The Violence Of Normal Times Essays On Womens Lived Realities:

The Violence of Normal Times Kalpana Kannabirān, 2005 This volume looks at the experience and articulation of violence against women in relation to feminist debates and organising on the issue and the positive negative responses to that articulation particularly from the standpoint of law and the institutional apparatuses of the state Its several essays focus on everyday settings from justice dispensed by traditional authorities to modern courtrooms domestic spaces a home for mentally disabled women in Pune a factory in Tamil Nadu Moving from the routine to the extraordinary the essays analyse the spectrum of violence against women that covers witch hunting in Adivasi communities structural adjustment programmes and economic violence against sexually marginalised groups and against women of religious and ethnic minorities Read together they expose the extent of systemic violence against women in India a violence so routine that everyday forms of it slide into the gross and macabre in a seamless continuum *Gender, Law and Justice in a Global Market* Ann

Stewart, 2011-08-25 Theories of gender justice in the twenty first century must engage with global economic and social processes Using concepts from economic analysis associated with global commodity chains and feminist ethics of care Ann Stewart considers the way in which gender contracts relating to work and care contribute to gender inequalities worldwide She explores how economies in the global north stimulate desires and create deficits in care and belonging which are met through transnational movements and traces the way in which transnational economic processes discourses of rights and care create relationships between global south and north African women produce fruit and flowers for European consumption body workers migrate to meet deficits in affect through provision of care and sex British Asian families seek belonging through transnational marriages *The Routledge International Handbook of Criminology and Human Rights*

Leanne Weber, Elaine Fishwick, Marinella Marmo, 2016-08-25 The Routledge International Handbook of Criminology and Human Rights brings together a diverse body of work from around the globe and across a wide range of criminological topics and perspectives united by its critical application of human rights law and principles This collection explores the interdisciplinary reach of criminology and is the first of its kind to link criminology and human rights This text is divided into six sections each with an introduction and an overview provided by one of the editors The opening section makes an assessment of the current standing of human rights within the discipline Each of the remaining sections corresponds to a substantive area of harm prevention and social control which together make up the main core of contemporary criminology namely criminal law in practice transitional justice peacemaking and community safety policing in all its guises traditional and emerging approaches to criminal justice and penalty both within and beyond the prison This Handbook forms an authoritative foundation on which future teaching and research about human rights and criminology can be built This multi disciplinary text is an essential companion for criminologists sociologists legal scholars and political scientists *Women, Political Struggles and Gender Equality in South Asia* M. Alston, 2014-08-07 A brutal gang rape of a young woman in India in

2012 caused a global outcry against rising brutal violence against women. In response to the young woman's death and the protests that followed, the contributors analyze the position of women in South Asia, the issue of violence against women's political activism and gender inequalities. Tools of Justice Kalpana Kannabiran, 2013-02-01. In the years since independence, the Indian subcontinent has witnessed an alarming rise in violence against marginalized communities with an increasing number of groups pushed to the margins of the democratic order. Against this background of violence, injustice, and the abuse of rights, this book explores the critical insurgent possibilities of constitutionalism as a means of revitalising the concepts of non-discrimination and liberty and of reimagining democratic citizenship. The book argues that the breaking down of discrimination in constitutional interpretation and the narrowing of the field of liberty in law deepen discriminatory ideologies and practices. Instead, it offers an intersectional approach to jurisprudence as a means of enabling the law to address the problem of discrimination along multiple intersecting axes. The argument is developed in the context of the various grounds of discrimination mentioned in the constitution: caste, tribe, religious minorities, women, sexual minorities, and disability. The study draws on a rich body of materials, including official reports, case law, and historical records, and uses insights from social theory, anthropology, literary and historical studies, and constitutional jurisprudence to offer a new reading of non-discrimination. This book will be useful to those interested in law, sociology, gender studies, politics, constitutionalism, disability studies, human rights, social exclusion, etc.

Kalpana Kannabirān, Ritu Menon, 2007. From the late 1970s to the present, feminists in India have had to deal with spiralling violence against women and the alarming ramifications of its forms, as well as assess their strategies to combat it. This monograph reviews twenty-five years of protest and action by them in an attempt to take both our analysis and theories forward. It maps the trajectory of feminist organising in India in the post-Emergency period after 1977: the paths of legal reform and the points at which they have intersected with or resulted from feminist campaigns; the texture of campaigns and the creativity with which women's groups have fashioned and sustained difficult struggles against violence; the persistence of feminist interventions and the ways in which different groups have been able to tilt the balance in favour of women in perceptible ways; and the escalation of collective violence increasingly by agents of the state against women. Notwithstanding the diversity of formal political affiliations and theoretical analyses within the women's movement, the last twenty-five years have seen the evolution of a minimum consensus that categorically rejects any rationalisation of violence against women, even while recognising its complexity.
