Therapeutic Uses Of Botulinum Toxin Musculoskeletal Medicine:

Therapeutic Uses of Botulinum Toxin Grant Cooper, 2007-10-05 Justinius Kerner a German medical officer and poet was the first to realize that botulinum toxin potentially might be useful for therapeutic purposes Kerner made this observation in 1822 but he did not call the toxin botulinum toxin Instead Kerner called it the substance in wirkenden stoffes which translates to bad sausages Kerner realized that there was a fat poison or fatty acid within sausages that produced the toxic effects that we now know as botulism Nearly a century would pass before the bacterium producing the toxin would be isolated and the toxin ultimately renamed botulinum toxin As farsighted as Kerner was it is doubtful that even he could have predicted just how much potential therapeutic punch was packed within his wirkenden stoffes It was not until 1978 more than a century and a half after Kerner's prediction that Dr Allan Scott received Food and Drug Administration approval to test botulinum toxin type A in human volunteers We do not yet have a comprehensive understanding of precisely how botulinum toxin works in the human body or how our bodies fully respond to the toxin We do know that it temporarily paralyzes muscle by inhibiting the release of acetylcholine and it also appears to inhibit the release of other neurotransmitters
