Bodenhamer,2012-08-15 The framers of the Constitution chose their words carefully when they wrote of a more perfect union not absolutely perfect but with room for improvement Indeed we no longer operate under the same Constitution as that ratified in 1788 or even the one completed by the Bill of Rights in 1791 because we are no longer the same nation In The Revolutionary Constitution David J Bodenhamer provides a comprehensive new look at America s basic law integrating the

latest legal scholarship with historical context to highlight how it has evolved over time The Constitution he notes was the product of the first modern revolution and revolutions are by definition moments when the past shifts toward an unfamiliar future one radically different from what was foreseen only a brief time earlier In seeking to balance power and liberty the framers established a structure that would allow future generations to continually readjust the scale Bodenhamer explores this dynamic through seven major constitutional themes federalism balance of powers property representation equality rights and security With each he takes a historical approach following their changes over time For example the framers wrote multiple protections for property rights into the Constitution in response to actions by state governments after the Revolution But twentieth century courts and Congress redefined property rights through measures such as zoning and the designation of historical landmarks diminishing their commercial value in response to the needs of a modern economy The framers anticipated just such a future reworking of their own compromises between liberty and power With up to the minute legal expertise and a broad grasp of the social and political context this book is a tour de force of Constitutional history and analysis
