Vulture Reaktion Books Animal:

Vulture Thom van Dooren, 2020-02-19 Simply because they are large scavenging birds vultures are often viewed as harbingers of death But as Thom van Dooren shows in this cultural and natural history that dominant association leaves us with a very one dimensional understanding of a group of actually rather fascinating and diverse creatures *Vulture* offers an enlightening new history of this much misunderstood bird Vultures vary in type and size and while some have a diet mainly of bone others are actually almost completely vegetarian Most interesting despite its notorious association with death the vulture very rarely if ever kills for itself In different cultural mythologies vultures play a role in disposing of the dead and officiating over human sacrifices but they have often been viewed as courageous and noble creatures as well believed to be indispensable in the containment of waste and disease and even to be world creators and divine mothers Van Dooren explores these many histories from some of the earliest known Neolithic sites in which vultures are thought to have consumed the dead to contemporary efforts to reintroduce the bearded vulture into the Alps Highlighting the rich diversity of vultures and the many ways in which people have understood and lived with them *Vulture* invites a new appreciation and wonder for these incredible birds

Anthropology and Cryptozoology Samantha Hurn, 2016-11-03 *Cryptozoology* is best understood as the study of animals which in the eyes of Western science are extinct unclassified or unrecognised In consequence and in part because of its selective methods and lack of epistemological rigour *cryptozoology* is often dismissed as a pseudo science However there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware scientific categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them In many cultural contexts myth folk classification and lived experience challenge the truth expounded by scientists With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world this volume engages with the

theoretical and methodological issues raised by reported sightings of unrecognised animals Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures Anthropology and Cryptozoology Exploring encounters with mysterious creatures will be of interest to anthropologists sociologists and geographers working in the fields of research methods anthrozoology mythology and folklore and human animal interaction
