The estimation procedures of the various components of Belgian national income between 1920 and 1939 are thoroughly discussed and explained. The book also falsifies the proposition that Belgium is a country without statistics. There are many series available but they are scattered over many publications and therefore often difficult to find. One merit of this book is that it brings together quantitative material from very diverse sources and origins. Not only economic historians will benefit from the wealth of statistics presented here but also e.g. social historians. Fishing News International, 1976
