While many alternative pathway teachers know what content they must teach, many have never had classes on how to teach the content using evidence-based practices. This infographic is a quick reference guide containing evidence-based practices that can impact learning that teachers can use daily to support effective instruction.

Principles of instruction

Research-based strategies that all teachers should know

- 1 Begin lessons with short reviews of previous learning.
- 2 Present new material in small amounts; assist students as they practice this material.
- 3 Ask many questions and observe student responses; questions allow students to connect new material with prior learning.
- 4 Provide models such as step-by-step demonstrations or think alouds to work out the problem.
- 5 Guide student practice by asking good questions and providing feedback.
- 6 Check that students understand the material; doing so can help students learn with fewer errors.
- 7 Obtain a high success rate (~ 80%) through teaching in small steps, guiding practice, and employing mastery learning techniques.
- 8 Provide scaffolds, or temporary supports, for difficult material.
- 9 Prepare students for and monitor independent practice; ample independent practice is necessary for skills and knowledge to become automatic.
- 10 Engage students in weekly and monthly reviews of past material.
