Current Problems of the World Economy and International Trade reveals the determinants of competitiveness and drivers of economic growth of individual countries provides useful applied advice on post crisis recovery and the development of the world economy and international trade in the post pandemic period *The World Economy* Beth Yarbrough, Robert Yarbrough, 2013-06 Textbook for undergraduate economics course in open economy macroeconomics or international macroeconomics **Fairness in the World Economy** Americo Beviglia Zampetti, 2006 In an international context fairness

is particularly important since only a system which is perceived by its participants as fair can command acceptance and compliance The main focus of this study is to investigate the development of the notion of fairness in US trade policy and law as well as the impact this notion has on international trade discussions and rule making and especially on the formation of the multilateral trade regime The contention of the author Americo Beviglia Zampetti is that fairness concerns which have been present in the US trade policy debates and treaty practice since the Republic's inception have contributed to shaping these debates and practice over the years both at home and abroad These concerns were finally thrust upon the international scene through inclusion in the multilateral trade regime after World War II As such the book forms part of the broader debate over the costs and benefits of globalization The methodological approach chosen is that of an intellectual history which seeks to understand the origin of a particular idea trace its trajectory within the international trade policy discourse and evaluate its impact on policy and regime formation *Fairness in the World Economy* will be a fascinating and insightful read for academics students researchers and policymakers with an interest in international trade issues as well as international affairs relations and economics *International Trade* Anne O. Current Issues in International Trade Gouranga Gopal Das, 2014-07-26 With the boons of technological progress spreading every nook and corner of the globe, Globalization has been a dominant force for several decades. Globalization has winners and losers. International trade, foreign direct investment and trans-boundary flow of goods, services and capital are few of the many facets that characterize the process of globalization. Thus a volume addressing such issues is quite essential for readers. This volume is a collection of thirteen contributed chapters on the current international trade scenario, its evolution over the years and its global impact on developed and developing economies. Most importantly, it deals with a range of issues related to the global financial crisis and its aftermath affecting global trade and the players in the international market. As the crisis unfolded, trade has suffered a setback and we saw a shift in global trade. In particular, we saw the emergence of developing nations and gradual erosion of dominance of developed countries. This book covers these aspects. The valuable contributions by the authors look at these problems in the global macro economy from different angles: theoretical and empirical, to offer a cogent view of the current situation facing us. The chapters offer a theoretical viewpoint as well as applied perspectives on many facets of crisis and trade in the global economy.
