The Wounded Storyteller Body Illness And Ethics Second Edition:

The Wounded Storyteller Arthur W. Frank, 1997-05-15 Ill people are more than victims of disease or patients of medicine they are wounded storytellers Frank argues People tell stories to make sense of their suffering when they turn their diseases into stories they find healing Drawing on the work of authors such as Oliver Sacks Anatole Broyard Norman Cousins and Audre Lorde as well as on the stories of people he has met during years spent among different illness groups Frank recounts a stirring collection of illness narratives ranging from the well known Gilda Radner's battle with ovarian cancer to the private testimonials of people with cancer chronic fatigue syndrome and disabilities Their stories are more than accounts of personal suffering they abound with moral choices and point to a social ethic Frank identifies three basic narratives of illness stories of restitution chaos and quest Restitution narratives anticipate getting well and give prominence to the technology of cure In chaos narratives illness seems to stretch on forever with no respite or redeeming insights Quest narratives are about finding that illness can be transformed into a means for the ill person to become someone new Understanding these three narrative types helps us to hear the ill but ultimately illness stories are more Frank presents these stories as a form of testimony the ill person is more than a survivor she is a witness Schooled in a pedagogy of suffering the ill person reaches out to others offering a truth about living The truth is a starting point for a narrative ethics as private experiences become public voices Wounded storytellers teach more than a new way to understand illness they exemplify an emerging ethic of postmodern times

suffering and what is at stake Lowe demonstrates through analysis of major healthcare workforce issues and incidence of burnout how key policies and practices influence healthcare education and experiences of both patients and health professionals By including first person narratives from health professionals as a tool and resource she illustrates how dominant ideas about the self enter practice as a refusal of suffering Demonstrating the relationship between personal experience theory and research Lowe argues for a pedagogy of suffering that shows how the moral anguish implicit in suffering is an ethical response of the emergent self This is an important read for all those interested in medical humanities health professional education person centred care and the sociology of health and illness

Hospitable Witnessing Priscilla Sun Kyung Oh, 2018-06-18. Drawing on her own experience of befriending a person suffering from a long term mental health challenge, Priscilla Oh reflects on the meaning of care and friendship, theologically. Using autoethnography, she goes beyond the personal experience and examines various issues surrounding mental health. *Hospitable Witnessing* candidly takes readers into the everyday life of being with a mentally ill person. There are emotional challenges and contingencies in sustaining friendship and caring for a person with a long term mental health problem. Oh points out that those who care for a loved one during a long term illness inevitably experience burnout resulting from the constant care requirements. Under such an enormous disruption, we need to be compassionate toward another's suffering and be willing to be present and available for them. This book suggests our need of one another and identifies three important Christian practices: caring as we are being made in the image of God, compassion as being present with the sufferer, and lament as to revitalize our faith and hope.

Social Theory and Nursing Martin Lipscomb, 2016-12-08. Likewise, social theory's ability to position nursing within wider structures of

healthcare and educational provision is similarly and puzzlingly downplayed The questions nurses ask and the problems they face cannot however adequately be addressed without engaging with social and sociological theory and to progress this engagement contributors to this book explore how social theories are used by and might apply to nursing and nursing practice The book draws on a wide range of perspectives philosophical theoretical empirical and political to offer a robust and wide ranging critique and analysis Social Theory and Nursing is essential reading for nursing researchers academics and educators as well as scholars and researchers in medical sociology medicine and allied health Inheriting Gadamer
