Treatment Of Primary Glomerulonephritis Treatment Of Primary Glomerulonephritis:

Treatment of Primary Glomerulonephritis Claudio Ponticelli, Richard J. Glassock, 2009-05-14 Primary glomerulonephritis is a common renal disease which may eventually lead to chronic renal failure Treatment of glomerulonephritis is difficult In particular the use of glucocorticoids and immunosuppressive drugs require expertise knowledge of the drugs and careful monitoring of the patient Paradoxically the treatment of glomerulonephritis has become even more complicated in the recent years after the introduction of a number of newer immunosuppressive drugs Extensively updated since publication of the first edition in 1997 this comprehensive yet concise guide to the treatment of even the most complex patients with primary glomerular diseases is full of practical information collected and organized in an easy to read manner It encompasses the possible treatments of the different types of primary glomerulonephritis including diseases intrinsic to the kidney of unknown or uncertain aetiology Each of the main chapters is devoted to a single primary glomerulonephritis and follows a similar format to allow easy access of information The book contains not only an evidence based review of the topic but also practical recommendations from internationally recognized experts in the field

Treatment of Primary Glomerulonephritis Claudio Ponticelli, Richard J. Glassock, 1997 Primary glomerulonephritis is one of the most common kidney diseases and a frequent cause of kidney failure Treatment of this disease is a constant concern for the clinician as there are no precise guidelines available This book brings together for the first time information on all aspects of primary glomerulonephritis It reports in detail the characteristics of the drugs used in treatment gives a critical review of the results obtained from the trials of different drugs and provides practical recommendations for the clinician

New Insights into Glomerulonephritis N. Chen, 2013-05-13 Chinese Asian and global perspectives Chronic kidney disease is a global major health issue that ultimately leads to end stage renal disease a devastating condition requiring costly renal replacement therapy Given this background extensive understanding of the pathogenesis of the disease and exploring novel therapeutic targets will help to alleviate disease progression improve prognosis and reduce its impact on the global economic burden Currently primary glomerulonephritis is the leading cause of chronic kidney disease and end stage renal disease in China and many other countries Recently there has been much progress with regard to pathogenesis as well as treatment of primary glomerulonephritis Clinical data from Chinese studies have significantly contributed to the making of international guidelines and histological classifications of the disease This book focuses on the cutting edge knowledge and provides up to date information on primary glomerulonephritis Topics covered are IgA nephropathy focal segmental glomerulosclerosis membranous nephropathy membranoproliferative glomerulonephritis and crescentic glomerulonephritis
