Salisbury, 2000-08 A social history within a political and cultural framework The West in the World looks at the development of western civilization within the context of the rest of the world Rather than treating the evolution of western civilization as an isolated event Sherman and Salisbury examine how the west evolved in time with and often as a response to the events that shaped civilizations around the globe In addition to setting the history of western civilization in context this groundbreaking new text distinguishes itself from standard survey texts by being the first to fully integrate visual history with traditional narrative style Readers glimpse the true craft of the historian through integrated discussions of the visual program in the book throughout the text the authors address how the paintings sculpture and other art of the times serve as primary sources in informing the reader about that period in history In addition to drawing the art program into the text The West in the World includes visual learning tools such as Thinking about Geography maps with guiding questions and timelines at the beginning and end of each chapter The West in the World also offers complete coverage of western civilization in a midsize book this unique length provides more detailed and comprehensive coverage than brief books but is not as exhaustive and unmanageable as larger survey texts **Study Guide for the West** A. Daniel Frankforter, William M. Spellman, 2008-12-01 *The Classical Plot and the Invention of Western Narrative* N. J. Lowe, 2000-06-01 From Homer to Hollywood the western storytelling tradition has canonised a distinctive set of narrative values characterised by tight economy and closure This book traces the formation of that classical paradigm in the development of ancient storytelling from Homer to Heliodorus To tell this story the book sets out to rehabilitate the idea of plot notoriously disconnected from any recognised system of terminology in literary theory The first part of the book draws on developments in narratology and cognitive science to propose a way of formally describing the way stories are structured and understood This model is then used to write a history of the emergence of the classical plot type in the four ancient genres that shaped it Homeric epic fifth century tragedy New Comedy and the Greek novel with insights into the fundamental narrative poetics of each **The West** A.
