Cocaine, Death Squads, and the War on Terror Oliver Villar, Drew Cottle, 2011 Since the late 1990s the United States has funneled billions of dollars in aid to Colombia ostensibly to combat the illicit drug trade and State Department designated terrorist groups The result has been a spiral of violence that continues to take lives and destabilize Colombian society This book asks an obvious question are the official reasons given for the wars on drugs and terror in Colombia plausible or are there other deeper factors at work Scholars Villar and Cottle suggest that the answers lie in a close examination of the cocaine trade particularly its class dimensions Their analysis reveals that this trade has fueled extensive economic growth and led to the development of a narco state under the control of a narco bourgeoisie which is not interested in eradicating cocaine but in gaining a monopoly over its production The principal target of this effort is the Revolutionary Armed Forces of Colombia FARC who challenge that monopoly as well as the very existence of the Colombian state Meanwhile U S business interests likewise gain from the cocaine trade and seek to maintain a dominant imperialist relationship with their most important client state in Latin America Suffering the brutal consequences as always are the peasants and workers of Colombia This revelatory book punctures the official propaganda and shows the class war underpinning the politics of the Colombian cocaine trade **Drug Decriminalization and Legalization** Aharon W. Drug War Heresies Robert J. MacCoun, Peter Reuter, 2001-08-27 This book provides the first multidisciplinary and nonpartisan analysis of how the United States should decide on the legal status of cocaine heroin and marijuana It draws on data about the experiences of Western European nations with less punitive drug policies as well as new analyses of America s experience with legal cocaine and heroin a century ago and of America s efforts to regulate gambling prostitution alcohol and cigarettes It offers projections on the likely consequences of a number of different legalization regimes and shows that the choice about how to regulate drugs involves complicated tradeoffs among goals and conflict among social groups The book presents a sophisticated discussion of how society should deal with the uncertainty about the consequences of legal change Finally it explains in terms of individual attitudes toward risk why it is so difficult to accomplish substantial reform of drug policy in America
