction as a theme can be traced throughout art history from the early atomic age it has remained a pervasive and compelling element of contemporary visual culture Damage Control features the work of more than 40 international artists working in a range of media painting sculpture photography film installation and performance who have used destruction as a means of responding to their historical moment and as a strategy for inciting spectacle and catharsis as a form of rebellion and protest or as an essential part of re creation and restoration Including works by such diverse artists as Jean Tinguely Andy Warhol Bruce Conner Yoko Ono Gordon Matta Clark Pipilotti Rist Yoshitomo Nara and Laurel Nakadate the book reaches beyond art to enable a broader understanding of culture and society in the aftermath of World War II under the looming fear of annihilation in the atomic age and in the age of terrorism and other disasters real and imagined **Sentieri Interrotti** Palazzo Bonaguro (Bassano del Grappa, Italy),2000 This study deals with the more radical movements in art that have flourished since the start of the 1950s and offers a comprehensive document of those who participated in shaping revolutionary concepts in art **Bibliografia nazionale italiana** ,2000 L'Informazione bibliografica ,2001 Persistence of the Negative Benjamin Noys,2012-03-13 An original and compelling critique of contemporary Continental theory through a rehabilitation of the negative Feminist Posthumanism in

Contemporary Science Fiction Film and Media Julia A. Empey, Russell J.A. Kilbourn, 2023-08-24 Feminist Posthumanism in Contemporary Science Fiction Film and Media From Annihilation to High Life and Beyond places posthumanism and feminist theory into dialogue with contemporary science fiction film and media This essay collection is intimately invested in the debates around the posthuman and the critical posthumanities within a feminist critical theoretical framework In this posthumanist light science fiction as a genre allows for new imaginings of human technological relations while it can also be the site of a critique of human exceptionalism and essentialism In this way science fiction affords unique opportunities for the scholarly investigation of the relevance and relative applicability of specific posthumanist themes and questions in a particularly rich and wide ranging popular cultural field of production One of the reasons for this suitability is the genre's historically longstanding relationship with the critical investigation of gender specifically the position and relative empowerment of women The original analyses presented here pay close attention to audiovisual style including game mechanics facilitating the critical interrogation of the issues and questions around posthumanism Where typically the mention of SF in the posthumanist context calls to mind a whole set of often clichéd tropes the cyborg technologically augmented bodies AI subjectivities etc this volume's thirteen chapters analyze specific examples of contemporary SF cinema that engage in meaningful ways with the burgeoning field of critical posthumanism and that utilize such films to interrogate posthumanist and feminist as well as humanistic ideas

Hidden Paths Chiara Thumiger, 2007 Hidden paths analyses the representation of character in Greek tragedy focusing on one of the most important and controversial theatre plays of all times the Bacchae Euripides last play has always been a favourite enjoying an enormous success for centuries on and off the stage This book argues that in the representation of characters in the play we can find a development in the view of self and representation of man This development which is also to be partly traced in the works of Sophocles and in earlier plays by Euripides finds a fuller expression in the Bacchae and culminates in the catastrophe of ignorance and incommunicability which has Pentheus at its centre The construction of character in the text and the view of self which it entails are explored through a meticulous analysis of keywords while verbal usage imagery and style are exposed as the very stuff of characterisation The book uncovers the hidden paths along which human life is experienced in the play and through which human characterisation materializes from the fabric of the text

Africans and Globalization Oyinlola Longe, Akinloyè Òjó, Karim Traore, 2017-11-22 Africans and Globalization Linguistic Literary and Technological Contents and Discontents considers the substance and dissatisfactions of globalization on Africa and its Diaspora Although variously framed across disciplines globalization has generally entailed non milieu bound interactions which alters the existence of its participants The concerns about the impact of globalization have been raised in relation to Africa and have related to the helpful and deleterious effects Increasingly industrialization without consideration of environmental impacts and westernization including erosion of indigenous values are perceived as synonymous with globalization This multidisciplinary collection

contends that in theory globalization linked Africa with the world through trade and information sharing thereby increasing development This collection provides reflections based on contemporary research within the linguistic literary and technological areas of study It illustrates that globalization is not a single process but rather a complex set of processes that seemingly operate in an oppositional manner The collected works make for exciting appraisal as they highlight some of the contents and discontents of globalization across multiple areas of human endeavor in Africa and its diaspora
