Atlantic Ocean Kenneth O. Emery, Elazar Uchupi, 2012-12-06 The explosion of interest effort and information about the ocean since about 1950 has produced many thousand scientific articles and many hundred books In fact the outpouring has been so large that authors have been unable to read much of what has been published so they have tended to concentrate their own work within smaller and smaller subfields of oceanography Summaries of information published in books have taken two main paths One is the grouping of separately authored chapters into symposia type books with their inevitable overlaps and gaps between chapters The other is production of lightly researched books containing drawings and tables from previous publications with due credit given but showing assembly line writing with little penetration of the unknown Only a few books have combined new and previous data and thoughts into new maps and syntheses that relate the contributions of observed biological chemical geological and physical processes to solve broad problems associated with the shape composition and history of the oceans Such a broad synthesis is the objective of this book in which we tried to bring together many of the pieces of research that were deemed to be of manageable size by their originators The composite may form a sort of plateau above which later studies can rise possibly benefited by our assembly of data in the form of new maps and figures
