Tropical Warfare in the Asia-Pacific Region, 1941-45 Kaushik Roy, 2017-10-25 This is the first book to provide a comprehensive overview of the land war during the Second World War in South East Asia and the South and South West Pacific The extensive existing literature focuses on particular armies Japanese British American Australian or Indian and or on particular theatres the Philippines Papua New Guinea Malaya or Burma This book on the contrary argues that warfare in all the theatres was very similar especially the difficulties of the undeveloped terrain and that there was considerable interchange of ideas between the allied armies which enabled the spread of best practice among them The book considers tactics training technology and logistics assesses the changing state of the combat effectiveness of the different armies and traces the course of the war from the Japanese Blitzkrieg of 1941 through the later stalemate and the hard fought Allied fightback Although the book concentrates on ground forces due attention is also given to air forces and amphibious operations One important argument put forward by the author is that the defeat of the Japanese was not inevitable and that it was brought about by chance and considerable tactical ingenuity on the part of US and British imperial forces **Political**

Military Thought of Asia Kaushik Roy,2020-11-04 Military Thought of Asia challenges the assertion that the generation of rational secular ideas about the conduct of warfare is the preserve of the West by analysing the history of ideas of warfare in Asia from the ancient period to the present The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions The book considers the systematic and tight representation of ideas by famous figures including Kautlya and Sun Tzu At the same time it also highlights publications on military affairs by small men like mid ranking officers and scattered ideas regarding the origin nature and societal impact of organised violence present in miscellaneous sources like coins inscriptions paintings and fictional literature In so doing the book fills a historiographical gap in scholarship on military thought which marginalises Asia to the part of cameo and historicises the evolution of theory and the praxis of warfare The volume shows that the East has a long unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age It is essential reading for those interested in the evolution of military thought throughout history particularly in Asia
