Treatment And Rehabilitation Of Severe Mental Illness:

Treatment and Rehabilitation of Severe Mental Illness William Delbert Spaulding, Mary Elizabeth Sullivan, Jeffrey S. Poland, 2003-01-24 Synthesizing the growing body of biomedical and psychosocial research on the nature and treatment of severe mental illness this volume presents an innovative framework for planning and implementing effective rehabilitation services An integrative model of case formulation is described that conceptualizes the individual's recovery on multiple levels physiological cognitive interpersonal behavioral and environmental The authors draw on outcome research and extensive clinical experience to identify interventions of known effectiveness including psychopharmacology functional assessment behavioral analysis and cognitive therapies Outlining a comprehensive approach to assessment treatment and progress evaluation the book also provides practical recommendations for program development and staff training A broad range of professionals involved in treatment and rehabilitation of people with severe mental illness including clinical psychologists neuropsychologists and psychiatrists as well as advanced students in these areas Also of interest to nurses hospital administrators and social workers *Caring for People with Severe Mental Disorders* United States. National Advisory Mental Health Council, 1991 **Issues in Community Treatment of Severe Mental Illness** American Psychiatric Association, H. Richard Lamb, 1999 The book is a compendium of articles from Psychiatric Services on issues in community treatment of severe mental illness *Principles and Practice of Psychiatric Rehabilitation* Patrick W. Corrigan, Kim T. Mueser, Gary R. Bond, Robert E. Drake, Phyllis Solomon, 2012-08-22 This comprehensive authoritative text provides a state of the art review of current knowledge and best practices for helping adults with psychiatric disabilities move forward in their recovery process The authors draw on extensive research and clinical expertise to accessibly describe the whats whys and how tos of psychiatric rehabilitation Coverage includes tools and strategies for assessing clients needs and strengths integrating medical and psychosocial interventions and implementing supportive services in such areas as housing employment social networks education and physical health Detailed case examples in every chapter illustrate both the real world challenges of severe mental illness and the nuts and bolts of effective interventions **Psychological Assessment And Treatment Of Persons With Severe Mental disorders** Jeffrey R. Bedell, 2013-02-01 First published in 1994 Until recently patients with severe and long lasting mental disorders were treated primarily through hospitalisation and psychotropic medication However now there is a concerted effort to integrate treatment approaches from behavioural and rehabilitation therapies and social skills training This book presents an integration of psychological treatment and assessment practices authored by professionals with established expertise in their subject area Topics of fundamentally important issues have been selected and divided into three sections assessment and treatment planning social and vocational skills development and group and family therapy in rehabilitation This volume can be used as a reference handbook a guide to clinical practice or a classroom text describing the basic psychological approaches that are effective with patients with

severe mental disabilities **New Models of Care for Patients with Severe Mental Illness - Bridging In- and Outpatients** Martin Heinze,Yasser Khazaal,Alexandre Wullschleger,2018-03-13 Over the past years psychiatric services have been continuously faced with the challenge of providing comprehensive care to people suffering from severe mental illnesses Legal and conceptual advances like the UN convention on the rights of persons with disabilities or the concept of recovery have rendered this challenge more actual and urgent than ever However psychiatric institutions often show only low levels of cooperation and integration between their different services Hence they need to develop new ways of bridging all sectors of care in order to help people most in need on their way to recovery and full inclusion in society In this research topic European researchers and clinicians present new ways of dealing with this essential issue by developing strategies and interventions on both institutional and non institutional levels The nine contributions of this ebook thus reflect actual clinical and conceptual considerations They all aim at improving quality of care and providing adequate support to people suffering from severe mental illness *A Guide to Treatments that Work* Peter E. Nathan,Jack M. Gorman,2007-03-15 Much about this third edition of *A Guide to Treatments That Work* remains as it was in the first and second editions Like its predecessors this edition offers detailed evaluative reviews of current research on empirically supported treatments written in most instances by clinical psychologists and psychiatrists who are major contributors to that literature Similarly the standards by which the authors were asked to evaluate the methodological rigor of the research on treatments have also remained the same As before they provide information on the quality of the research on treatment efficacy and effectiveness that is reviewed *Multimodal Treatment of Acute Psychiatric Illness* Justin M Simpson,Glendon L Moriarty,2013-12-03 The multimodal treatment of acute psychiatric illness involves a set of integrated systematic interventions that stabilize individuals with severe mental illness and help them avoid unnecessary psychiatric hospitalization This volume focuses on those suffering from schizophrenia schizoaffective disorder bipolar disorder major depressive disorder severe anxiety and substance dependence and provides individual practitioners and professional teams with the tools for responding to crisis and delivering acute care The authors bolster the text with real world case examples helpful diagrams and printable worksheets *Empowering People with Severe Mental Illness* Donald M. Linhorst,2006 This is the first professional guide that operationalizes the theory of empowerment outlines the conditions under which it is likely to occur and applies a practical model for working with people with severe mental illness **American Rehabilitation** ,2004 *A Working Life for People with Severe Mental Illness* Deborah R. Becker,Robert E. Drake,2003-06-12 Traditional approaches to vocational rehabilitation such as skills training classes job clubs and sheltered employment have not been successful in helping people with severe mental illness gain competitive employment Supported employment in which clients are placed in jobs and then trained by on site coaches is a radically new conceptual approach to vocational rehabilitation designed for people with developmental disabilities The Individual Placement and Support IPS method utilizes the supported employment concept but

modifies it for use with the severely mentally ill. It is the only approach that has a strong empirical research base. Rates of competitive employment are 40% or more in IPS programs compared to 15% in traditional mental health programs. The third volume in the Innovations in Practice and Service Delivery with Vulnerable Populations series will be extremely useful to students in psychiatric rehabilitation programs and social work classes dealing with the severely mentally ill as well as to practitioners in the field.

Evidence-Based Practices in Mental Health Care American Psychiatric Association, 2008-05-20

As the first attempt to synthesize the movement toward widespread implementation of evidence-based mental health practices, this groundbreaking collection articulates the basic tenets of evidence-based medicine and shows how practices proven effective by clinical services research could improve the lives of many people. Intended to stimulate much-needed public discussion, these remarkable contributions cover both general issues such as implementing practices in routine mental health settings, including strategies for disseminating evidence-based practices to staff members; ensuring that efforts to implement such practices are informed by the knowledge and experience of administrators, clinicians, patients, and advocates; integrating evidence-based practices with the recovery model and focusing on guidelines and algorithms for pharmacologic treatment of people with severe mental illness; identifying the policy implications of the movement, particularly in public sector settings; and describing eight courses of action for addressing the gap between science and practice and specific practices such as describing critical components of practices for which substantial evidence exists, such as supported employment, dual diagnosis services, and assertive community treatment; developing an evidence base for particular populations such as children and adolescents and geriatric patients and for clinical subgroups such as patients with severe mental illness and posttraumatic stress disorder; and implementing a range of practices for each population. Debate in public forums is critical to explaining the benefits of evidence-based care and allaying the fears of patients, practitioners, administrators, policy makers, and vested interest groups that evidence-based care excludes them from the decision-making process. Patients need to know that their individual characteristics, preferences, and autonomy are highly valued and won't be discounted by rigid adherence to the particular treatments. Practitioners need to know about the credibility of the evidence base and about new techniques and responsibilities and to understand that their favorite practices won't necessarily be excluded during initial attempts to implement evidence-based practices. Administrators and policy makers need to know about financing, organizing, implementing, and sustaining new practices. Finally, vested interest groups need to know that the introduction of evidence-based practices doesn't mean that what they do now is ineffective. This unique and densely informative volume will be welcomed by mental health care professionals and by lawmakers, planners, administrators, and others who are charged with the responsibility of providing effective care to vulnerable populations.
