The Upside Of Down Catastrophe Creativity And The Renewal Of Civilization:

The Upside of Down Thomas Homer-Dixon, 2006 Publisher description *The Upside of Down* Thomas F.

Homer-Dixon, Thomas Homer-Dixon, 2007 Today's converging energy environmental economic political stresses could case a breakdown of national global order In this book Thomas Homer Dixon shows how to choose a better route into the future Drawing on an array of disciplines Homer Dixon's acute insights are imaginative controversial *The Seneca Effect* Ugo Bardi, 2017-08-22 The essence of this book can be found in a line written by the ancient Roman Stoic Philosopher Lucius Annaeus Seneca Fortune is of sluggish growth but ruin is rapid This sentence summarizes the features of the phenomenon that we call collapse which is typically sudden and often unexpected like the proverbial house of cards But why are such collapses so common and what generates them Several books have been published on the subject including the well known *Collapse* by Jared Diamond 2005 *The collapse of complex societies* by Joseph Tainter 1998 and *The Tipping Point* by Malcom Gladwell 2000 *Why The Seneca Effect* This book is an ambitious attempt to pull these various strands together by describing collapse from a multi disciplinary viewpoint The reader will discover how collapse is a collective phenomenon that occurs in what we call today complex systems with a special emphasis on system dynamics and the concept of feedback From this foundation Bardi applies the theory to real world systems from the mechanics of fracture and the collapse of large structures to financial collapses famines and population collapses the fall of entire civilizations and the most dreadful collapse we can imagine that of the planetary ecosystem generated by overexploitation and climate change The final objective of the book is to describe a conclusion that the ancient stoic philosophers had already discovered long ago but that modern system science has rediscovered today If you want to avoid collapse you need to embrace change not fight it Neither a book about doom and gloom nor a cornucopianist's dream *The Seneca Effect* goes to the heart of the challenges that we are facing today helping us to manage our future rather than be managed by it *Rationing Earth* Herb Bentz, Our economy has spiralled out of control with too much focus on the quantity of production The way to reduce this wasteful overproduction of goods and services is to increase their quality In this groundbreaking book industrial designer Herb Bentz explains how to fix the economy and break the environment versus economy deadlock Bentz tells us how the use of good design can improve the quality of what we produce and how a beneficial growth in quality can substitute for the destructive increase in quantity Tying together many diverse aspects of the economy economic growth unemployment the welfare state and the need to ration *Rationing Earth* provides a critical analysis and a way forward at this crucial moment Despite high wealth in rich countries there is still poverty and inadequate funding for social programs This unjustified austerity has resulted in a persistence of economic insecurity the proliferation of poor quality products and inadequate action on environmental problems Bentz provides an economic solution from a designer's perspective By using elements of design thinking to achieve an overarching synthesis of the world's challenging problems including effectiveness of government the opposing demands of capital and labour positive

and negative effects of technology and the absolute boundaries of a finite earth he presents practical solutions to the conflicting needs for economic growth full employment and reduced consumption In each of these areas Rationing Earth addresses the toughest questions How will we adapt to less economic growth How do we solve unemployment What is the proper role of government And how can we create an economy that effectively rations scarce resources without reducing prosperity Bentz blends an entertaining style with a concise but broad analysis that is provocative informative and pertinent to anyone interested in economic change that has a positive impact on the environment

Breaking Free: A facilitator's guide to participatory action research practice Timothy Pyrch, 2012 Breaking Free is a practical guide to facilitating self directing educational processes into participatory action research PAR enabling average people to contribute what they can as active participants in research projects As such it is designed primarily for these participants rather than the academic researcher in order to introduce participants to authentic contributions they can make as activists in knowledge making processes At the same time Breaking Free guides academic researchers towards helpful practices enriching their often times lonely and isolated existence created by a false sense of objectivity A hands on practical yet disciplined approach to facilitating PAR prepares readers to craft their own individual Guide as they prepare for the PAR life This opens up the world of knowledge making to people long silenced by forces intent on controlling knowledge for the educated elite Breaking Free invites people to contribute as they can and be recognized for this contribution

The Little Big Number Dirk Philipsen, 2015-05-26 The story of GDP and why we need a better measurement of growth In one lifetime GDP or Gross Domestic Product has ballooned from a narrow economic tool into a global article of faith As The Little Big Number demonstrates this spells trouble While economies and cultures measure their performance by it GDP only measures output It ignores central facts such as quality costs or purpose Sustainability and quality of life are overlooked Losses don't count The world can no longer afford GDP rule GDP ignores real development Dirk Philipsen demonstrates how the history of GDP reveals unique opportunities to fashion smarter goals and measures The Little Big Number explores a possible roadmap for a future that advances quality of life rather than indiscriminate growth

Children and their Urban Environment Claire Freeman, Paul Tranter, 2012-10-02 In our fast changing urban world the impacts of social and environmental change on children are often overlooked Children and their Urban Environment examines these impacts in detail looking at the key activities spaces and experiences children have and how these can be managed to ensure that children benefit from change The authors highlight the importance of planners architects and housing professionals in creating positive environments for children and involving them in the planning process They argue that children's lives are becoming simultaneously both richer and more deprived and that despite apparently increasing wealth disparities between children are increasing further Each chapter includes international examples of good practice and policy innovations for redressing the balance in favour of child supportive environments The book seeks to embrace childhood as a time of freedom social engagement and environmental

adventure and to encourage creation of environments that better meet the needs of children The authors argue that in doing so we will build more sustainable neighbourhoods cities and societies for the future

The Axial Age and Its Consequences Robert N. Bellah, Hans Joas, 2012-10-31 This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce From Axial Age thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter A variety of utopian visions emerged and led to both reform and repression

Analyzing Collapse Miroslav Bárta, 2019-08-27 This book explores the long term trends in the development of what was the first complex civilization in history the Old Kingdom of Egypt c 2650 2200 BC the period that saw the construction of eternal monuments such as Djoser s Step Pyramid complex in Saqqara the pyramids of the great Fourth Dynasty kings in Giza and spectacular tombs of high officials throughout Egypt The present study aims to show that the historical trajectory of the period was marked by specific processes that characterize most of the world s civilizations the role of the ruling elite the growth of bureaucracy the proliferation of interest groups and adaptation to climate change to name but a few and the way that these processes held the germ of ultimate collapse The case is made that the rise and fall of the Old Kingdom state is of relevance to the study of the anatomy of development of any complex civilization

Manufacturing Green Prosperity Jon Rynn, 2010-07-12 This timely set of solutions based on a new theory of economics shows how America can reverse its inexorable economic decline and stop the bleeding of its middle class by rebuilding its manufacturing sector on a green basis Manufacturing Green Prosperity The Power to Rebuild the American Middle Class connects two critical issues the importance of manufacturing to the growth and fair distribution of national wealth and the need to create an environmentally sustainable society In so doing the book offers groundbreaking arguments demonstrating the centrality of manufacturing and shows ways in which creating a green economy will rebuild U S manufacturing and expand the middle class Drawing from the fields of political science economics ecology history engineering and philosophy the author challenges existing myths about manufacturing exposes the weaknesses of neoclassical economics and proposes a production centered alternative America he persuasively argues needs a sophisticated green manufacturing base in order to create an entirely new transportation and energy infrastructure one that will make cities ecologically sustainable prevent the worst effects of global warming protect vulnerable ecosystems and counter the depletion of oil coal and other critical natural resources

Standards, Emergence, and Complex Outcomes D. Linda Garcia, 2025-07-16 Standards Emergence and Complex Outcomes redefines how we think about standards framing them as interfaces that govern interactions and connect causes to their effects Expanding beyond traditional technical and geopolitical discussions Garcia introduces a fresh theoretical perspective that positions standards as central to understanding complexity From food safety and workplace regulations to standardized parts in manufacturing and our reliance on technology standards shape nearly every aspect of modern life By proposing a multidimensional approach Garcia argues that standards are the mechanisms driving change

complexity is the backdrop for this change emergence is the process by which change unfolds and evolution is its ultimate outcome Each chapter explores key elements of complexity theory and supports them with compelling historical and empirical examples providing a richly detailed narrative that deepens understanding This book is an essential resource for academics and students across the social sciences policymakers shaping standards dependent fields and professionals in industries where standards dictate progress Whether you re exploring the intersections of technology governance and complexity or looking to better navigate the systems shaping our world this book offers vital insights into the pivotal role of standards in our increasingly interconnected society

Social Resilience in the Neoliberal Era Peter A. Hall, Mich Le Lamont, 2013-04-22 What is the impact of three decades of neoliberal narratives and policies on communities and individual lives What are the sources of social resilience This book offers a sweeping assessment of the effects of neoliberalism the dominant feature of our times It analyzes the ideology in unusually wide ranging terms as a movement that not only opened markets but also introduced new logics into social life integrating macro level analyses of the ways in which neoliberal narratives made their way into international policy regimes with micro level analyses of the ways in which individuals responded to the challenges of the neoliberal era The product of ten years of collaboration among a distinguished group of scholars it integrates institutional and cultural analysis in new ways to understand neoliberalism as a syncretic social process and to explore the sources of social resilience across communities in the developed and developing worlds

The City of Grace David Wadley, 2019-11-29 In this sweeping appraisal of the urban condition David Wadley argues that anything less than high level resolution in modelling the well being of inhabitants is wasting precious time Humanity is encountering rising entropy caused by unsustainable economic and demographic expansion Supported by a strong interdisciplinary backdrop featuring systems and crisis theories The City of Grace tackles these obstacles by picturing gracious function and graceful form in a human scale settlement In an attempt to salvage things lost in the teleology of urban development over the last 100 years the outlook is both heterodox and contrarian How long can we all go on in the present way In addressing grace a more elevated concept than those focusing previous urban analyses this manifesto aims not to placate or please but instead to get humanity to face the encompassing realities it tries so hard to forget

Bioregionalism and Global Ethics Richard Evanoff, 2010-09-13 While a number of schools of environmental thought including social ecology ecofeminism ecological Marxism ecoanarchism and bioregionalism have attempted to link social issues to a concern for the environment environmental ethics as an academic discipline has tended to focus more narrowly on ethics related either to changes in personal values or behavior or to the various ways in which nature might be valued What is lacking is a framework in which individual social and environmental concerns can be looked at not in isolation from each other but rather in terms of their interrelationships In this book Evanoff aims to develop just such a philosophical framework one in which ethical questions related to interactions between self society and nature can be discussed across disciplines and from a variety of different perspectives The central problem his study investigates is the extent to which a dichotomized view of the relationship between nature and culture perpetuated in ongoing debates over anthropocentric vs ecocentric approaches to environmental ethics might be overcome through the adoption of a transactional perspective which offers a more dynamic and

coevolutionary understanding of how humans interact with their natural environments Unlike anthropocentric approaches to environmental ethics which often privilege human concerns over ecological preservation and some ecocentric approaches which place more emphasis on preserving natural environments than on meeting human needs a transactional approach attempts to create more symbiotic and less conflictual modes of interaction between human cultures and natural environments which allow for the flourishing of both

New Earth Politics Simon Nicholson, Sikina Jinnah, 2016-03-04

Prominent scholars and practitioners consider the role of global environmental politics in the face of increasing environmental stress Humanity's collective impact on the Earth is vast The rate and scale of human driven environmental destruction is quickly outstripping our political and social capacities for managing it We are in effect creating an Earth 2.0 on which the human signature is everywhere a new earth in desperate need of humane and insightful guidance In this volume prominent scholars and practitioners in the field of global environmental politics consider the ecological and political realities of life on the new earth and probe the field's deepest and most enduring questions at a time of increasing environmental stress Arranged in complementary pairs the essays in this volume include reflections on environmental pedagogy analysis of new geopolitical realities reflections on the power of social movements and international institutions and calls for more compelling narratives to promote environmental action At the heart of the volume is sustained attention to the role of traditional scholarly activities in a world confronting environmental disaster Some contributors make the case that it is the scholar's role to provide activists with the necessary knowledge and tools others argue for more direct engagement and political action All the contributors confront the overriding question What is the best use of their individual and combined energies given the dire environmental reality Contributors Erik Assadourian Frank Biermann Wil Burns Ken Conca Peter Dauvergne Daniel Deudney Navroz Dubash Richard Falk Joyeeta Gupta Maria Ivanova Peter Jacques Sikina Jinnah Karen T Litfin Michael F Maniates Elizabeth Mendenhall Simon Nicholson Kate O'Neill Judith Shapiro Paul Wapner Oran R Young

Future States Stephen Paul Haigh, 2016-04-15 Globalization consists of an interlocking array of political economic social and cultural forces that challenge the traditional international order in two key ways First states historically had hard shells by means of which they were capable of consolidating differences between inside and outside to the point where the latter could more easily be quarantined Second for closely related reasons they were largely able to absorb domestic society such that the individual was less a citizen than a subject But through globalizing processes these dubious attributes have been starkly exposed which leads Haigh to ask Whither the state under globalization Insightful and well written this book is sure to spark lively debate while attempting to answer its central question

The Quest for Security Joseph E. Stiglitz, Mary Kaldor, 2013-04-23 The essays in this collection boldly confront the quest for security arising from the social economic environmental and political crises and transformations of our century Joseph E Stiglitz and Mary Kaldor begin with an expansive balanced analysis of the global landscape and the factors contributing to the growth of insecurity Whereas earlier

studies have touched on how globalization has increased economic insecurity and how geopolitical changes may have contributed to military insecurity this volume looks for some common threads in a globalized world without a global government with a system of global governance not up to the task how do we achieve security without looking inward and stepping back from globalization In each of their areas of expertise contributors seek answers to questions about how we achieve protection of those people who are most insecure without resorting to economic military or mafia protectionism Some have suggested that the turmoil in the Eurozone proves the deficiencies in the welfare state This book argues that the superior performance of Scandinavian countries arises from their superior systems of social protection which allow their citizens to undertake greater risk and more actively participate in globalization Some suggest that we can address terrorism or transnational crimes through the strengthening of borders or long distance wars This book develops the proposition that such approaches have the opposite effect and that only through spreading the human security experienced in well ordered societies can these dangers be managed This book also examines how these global changes play out not only in the relations among countries and the management of globalization but at every level of our society especially in our cities It explores the potential for cities to ensure personal security promote political participation and protect the environment in the face of increasing urbanization

Complex Ecology Charles G. Curtin, Timothy F. H. Allen, 2018-05-31 From climate change to species extinction humanity is confronted with an increasing array of societal and environmental challenges that defy simple quantifiable solutions Complexity based ecology provides a new paradigm for ecologists and conservationists keen to embrace the uncertainty that is pressed upon us This book presents key research papers chosen by some sixty scholars from various continents across a diverse span of sub disciplines The papers are set alongside first person commentary from many of the seminal voices involved offering unprecedented access to experts viewpoints The works assembled also shed light on the process of science in general showing how the shifting of wider perspectives allows for new ideas to take hold Ideal for undergraduate and advanced students of ecology and conservation their educators and those working across allied fields this is the first book of its kind to focus on complexity based approaches and provides a benchmark for future collected volumes
