Vanadium Dioxide-Based Thermochromic Smart Windows Yi Long, Yanfeng Gao, 2021-05-27 The usage of building energy accounts for 30 40% of total energy consumption in developed countries exceeding the amount for industry or transportation Around 50% energy for building services is contributed by heating ventilation and air conditioning HVAC systems More importantly both building and HVAC energy consumptions are predicted to increase in the next two decades Windows are considered as the least energy efficient components of buildings Therefore smart windows are becoming increasingly important as they are capable of reducing HVAC energy usage by tuning the transmitted sunlight in a smart and favoured way blocking solar irradiation on hot days while letting it pass through on cold days Compared with other type of smart windows thermochromic windows have the unique advantages of cost effectiveness

rational stimulus and passive response This book covers fabrication of vanadium dioxide based smart windows discusses various strategies to enhance their performance and shares perspectives from the top scientists in this particular field

Roll-to-Roll Vacuum Deposition of Barrier Coatings Charles A. Bishop, 2015-08-28 It is intended that the book will be a practical guide to provide any reader with the basic information to help them understand what is necessary in order to produce a good barrier coated web or to improve the quality of any existing barrier product After providing an introduction where the terminology is outlined and some of the science is given keeping the mathematics to a minimum including barrier testing methods the vacuum deposition process will be described In theory a thin layer of metal or glass like material should be enough to convert any polymer film into a perfect barrier material The reality is that all barrier coatings have their performance limited by the defects in the coating This book looks at the whole process from the source materials through to the post deposition handling of the coated material This holistic view of the vacuum coating process provides a description of the common sources of defects and includes the possible methods of limiting the defects This enables readers to decide where their development efforts and money can best be used to improve the barrier performance of their own process or materials The 2nd edition contains at least 20% new material including additional barrier testing techniques that have been developed and testing and cleaning equipment brought to market since the 1st edition was published in 2010 The topic of adhesion is covered in more detail and there is a section on the Hansen Solubility Parameter which is a method of predicting the solubility of gases or liquids in materials Metals Abstracts ,1998 Finishing Abstracts ,1971 Thomas Register of American Manufacturers ,2003 Vols for 1970 71 includes manufacturers catalogs **Appita** ,1983 Thomas Register of American Manufacturers ,2002 This basic source for identification of U S manufacturers is arranged by product in a large multi volume set Includes Products services Company profiles and Catalog file *Paper Trade Journal* ,1961

Handbook of Physical Vapor Deposition (PVD) Processing Donald M. Mattox,2010-04-29 This updated version of the popular handbook further explains all aspects of physical vapor deposition PVD process technology from the characterizing and preparing the substrate material through deposition processing and film characterization to post deposition processing The emphasis of the new edition remains on the aspects of the process flow that are critical to economical deposition of films that can meet the required performance specifications with additional information to support the original material The book covers subjects seldom treated in the literature substrate characterization adhesion cleaning and the processing The book also covers the widely discussed subjects of vacuum technology and the fundamentals of individual deposition processes However the author uniquely relates these topics to the practical issues that arise in PVD processing such as contamination control and film growth effects which are also rarely discussed in the literature In bringing these subjects together in one book the reader can understand the interrelationship between various aspects of the film deposition processing and the resulting film properties The author draws upon his long experience with developing PVD processes and troubleshooting the processes in the manufacturing environment to provide useful hints for not only avoiding problems but also for solving problems when they arise He uses actual experiences called war stories to emphasize certain points Special formatting of the text allows a reader who is already knowledgeable in the subject to scan through a section and find discussions that are of particular interest The author has tried to make the subject index as useful as possible so that the reader can rapidly go to sections of particular interest Extensive references allow the reader to pursue subjects in greater detail if desired The book is intended to be both an introduction for those who are new to the field and a valuable resource to those already in the field The discussion of transferring technology between R D and manufacturing provided in Appendix 1 will be of special interest to the manager or engineer responsible for moving a PVD product and process from R D into production Appendix 2 has an extensive listing of periodical publications and professional societies that relate to PVD processing The extensive Glossary of Terms and Acronyms provided in Appendix 3 will be of particular use to students and to those not fully conversant with the terminology of PVD processing or with the English language Fully revised and updated to include the latest developments in PVD process technology War stories drawn from the author s extensive experience emphasize important points in development and manufacturing Appendices include listings of periodicals and professional societies terms and acronyms and material on transferring technology between R D and manufacturing
