How has the US Intelligence Community evolved in the modern international security environment? Francis Maiava, 2016-02-25 Essay from the year 2014 in the subject Politics Topic Peace and Conflict Security grade 84% A course Masters in International Security Studies with an Endorsement in Intelligence language English abstract Major historical developments continued to shape the way the United States Intelligence Community IC practices intelligence since its creation under the authority of the National Security Act 1947 This work seeks to explore historical significance of events and themes that influenced the way United States intelligence agencies exchanged information or the lack of it in a chronological and historical order to its present context The study also examines the role of Congress in overseeing the IC and its activities and how this role has evolved over the years

amid challenges such as its relationship with the Executive Branch of U S Government budget oversight and the classified nature of highly sensitive information The study closes by concluding that while much needed changes have been adopted by the IC to improve its activities and operations since 11 September 2001 time will tell whether such changes have improved the ability of intelligence to function as an effective and cohesive unit The U.S. Intelligence Community After 9/11 ,2012

Agency,2012-08-01 In the wake of 11 September 2001 the issue of homeland security spawned a vibrant public discussion about the need to coordinate a wide range of federal governmental activities to achieve greater security for the United States

Congress enacted laws that established a new executive department the Department of Homeland Security and a new federal intelligence chief the director of national intelligence In both cases the objective was to integrate activities of disparate organizations better in order to improve critical government functions In fact for more than half a century there have been numerous efforts to enhance cooperation among the many parts of the nation s intelligence establishment under the leadership of a principal intelligence official called the director of central intelligence The story of this study is what the nation s leaders expected of directors of central intelligence in accomplishing this task and how those who held the responsibility attempted to carry it out The hope is that lessons drawn from that experience can inform today s ongoing debate about how best the new director of national intelligence can accomplish America s national intelligence mission The study presents an unusual perspective Examinations of past intelligence performance often focus on how intelligence has played a role in specific circumstances Studies of directors of central intelligence have usually stressed how they led the Central Intelligence Agency conducted their relationships with the president or affected US policy No study until this one has focused on how each director sought to fulfill his community role This book was prepared under the auspices of the Center for the Study of Intelligence by Dr Douglas F Garthoff a former CIA analyst and senior manager It reflects the author s deep experience in Intelligence Community affairs as well as his extensive research and interviews Dr Garthoff s study represents a valuable contribution to our professional literature and a rich source of insights at a moment when the responsibilities and authorities of the Intelligence Community s senior leadership are again in the public spotlight

Eyes on Spies Amy B. Zegart, 2013-09-01 Amy Zegart examines the weaknesses of US intelligence oversight and why those deficiencies have persisted despite the unprecedented importance of intelligence in today s environment She argues that many of the biggest oversight problems lie with Congress the institution not the parties or personalities showing how Congress has collectively and persistently tied its own hands in overseeing intelligence

Report on the Intelligence on the U.S. Intelligence Community's Prewar Intelligence Assessments on Iraq , July 9, 2004, Ordered Reported on July 7, 2004 United States. Congress. Senate. Select Committee on Intelligence, S Rept 108 301 Unclassified edition Together With Additional Views Provides the Senate and the American public with a substantial record of the facts underlying the conclusions of the Committee regarding the intelligence community s prewar assessments of Iraq s programs for weapons of mass destruction and its ties to terrorism Some text is blacked out 108th Congress 2d Session Jacket 94 712 PDF

Transforming U.S. Intelligence Jennifer E. Sims, Burton Gerber, 2005-08-24 The intelligence failures exposed by the events of 9 11 and the missing weapons of mass destruction in Iraq have made one thing perfectly clear change is needed in how the U S intelligence community operates Transforming U S Intelligence argues that transforming intelligence requires as much a look to the future as to the past and a focus more on the art and practice of intelligence rather than on its bureaucratic arrangements In fact while the recent restructuring including the creation of the Department of Homeland Security may

solve some problems it has also created new ones The authors of this volume agree that transforming policies and practices will be the most effective way to tackle future challenges facing the nation s security This volume s contributors who have served in intelligence agencies the Departments of State or Defense and the staffs of congressional oversight committees bring their experience as insiders to bear in thoughtful and thought provoking essays that address what such an overhaul of the system will require In the first section contributors discuss twenty first century security challenges and how the intelligence community can successfully defend U S national interests The second section focuses on new technologies and modified policies that can increase the effectiveness of intelligence gathering and analysis Finally contributors consider management procedures that ensure the implementation of enhanced capabilities in practice Transforming U S Intelligence supports the mandate of the new director of national intelligence by offering both careful analysis of existing strengths and weaknesses in U S intelligence and specific recommendations on how to fix its problems without harming its strengths These recommendations based on intimate knowledge of the way U S intelligence actually works include suggestions for the creative mixing of technologies with new missions to bring about the transformation of U S intelligence without incurring unnecessary harm or expense The goal is the creation of an intelligence community that can rapidly respond to developments in international politics such as the emergence of nimble terrorist networks while reconciling national security requirements with the rights and liberties of American citizens

Why Efforts to Centralize the US Intelligence Community Fail

DANIEL B. JONES, 2025-05-22 Prior to World War II the formal collection and exploitation of foreign intelligence in the United States fell almost exclusively in the domain of the military The attack on Pearl Harbor and other events during that war created a growing consensus that the nation required a central authority to manage national intelligence pertinent to multiple departments of the government In response the national security act of 1947 created the central intelligence agency and the position of director of central intelligence Over the next half century numerous commissions and panels found neither the agency nor the director ever wielded effective control over the diverse and growing intelligence community In response to such findings presidents issued National Security Council directives and executive orders and congress signed multiple bills to reinforce the CIA and DCI s authority over the intelligence community but the problems of decentralization persist The terrorist attack of 9 11 provided sufficient impetus to make the first significant structural changes to the failed us intelligence community since 1947 To evaluate the prospects of the national intelligence reform act of 2004 to establish effective central control over the community it is helpful to identify the factors that frustrated previous reform efforts This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and

Intelligence Information
Richard A. Best, Jr., 2011-07-06 Unauthorized disclosures of classified intelligence are seen as doing significant damage to U S security This is the case whether information is disclosed to a foreign government or published on the Internet On the other hand if intelligence is not made available to government officials who need it to do their jobs enormous expenditures on collection analysis and dissemination are wasted These conflicting concerns require careful and difficult balancing

Investigations of the 9 11 attacks concluded that both technical and policy barriers had limited sharing of information collected by different agencies that if viewed together could have provided useful insight into the unfolding plot A consensus emerged that U S intelligence agencies should share information more widely in order that analysts could integrate clues acquired by different agencies in order to connect the dots This report focuses on information acquired analyzed and disseminated by agencies of the U S Intelligence Community but these concerns also affect classified information outside the Intelligence Community
