Constructional and Cognitive Explorations of Contrastive Linguistics Annalisa Baicchi, Cristiano Broccias, 2024-02-22 This book approaches the field of contrastive linguistics from a comparative and robust perspective that combines the tenets of construction grammar and cognitive linguistics In doing so it shows how their integration can help to successfully enhance research on contrastivity by means of updated theoretical frameworks and applied methodologies that combine language and thought It compares ten different languages and offers analyses of

constructions at all levels of the linguistic organization identifying the cognitive motivations that instantiate the linguistic data retrieved from corpora Relevant to both cognitive and non cognitive linguists interested in variation and contrastive approaches as well as graduate students in these areas this book makes a significant contribution to existing work on the various types of constructional and discourse based phenomena in modern languages *Mathematics and the Craft of Thought in the Anglo-Dutch Renaissance* Eleanor Chan,2021-09-30 The development of a coherent cohesive visual system of mathematics brought about a seminal shift in approaches towards abstract thinking in western Europe Vernacular translations of Euclid s Elements made these new and developing approaches available to a far broader readership than had previously been possible Scholarship has explored the way that the language of mathematics leaked into the literary cultures of England and the Low Countries but until now the role of visual metaphors of making and shaping in the establishment of mathematics as a practical tool has gone unexplored Mathematics and the Craft of Thought sheds light on the remarkable culture shift surrounding the vernacular language translations of Euclid and the geometrical imaginary that they sought to create It shows how the visual language of early modern European geometry was constructed by borrowing and quoting from contemporary visual culture The verbal and visual language of this form of mathematics far from being simply immaterial was designed to tantalize with material connotations This book argues that in a very real sense practical geometry in this period was built out of craft metaphors **Temporary Appropriation in Cities** Alessandro Melis,Jose Antonio Lara-Hernandez,James Thompson,2019-12-12 This book conceptualises and illustrates temporary appropriation as an urban phenomenon exploring its contributions to citizenship urban social sustainability and urban health It explains how some forms of appropriation can be subversive existing in a grey area between legal and illegal activities in the city The book explores the complex and the multi scalar nature of temporary appropriation and touches on its relationship to issues such as sustainability and building re use culture inclusivity including socio spatial inclusion streetscape design homelessness and regulations controlling the use of public spaces The book focuses on temporary appropriation as a necessity of adapting human needs in a city highlighting the flexibility that is needed within urban planning and the further research that should be undertaken in this area The book utilises case studies of Auckland Algiers and Mexico City and other cities with diverse cultural and historical backgrounds to explore how planning design and development can occur whilst maintaining community diversity and resilience Since urban populations are certain to grow further this is a key topic for understanding urban dynamics and this book will be of interest to academics and practitioners alike *Atypical predicate-argument relations* Thierry Ruchot,Pascale Van Praet,2016-12-08 This book deals with atypical predicate argument relations Although the relations between predicates especially verbal and their arguments have been long studied most studies are concerned with typical telic verbs in the past tense indicative mood active voice with all arguments expressed Recently linguists have become interested in other types of predicate argument relations displaying atypical properties be they morphological or

syntactic in one language or cross linguistically The articles in this book investigate some of these argument marking with some special groups of verbs arguments not foreseen in the verb valency and contributed by the construction verbs in idiomatic constructions valency changing operations arguments in thetic sentences or in participle constructions etc The authors work within different theoretical frameworks and on various languages from more current languages like English Spanish French or German to Hebrew or lamaholot an Austronesian language
