Theorising Special Education Catherine Clark, Alan Dyson, Alan Millward, 2005-06-23 The field of special needs education is well established and although it continues to develop in exciting and controversial ways involving some of education's leading thinkers many people feel it is lacking a coherent theoretical analysis of its own Students and practitioners looking for some solid theory to reinforce their own study or practice commonly have to borrow from other disciplines such as psychology and sociology since there has been no attempt to provide a theoretical foundation for the special needs community This book does exactly that bringing together contributions from key names in the field from UK and beyond The book will establish itself as an essential text for students and teachers as well as all those involved in special needs across the social sciences

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches
