The Villas of Palladio Donata Battilotti, 1990 [The Villas of Palladio](#) Vincent Scully, 1992 Andrea Palladio 1508 1580 may well be the single most influential architect ever and by conspicuously adopting his vocabulary Michael Graves Philip Johnson and the post modernists have made him a byword for the 1980s and 1990s This book contains photographs of Palladio s country houses

Palladio, the Villa and the Landscape Gerrit Smienk, Johannes Niemeijer, 2011 Studies the relationship between Palladian villas in the Veneto and the landscape demonstrating how each was sited to enhance the drama of the overall architectural ensemble

sixteenth century Palladio articulated the villas as small towns piccole citt that formed a unit with adjacent service buildings and farm fields Within their walls lived a multitude of people of all ages social backgrounds and various skills They were the venue for significant moments of public life In these houses the principles of hygiene privacy and comfort which we consider essential today did not apply furniture as such did not exist Living with Palladio in the Sixteenth Century investigates how Palladio s houses their floors rooms and measurements are designed to structure the life of such a heterogeneous family of people It analyzes their hierarchical structure with the owner padrone at the top and everyone involved in the everyday running of the household famiglia minuta at the bottom This book fills a decisive gap in research literature on the famous Italian architect by looking at how Palladio prioritized the domestic functions of his private buildings **Palladio's Italian Villas** , Provides information on Italian architect Andrea di Pietro della Gondola known as Palladio 1508 1580 and his 18 Renaissance villas around Venice Italy Notes that many are open to the public Contains biographical information on Palladio and describes the architectural features of the villas Includes a map of the villa locations Offers access to photographs and touring information for some of the villas **A Traveler's Guide to the Villas of Palladio** Christopher J. Kern,1989

The Villas of Andrea Palladio Cheryl Mihalko,1992 **The Villas of Palladio, Text by Vincent Scully** Vincent Scully,1986 **Reconstructing Palladio's Villas** Lawrence Sass,2000 The thesis is a presentation of a method of reconstruction using a computational device to represent and evaluate two of Palladio s un built villas in three dimensions The first of The Four Books of Architecture contains text and images explaining Palladio s design and construction systems in the form of text and graphic rules These design guidelines or rules were written for the masons and craftsmen of the 16th century offering one and two dimensional data on each of Palladio s villas palaces and churches The text only offers general treatment of the villas it missing construction data and rules needed to execute a full reconstruction of an un built building Many have attempted to reconstruct Palladio s work in drawings wooden models and computation This thesis presents a new method of reconstruction through the definition of construction rules in addition to shape and proportional rules defined by previous scholars This reconstruction of the Villa Trissino in Meledo and the Villa Mocenigo on the Brenta River in the form of physical models cad drawings and computer renderings from fragmented information offered in the Four Books The end product will serve as a method for reconstruction in the form of a three dimensional analysis of Palladio s design and construction rules and a demonstration of the new rules through the two reconstructions The work began with a pilot study focused on modeling Palladio s villas in three dimensions with little detail The next step was to reconstruct one villa in detail following the rules which called for a complete rewriting of the rules from the Four Books of Architecture These rewritten rules are applied to a simple floor plan and elevation drawing in order to reconstruct Palladio s original sketch in a CAD environment The reconstructed sketches were used to create a three dimensional CAD file by construction rules Afterward three dimensional prints two dimensional drawings and renderings were created from the model for evaluation The final

results of each study contain textural as well as visual information on the reconstruction of two un built villas The conclusions demonstrate how the results can be transformed into a full three dimensional shape grammar composed of shape proportion and construction rules
